PREFACE

The study of the textual traditions of Indian Buddhism has not yet received the attention in the United States that it continues to receive in Europe and Japan. Although research in Buddhist literature is not the only viable approach to the study of Buddhist history and doctrines, it is an essential element contributing to our understanding of the historical development and complexities of this tradition. To a great extent, research into almost every aspect of premodern Buddhism is dependent on, or must at least utilize, the results of textual studies. The student of contemporary Buddhism can observe rituals, conduct interviews, and otherwise seek an understanding of Buddhist society and culture. But one can travel into the past only through what is left behind, and even the stones that are the research materials of archeologists and art historians could hardly yield much sense without the help of written texts. Texts allow one to, quite literally, contextualize almost every type of evidence. In this sense, textual studies serve as the foundation for research into premodern Buddhism.

In the following pages we offer the reader three studies on Mahāyāna Buddhist texts of India. The first two present sūtra materials. The third concerns itself with śāstra material, that is, philosophical literature. Taken together, the three contributions illustrate different methodologies employed in the study of Buddhist literature, and are motivated by differing aims. From one point of view, then, this volume is intended to furnish several possible models for the textual study of Buddhism.

The translation of the *King of Samādhis* is free of brackets and (it is hoped) Sanskritic English, and the introduction provides an overview of the history of the text. The goal is to make available to both general and scholarly audiences the content of an important Mahāyāna scripture. Professor Schopen's *Vajracchedikā* translation, on the other hand, seeks to reproduce the syntax of the Sanskrit text quite literally, and the transcription of the manuscript and the textual notes are geared primarily toward an audience made up of his fellow scholars. Professor

Preface

Ichigō's study, presented in the third part of the volume, seeks to emphasize the philosophical and doctrinal standpoint of Śāntarakṣita's text. The introduction and translation, though amply provided with documentation from Sanskrit and Tibetan sources, are directed primarily at readers whose interests and abilities tend more toward the philosophical than the philological.

Although each part of the present volume emphasizes a different aspect of the study of Buddhist literature, it should be obvious that no one approach is sufficient to fully elucidate the multiple facets of any text. One of the things that makes the study of texts so fascinating is the endless variety of approaches one can take—each approach illuminating something new about the others. A glance at the list of published studies of the *King of Samādhis Sūtra* in Part I will give the reader an idea of some of the kinds of research that can be undertaken. One of the underlying assumptions behind the present group of studies, however, is the notion that any serious "higher criticism" of Buddhist literature (or for that matter of all literature) requires, first, the critical establishment of a philologically correct text and, second, the ability to, in one way or another, render that text intelligible. The papers in this volume illustrate the problems inherent in both of these tasks—the philological and the hermeneutic enterprises.

The first paper in the volume contains a lengthy introduction to the *Samādhirāja-sūtra* and a translation of its first four chapters. This translation of the *King of Samādhis* is the result of an experiment in group translation, the members of the group consisting of faculty, visiting scholars, and advanced graduate students at the University of Michigan from 1982 to 1983. An effort was made throughout the introduction and translation to make the presentation of these materials accessible to the interested nonspecialist, while still maintaining rigorous scholarly standards. The introduction contains detailed bibliographic information about the sūtra, its classical versions and its modern editions, translations and studies. A text of capital importance for the Mahāyāna philosophical school called Mādhyamika, this sūtra is quoted extensively in śāstric literature. These quotations are documented in detail. Furthermore, an outline summary of the whole sūtra is given, chapter by chapter. It is hoped that the availability of some portions of the sūtra in English translation might prompt others to undertake translations of the remaining chapters in the near future.

Preface

For reasons explained in detail in Part I, the text taken as a basis for the translation is the version preserved in the Buddhist Sanskrit manuscripts of Nepal. Since many Mahāyāna sūtras do not survive in their Indian-language originals, Tibetan and Chinese translations provide us with valuable textual materials for the study of Indian Mahāyāna Buddhism. Even in cases like that of the *King of Samādhis*, for which we still possess a Sanskrit version, careful and judicious use of the Tibetan and Chinese translations can aid our reading of the text. It is important, however, for modern scholars to avoid creating their own new, conflated text of a sūtra. Often scholars will fail to adequately distinguish the various recensions of a given text, using translations not to shed light on one version but to actually rewrite the text. The study in Part I cautions against such a method, and shows in the notes to its translation one approach to the comparative use of classical translations of Indian Buddhist texts.

Part II of the volume contains Gregory Schopen's edition, notes and translation of the Gilgit text of the *Vajracchedikā*, a sūtra well known in the West under the title of the *Diamond Sūtra*. The main object of Professor Schopen's contribution is to present a critical transcription of the unique, incomplete manuscript of the sūtra discovered at Gilgit in present-day Pakistan. This manuscript represents one of the earliest pieces of evidence we have for the Sanskrit text of the sūtra. Accompanying Professor Schopen's transcription is a critical apparatus in which he points out the limitations of previous editions of the Gilgit manuscript. These textual notes also draw attention to some of the differences between the Gilgit recension and other Sanskrit texts of the sūtra. Also included in Part II are an English rendering of the transcribed text and notes to this translation. The aim of Professor Schopen's translation contrasts with that of the translators of the *Samādhirāja*, since he seeks to represent the literal structure of the Sanskrit text. The notes to the translation explain some English renderings and discuss several of the doctrinal points raised in the text, illustrating these with reference to parallel passages in other texts.

Professor Schopen's study does not emphasize the doctrinal or philosophical aspects of the *Vajracchedikā*, although he discusses some relevant points in the notes to his translation. However, this was one of the most influential texts of East Asian Buddhism and, to judge solely by the number of Indian commentaries, of Indian Mahāyāna Buddhism as well. Its importance as a source of philosophical ideas would be hard to

Preface

overestimate. By concentrating not on these well-known facets of the *Vajracchedikā* but rather on its philological problems, Professor Schopen reminds us that before we begin to speak about what a certain text meant to Buddhists of such-and-such a place at such-and-such a time we must determine just what text these people had before them. The text of the *Vajracchedikā* available in sixth-century Gilgit differed in some significant ways from the Sanskrit text with which we are familiar through the Nepalese or Japanese manuscripts, not to mention the Tibetan and Chinese translations. Without careful and critical textual studies such as that presented here by Professor Schopen, we are bound to base our reconstructions of premodern Buddhism on conflated notions of the Buddhist literary tradition, and in so doing destroy the individual character and achievements of distinct Buddhist communities.

The third contribution to this volume deals with the scholastic elaboration of the Mahāyāna Buddhist tradition. Professor Masamichi Ichigō's study of Śāntarakṣita's *Madhyamakālamkāra* contains a detailed introduction, a critical edition of the Tibetan translation of the *Madhyamakālamkāra-kārikā*, and an English translation, the latter two printed on facing pages. The introduction sets out in elaborate detail Śāntarakṣita's place in the philosophical history of Indian Buddhism. Particular attention is paid to the relationship between Śāntarakṣita, his disciple and commentator Kamalaśīla, and Jñānagarbha, Haribhadra and Bhāvaviveka. From this point of view, what Professor Ichigō presents in his introduction is an outline of the philosophy of the late Indian Buddhist philosophical syncretism called Yogācāra-Mādhyamika. Professor Ichigō believes the *Madhyamakālamkāra* to be Śāntarakṣita's main work, and the basic source from which one can gain an understanding of Yogācāra-Mādhyamika philosophy. The ninety-seven verses of the *Madhyamakālamkāra* are extant only in Tibetan translation, and it is due to this fact, perhaps, that this text is less well-known than the same author's *Tattvasaṃgraha*, extant in Sanskrit. Professor Ichigō, however, has been able to discover the original Sanskrit for a large number of the verses of the *Madhyamakālamkāra*. The references to citations of Śāntarakṣita's verses in later texts enable us to get some idea of the impact his works had on the tradition that followed him. Among the later Indian authors whose names might be mentioned in this connection are Prajñākaramati, Mokṣakaragupta, Jñānaśrimitra, Jitāri and Atīsa.

Preface

Professor Ichigō's critical edition of the Tibetan text is based on all available Tanjur editions of the bare verses, Śāntarakṣita's own commentary, and the sub-commentary of Kamalaśīla. In this respect it stands as a model for such editions. The English translation of the often gnomic verses is rendered intelligible and authoritative by the inclusion of explanatory material based on the commentaries. The chapter concludes with a list of sūtras quoted in the commentary and sub-commentary to the text.

Professor Ichigō's contribution presents yet another approach to the translation of Buddhist texts. While the translators of the *Samādhirāja* sought to eliminate altogether the use of bracketed material, and while Professor Schopen sought to be almost mechanically literal, Professor Ichigō has attempted to produce a coherent and philosophically comprehensible rendition of the original. This has been achieved by introducing into the translation material not included in the text itself but provided in its commentaries or required by the sense of the argument.

A first version of Professor Ichigō's essay, edition and translation was published in 1985 as part of a two-volume study accepted by Kyōto University as Professor Ichigō's D. Litt. thesis (*Madhyamakālamkāra* and *Chūgan Shōgonron no Kenkyū*; Kyoto: Buneidō). The editors and the author had originally intended to publish the essay in the present volume simultaneously with Professor Ichigō's book. Delays in the appearance of the present volume, however, allowed Professor Ichigō to thoroughly revise his entire contribution. Not only the introduction but also the edition and translation include substantial changes and additions not found in the earlier version.

Within certain technical limitations, the editors have sought to make the layout of the volume contribute to its ease of use. Unfortunately, despite (or perhaps because of) computer typesetting techniques, it proved impossible to print the notes as footnotes. The varied natures and emphases of the individual chapters have led to different approaches to format and style. The English translation of the *Samādhirāja* has been paragraphed by the translators according to the sense of the text, as has the translation of the *Vajracchedikā*. The notes to the text of the *Vajracchedikā*, on the other hand, are treated as a separate section of the study, and are divided according to the folios and lines of the manuscript itself rather than according to the conceptual divisions of the text proper. In the case of the *Madhyamakālamkāra*, the critical notes to the edition are given after each verse and the verses and translation are

Preface

printed on facing pages. References to quotations or parallel passages are found in the notes to the translation. In all three parts, the editions and translations contain references to the pages or folios of the original texts.

This volume is the first product of a project initially authorized as a three-year experiment by the College of Literature, Sciences and the Arts at the University of Michigan. As such, it contains some of the fruits of the individual and collective efforts of the scholars associated with the project in its first two years. Insofar as the seminars and colloquia sponsored by the Institute for the Study of Buddhist Literature fostered the research which resulted in these papers, thereby furthering our understanding of Buddhist traditions in general, the goals of the Institute have been met. For their support of the Institute, its projects and its goals, we wish to express our gratitude to the Deans and the Executive Committee of the College of Literature, Sciences and the Arts of the University of Michigan.

The initial stages of Professor Gregory Schopen's work on the *Vajracchedikā* were part of a broader study of the Gilgit manuscripts begun under a Translations Grant from the National Endowment for the Humanities in 1979. Professor Masamichi Ichigō was able to visit the University of Michigan during 1982-83 thanks to the generosity of his home institution, Kyōto Sangyō Daigaku. The Institute was happy to be able to host another visit by Professor Ichigō during 1987-88, cosponsored this time by Kyōto Sangyō Daigaku, Higashi Honganji Ōtani-ha and the Institute. Professor Gishin Tokiwa, for one year a member of the team that translated the *Samādhirāja*, was able to visit Michigan from his home institution of Hanazono College, Kyoto, thanks to a generous grant from the Japan Foundation. The editors wish to express their personal thanks to Professors Ichigō and Tokiwa for their many contributions to the project. We should also note that their experiences with joint translation projects in Japan proved valuable to the Michigan group's own efforts.

The manuscript of this book has a long and torturous history. During the initial stages of its preparation the Center for Japanese Studies and the Center for Chinese Studies at the University of Michigan generously allowed the use of their word-processing equipment, and for this we are indebted to them. The staff of the Publications Office, especially Barbara Congelosi, deserve our thanks for their technical assistance. The first drafts of the manuscript were typed by Patrick

Preface

Pranke, Belinda Bicknell, Edward Hamlin and Marcella Rose, and to them the editors owe their appreciation. The cooperation and advice of Janet Opdyke, editor of the publications program of the Center for South and Southeast Asian Studies at the University of Michigan, made it possible for the Institute to publish the present volume jointly with the Center.

It is our pleasure to acknowledge the help we received from Wendy Holden, Walter Spink and Karl Pohrt in designing the cover for this volume. The photo, of the left wall of the antechamber of cave seventeen at Ajanta, was kindly provided by the Asian Art Archives of the University of Michigan. The Chinese and Japanese characters were generated on an NEC computer, and we owe our thanks to T. Griffith Foulk for his assistance in this regard.

It remains to express our gratitude last but most certainly not least to Diane Scherer. At various stages over the long life of this volume, and in her present position as an editor at the Center for South and Southeast Asian Studies, she edited, typed and otherwise assisted its publication. It is no exaggeration to say that without her endlessly energetic, careful and dedicated work this volume, had it appeared at all, would have been much more imperfect than it now is.

LIST OF CONTRIBUTORS

Luis O. Gómez is Charles O. Huckler Professor of Buddhist Studies and Chair of the Department of Asian Languages and Cultures at the University of Michigan. His main research interests include Indian Mahāyāna Buddhist literature and early Sino-Tibetan Ch'an. His most recent major publications include "The Direct and Gradual Approaches of Zen Master Mahāyāna: Fragments of the Teachings of Mo-ho-yen," "Indian Materials on the Doctrine of Sudden Enlightenment," "From the Extraordinary to the Ordinary: Images of the Bodhisattva in East Asia," and "Purifying Gold: The Metaphor of Effort and Intuition in Buddhist Thought and Practice."

Masamichi Ichigō is a professor at Kyōto Sangyō Daigaku in Kyoto, Japan. He holds a D. Litt. degree from Kyōto University, and specializes in Indian Mādhyamika Buddhist philosophy, especially that of Śāntarakṣita. His major publications include *Chūgan Shōgonron no Kenkyū* [A study of the *Madhyamkālāmkāra*], *Sanmai-ō kyō* [The *Samādhirājasūtra*], "Yugagyō-Chūgan-ha" [The Yogācāra-Mādhyamika], and numerous articles.

Gregory Schopen is Professor of Religious Studies and Adjunct Professor of Tibetan Studies at Indiana University, Bloomington. The recipient of a MacArthur Fellowship, he is particularly interested in the history of Indian Buddhism, and Indian Buddhist literature and inscriptions. He has published extensively, including most recently "Two Problems in the History of Indian Buddhism: The Layman/Monk Distinction and the Doctrines of the Transference of Merit," "The Bodhi-garbhālaṅkāralakṣa and Vimaloṣṇīṣa Dhāraṇīs in Indian Inscriptions," and "Burial 'Ad Sanctos' and the Physical Presence of the Buddha in Early Indian Buddhism."

Jonathan A. Silk is a doctoral student in Buddhist Studies at the University of Michigan, specializing in Indian Buddhism.

ABBREVIATIONS AND BIBLIOGRAPHY

The following list identifies abbreviations used in the text and provides reference information for the works cited in the notes to this study. For those works listed in detail in the sections discussing modern research on the sūtra (5.1.2, 5.2 and 5.3) or in the section treating the sūtra's position in Mahāyāna literature (3.2), the list below provides only a note to author and date and a reference to the location in the introduction where the complete bibliographic data can be found. The editions used in this study are cited under the names of the texts rather than the editors and the title of the published work is provided only when it differs from that of the original text.

References to classical texts are either to page and line (arabic numerals separated by a period), to volume and page (separated by a colon), or to chapter and verse (separated by a colon).

The King of Samādhis: Chapters I–IV

INTRODUCTION TO THE ENGLISH TRANSLATION

1. Prefatory Note

The pages following this introduction contain an English translation of the first four chapters of the *Samādhirāja-sūtra*. This Mahāyāna Buddhist text was composed in an Indic language, probably Sanskrit, perhaps as early as the second century C.E. The text is often referred to in the Buddhist philosophical literature of India and Tibet and was considered an important proof text, especially by the philosophers of the Madhyamaka tradition. Although it is questionable how much the sūtra itself was read in Tibet, it is often cited in Tibetan philosophical literature, probably mostly on the basis of quotations found in Indian texts. The sūtra seems to have had a less glorious history in the Far East, where it was translated several times but was seldom quoted. It is not part of any of the sūtra collections within the Tibetan and Chinese Canons, though it is found as an independent text in both. In Nepal the *Samādhirāja* was counted as one of the “Nine Dharmas,” a set of texts so highly revered that its manuscripts were used as objects of worship.¹

Apart from its place in the canonical collections of Buddhist literature in Tibet and China, the sūtra is also known from a single manuscript recovered from Gilgit in present-day Pakistan. The intrinsic value of the sūtra, however, may lie in what its contents reveal to us about the beliefs and perhaps even practices of Indian Mahāyāna Buddhism.

1.1 The Translation

The present translation is the result of an experiment in team translation. A committee of from five to nine persons worked on the project

over a one-year period. Strict controls were used in the hope of insuring accuracy and a natural and uniform style; still, the end product is essentially the fruit of collective effort and consensus. The fundamental presupposition of this approach is that a variety of perspectives brings the translation process closer to one of its most important goals—to make a text intelligible to a wide audience. The team approach also seeks to combine the scholarly perspectives and expertise of more than one individual. At the same time, it is hoped that the critical methods adopted by the group have filtered out some of the idiosyncrasies and unnatural English constructions that have become the trademark of modern translations of Buddhist texts.

One member of the team, Luis O. Gómez, served as redactor and was invested with the authority to decide issues where no consensus could be reached. However, since the object of the team approach was to have as much discussion and criticism as possible, and to let the translation grow with the discussion, the redactor's prerogatives were used only in cases of unreconciled disagreement.

Normally, discussion was allowed to run its course until some form of consensus was reached. We sought to balance the tendency of group effort to settle for the lowest common denominator by the constant use of established critical tools. While consensus was an important consideration, we provided control through the drafting of numerous revisions, always with the original in view, and by leaving the two most fundamental tasks—casting the first draft and redacting the final version—to individual members of the team.

The classical versions of the sūtra were also considered in our discussions, but not as different limbs of some imaginary conflated text. Therefore, the multilingual approach was conceived of as an interpretive tool, not as a criterion for editorial emendation. Only one recension, that of the Nepalese manuscripts, was chosen as the primary object of translation. We utilized the edition of Matsunami, since it is the only critical edition of these manuscripts. Other editions and recensions were used as hermeneutical devices. Only in the most obscure passages, where Matsunami's text or his manuscripts defied translation, was any attempt made to correct the Nepalese recension, or Matsunami's edition, in the light of other recensions. Otherwise it was assumed that Matsunami's readings were "correct," in the sense that they represent an actual textual tradition, not a mere scribal accident. This principle was followed even when, occasionally, Matsunami's text appeared to be grammatically irregular or doctrinally inconsistent with other sources.

Accordingly, the translation team abstained from any attempt at reconstructing the "original," "early" or "complete" version of the text by

conflating the available recensions. In this way we feel we are presenting the translation of a real text, an actual religious object, and not simply a scholar's idea of what the *Samādhirāja* must have been at some undetermined point in time.

1.2 Critical Apparatus

Notes and Sanskrit terms have been kept to a minimum. On the first occurrence of a key technical term or a problematic translation, we have included the original Sanskrit in parentheses, unless the term has been discussed in a note. We have also abandoned the widespread convention of using brackets to indicate those parts of the English translation that do not have an exact Sanskrit equivalent. This follows from the simple principle that no Sanskrit phrase has a one-to-one English correspondence, and that the consistent recourse to brackets would result in such ubiquitous use that it would interrupt the flow of normal English prose. Likewise, every effort has been made to keep to a bare minimum other matters traditionally included in brackets (e.g., translator's interpolations). It is hoped that this will provide a more readable, yet still accurate, text.

The annotation as well as the introductory material is limited. It is meant only as a guide to the more fundamental and general problems in the study of the text.

Translation Committee:

The following persons participated in this project as members of the translation committee of the University of Michigan's Collegiate Institute for the Study of Buddhist Literature: Madhav Deshpande, Kenneth DeWoskin, Luis O. Gómez, Clair W. Huntington, Masamichi Ichigō, Patrick Pranke, Gregory Schopen, Robert Sharf and Gishin Tokiwa.

2. The Text

2.1 *The Sūtra's Early History*

The early history of the sūtra is far from certain, but an educated guess is that the text took form between the second century C.E., when it is generally believed Madhyamaka thought emerged as a distinct philosophical tradition, and the sixth century, the date of the Gilgit manuscript, the earliest extant recension of the text. This does not mean that the text was not in existence in some form before the second century, as "the beginning of the Madhyamaka" is far from being a *terminus a quo*. Since the relationship between the sūtra and the Madhyamaka as a philosophical school is far from clear, their relative chronologies are not beyond argument, and the dates of Nāgārjuna's life (assuming that these mark the beginning of the school) are still open to question. Furthermore, a Chinese translation of the sūtra by An Shih-kao (fl. mid-second century C.E.) has been recorded in the catalogues. This fact would make the second century a *terminus ante quem*. At any rate, it is obvious that the sūtra underwent many changes throughout its history, and that a considerable number of interpolations were added between the time of the Gilgit recension and the ninth century, the date of the Tibetan translation.

Two fragments of a Chinese translation by Hsien Kung of the Liu-Sung dynasty (420-79) represent the earliest extant dated redaction. This is followed by the complete translation in ten scrolls of Narendrayāśas (worked in Honan 557-68) and the Gilgit manuscript, which dates from roughly the same period. Since the present Nepalese text corresponds closely to the Tibetan translation, and has much additional material not found in the ten-scroll Chinese translation, Constantin Régamey offered the hypothesis that the text was constituted in its present form in the period between the sixth and ninth centuries, that is, between Narendrayāśas's translation and the earliest Nepalese manuscript.² But Régamey himself rejected this possibility for three reasons. First, in some passages (e.g., in chapter XXII) the Chinese translation represents a more developed version than either the Nepalese Sanskrit or the Tibetan texts. Second, quotations from the *Samādhirāja* in Candrakīrti's *Prasannapadā* and in Śāntideva's *Śikṣāsamuccaya* correspond quite accurately to the modern (nineteenth century) Nepalese manuscript tradition. This suggests that there may have been a different recension, very similar to the recension represented today by the Nepalese or Tibetan texts, as early as the sixth century or, at the latest,

by the seventh century. Lastly, in at least one case cited by Régamey (chapter VIII), the Chinese translation omits the *gāthās* (verses), quoted by Candrakīrti. Régamey concluded that “the Chinese text is either an abridged translation or is based on a shorter recension of the *Samādhirāja sūtra*.”³ Moreover, Régamey was writing before the Gilgit manuscript had been published. Today we are able to distinguish three textual traditions represented by (1) the Gilgit manuscript, (2) the Chinese translation, and (3) the Nepalese manuscripts and the Tibetan translation.

Following Régamey’s original suggestion, Shinkan Murakami has assumed a linear development from the Gilgit to the Nepalese recensions, with the Tibetan text representing an intermediate stage.⁴ However, this seems unjustified unless one can demonstrate a clear genetic relationship between the various recensions. Furthermore, the Gilgit recension moves in a different direction, close to the extant Chinese, but not exactly in the direction of the recension known to the translators of the Kanjur. Murakami also attempted to show that chapter XXXIV of the sūtra (“Jñānavatī-parivarta”) corresponds to the *Yüeh-ming p’u-sa ching*, a short, perhaps fragmentary, text translated by Chih Ch’ien in the middle of the third century.⁵ It is difficult to see, however, what the correspondences are, apart from a few names that could be Chinese equivalents of some of the names in the Sanskrit chapter.

2.2 Its Titles

In the West scholars have preferred the short title *Samādhirāja*, but the work is known under several names in Asia. In India the two most common titles are *Samādhirāja-sūtra*, an allusion to the main theme of the text, and *Candrapradīpa-sūtra* (perhaps an allusion to the main character in the sūtra, the Bodhisattva Candraprabha).⁶ The full Tibetan title in the Kanjur is *’Phags-pa chos thams-cad kyi rang-bzhin mnyam-pa-nyid rnam-par spros-pa ting-nge-’dzin gyi rgyal-po zhes bya-ba theg-pa chen-po’i mdo*. This corresponds to *Sarva-dharma-svabhāva-samatā-vipañcita-samādhirāja-nāma-mahāyāna-sūtra*, which is the Sanskrit title given in the sūtra itself. The Chinese have preferred *Yüeh-teng san-mei ching*, that is to say, **Candrapradīpa-samādhisūtra*.

The sūtra declares its main theme to be a particular samādhi that is supposed to be the key to all elements in the path and to all the virtues and merits of buddhas and bodhisattvas. This state of mind, or spiritual practice, is called “the samādhi that is manifested as the sameness of the

essential nature of all dharmas" (*sarva-dharma-svabhāva-samatā-vipañcita-samādhi*).⁷ One may be tempted to assume that this refers to one particular form or state of contemplation; however, here the term "samādhi" is understood in its broadest signification. This samādhi is at the same time the cognitive experience of emptiness, the attainment of the attributes of buddhahood, and the performance of a variety of practices or daily activities of a bodhisattva—including service and adoration at the feet of all buddhas. The word samādhi is also used to mean the sūtra itself. Consequently, we can speak of an equation, sūtra = samādhi = śūnyatā, underlying the text. In this sense the title *Samādhirāja* expresses accurately the content of the sūtra.

On the other hand, it is not clear why some traditions have chosen to use the name Candrapradīpa as part of the title, for the main character is called Candraprabha, never Candrapradīpa. The two names are almost synonymous, but are not used interchangeably in the main body of the sūtra.⁸

Finally, in Śāntarakṣita's *Vṛtti* to his *Madhyamakālaṅkāra* and in Kamalaśīla's *Pañjikā*, a verse from the *Samādhirāja* is quoted under the title *Snying-rje chen-po la 'jug pa'i mdo*, which could be reconstructed in Sanskrit as **Mahākaruṇāvātāra-sūtra*.⁹ This title could be derived from stanza 20 of the sūtra's third chapter, in which it is stated that "this sūtra is called the entrance into great compassion" (*mahākaruṇam otāraṃ idaṃ sūtraṃ nirucyate*).¹⁰ This title is attested also at the end of the Sanskrit text, where it is said the sūtra should be remembered under the title of *Mahākaruṇāvātāra*, and at the end of the Chinese translation, where we find "This sūtra should be called 'The entrance into great compassion,'" a phrase corresponding to **Mahākaruṇāvātāra*.¹¹

The second element in the appellation *Samādhirāja-bhaṭṭāraka* is an honorific, similar in meaning to the first member of the more common compound *Ārya-samādhirāja*. Neither of these expressions is to be counted as a title different from *Samādhirāja*.

2.3 Structure

The Gilgit manuscript and the Chinese translation of the *Samādhirāja* represent early recensions that are shorter than those of the tradition represented by the Nepalese manuscripts and the Tibetan translation. The Chinese translation has no chapter divisions and the other versions do not always agree with each other with regard to chapter divisions. Still, the bulk of the text and its distribution into chapters is roughly the same in all versions. A summary of the most important differences between the Sanskrit manuscripts and the classical translations is given in Chart 1.

†The edition of Das and Vidyabhushan is supposedly based on the "Hodgson Manuscript." Mañjuśrīkīrti's commentary and the edition of Das and Vidyabhushan call chapter III "Buddhānusmṛti" and chapter IV "Samādhi."

‡The abbreviation *ch.* stands for *chūan* (scrolls). The Chinese version has no chapter divisions.

2.4 Leading Themes and Narrative Schema

2.4.1 Leading Themes

The most common title for the sūtra, *Samādhirāja*, as well as the samādhi that gives it this name, suggest a unifying theme for the text. At the beginning of the sūtra, in reply to the questions of Candraprabha, the Buddha enters a samādhi called in the Sanskrit version “the samādhi that is manifested as the sameness of the essential nature of all dharmas.” The Buddha then explains the virtues or extraordinary qualities of this samādhi, urges Candraprabha to practice it, and expounds on the merits of “preserving the samādhi,” a concept that will recur throughout the sūtra and which denotes preserving, in memory or in written form, the text of the sūtra, as well as the variety of spiritual exercises usually associated with the term samādhi. The latter aspect of the practice is defined in chapter III as *buddhānusr̥ti*, or meditation on the attributes of the Buddha. But in chapter IV it becomes apparent that the samādhi is also defined by a cognitive experience that entails both insight and power. Having declared this samādhi to be the highest state, the Buddha then explains how all existing things should be seen as having no essence, as being like a dream or a magical show. If one correctly examines in this manner all existence, one attains an awakening that contains the highest merits and powers. This will be the central idea of the core chapters of the sūtra (chapters V–XXXVII).

After chapter IV the text alternates between narrative sections and speculative considerations of the central themes of the first four chapters. The bulk of the sūtra consists of expository passages describing in detail the “preservation of the samādhi” and its fruits, *buddhānusr̥ti*, the nature and virtues of a buddha, a buddha’s body, the nature of his speech and silence, his realization of emptiness and so forth. However, one should not underestimate the importance of the narrative sections, both as fine examples of Buddhist literature and as doctrinal statements.

Other topics developed in the sūtra include the following: the manner in which the samādhi is to be practiced, the six perfections, the *śīlas* and the body of the Buddha. The sūtra also defines, cursorily and in catechetical form, some three hundred problematic words and phrases, which seem to have been culled from various scriptural sources to define the merits and powers of the samādhi. Finally, the sūtra concludes by relating how it was transmitted to Ānanda so that he would pass it on to future generations. This conclusion follows established conventions about the proper ending of a text of this genre. The traditional form and

content of this section (the *parīndanā*) signal the text's closure and confirm its sacred origins and purposes.

2.4.2 Outline

The following is a survey of the contents of the sūtra's forty chapters, according to the Nepalese recension. The English rendering of the title of each chapter is not meant to be an exact translation of the Sanskrit name. It is rather a gloss on the title or, wherever possible, a more accurate epitome of the content of the chapter.

All of the chapters have been summarized in English by Dutt, though his reports are not always accurate.¹² Some of the chapters have been translated into various western languages, as indicated after each of the relevant summaries. More complete bibliographic information is provided below in section 5 of this introduction.

A. Introduction

1. Setting for the Narrative

Chapter I. Nidāna: The Setting

Once, when the Blessed One was staying on Vulture Peak (Gṛdhra-kūṭa) near Rājagṛha, he was approached by a young man named Candraprabha who asks him how to attain the knowledge possessed by a buddha. The Buddha replies that such knowledge, and all the virtues of a buddha, can be obtained by following a single practice (*dharma*), a samādhi called "the samādhi that is manifested as the sameness of the essential nature of all dharmas." This is the King of Samādhis, from which the sūtra takes its name.

The sūtra then gives a list of approximately three hundred synonyms or attributes of this samādhi.¹³

(Translated in the present collection.)

2. Further Definition of Samādhi

Chapter II. Sāleन्द्रarāja: Previous Life of the Buddha as Sāleन्द्रarāja

The Buddha narrates how this samādhi was obtained and preserved by previous buddhas, especially at the time of the former Buddha

Sālendrarāja, when Śākyamuni was reborn as a king. In those times Candraprabha was a powerful monarch who supported the Buddha and learned this samādhi from him.

This chapter includes a short formula of transmission similar to the one found at the end of sūtras.

(Translated in the present collection.)

B. The King of Samādhis

1. The Nature of Samādhi

Chapter III. Bhūtaguṇavarṇaprakāśana: The Virtues of a Buddha

This chapter deals with a variety of topics, but is meant primarily as a description of the virtues and merits of a buddha. Such descriptions serve as the basis for the practice of contemplating the qualities of a tathāgata (*buddhānusmṛti*). The sūtra also suggests that meditation on the qualities of the Buddha and the recitation and preservation of the sūtra are synonymous.

This chapter suggests another name for the sūtra—*Mahākaruṇāvatāra-sūtra*, the “Sūtra Which Is an Entrance to Great Compassion.”

(Translated in the present collection.)

Chapter IV. Buddhānusmṛti: Different Aspects of Samādhi and Meditation on the Buddha's Virtues

This chapter defines the term “samādhi” with a series of synonyms. It then discusses some of the practices required for the proper practice of samādhi and expands on the theme of the qualities of a buddha that should be an object of meditation in samādhi.

(Translated in the present collection and by Rockwell.)

2. The Virtues that Accompany this Samādhi

Chapter V. Ghoṣadatta: Story of the Former Buddha Ghoṣadatta

This chapter introduces the former Buddha Ghoṣadatta and King Dṛḍhabala, both of whom will appear again in other chapters on the former existences of the Buddha (chapters XXXIII and XVII, respectively). The story, however, centers on King Mahābala, who received the teaching on the King of Samādhis from the Tathāgata Ghoṣadatta and,

through the practice of this samādhi, eventually became a tathāgatha named Jñānaśūra.

Chapter VI. Samādhi: Prerequisites for Samādhi

The various practices or virtues necessary for the practice of samādhi (*samādhi-parikarma*) are discussed in general terms.

(Translated by Rockwell.)

Chapter VII. Triṣāntyavatāra: The Three Levels of the Virtue of Patience

This chapter provides a categorization of “patience” (*kṣānti*) which is unique to this sūtra. The term is used in its broadest signification as meaning patience, composure, understanding, receptivity, etc.

(Translated by Rockwell.)

Chapter VIII. Abhāvasamudgata: Story of the Former Buddha Abhāvasamudgata

A former buddha called Abhāvasamudgata once delivered an inspiring sermon. Prince Mahākaruṇācintin was so moved by it that he retired from the lay life in order to practice the King of Samādhis. After many lifetimes, and as a result of the practice of this samādhi, the prince was reborn as a buddha called Suvicintitārtha.

The stanzas accompanying this story contain valuable philosophical material reinforcing the connection between the doctrine of emptiness and the practice of the samādhi.

(Translated by Régamey.)

Chapter IX. Gambhīradharmakṣānti: Receptivity to the Profound Dharma

This is a doctrinal chapter on emptiness and the various practices required of one seeking to master the samādhi and to attain enlightenment.

(Translated by Rockwell.)

C. Second Narrative Section

Chapter X. Purapraveśa: The Buddha Visits Candraprabha

Here the Buddha encourages Candraprabha to practice all of the requisites for enlightenment to their fullest extent. Candraprabha invites the Buddha to visit his home in Rājagṛha. The Buddha's entrance into the city is described in detail.

D. Again the Virtues of the Samādhi

Chapter XI. Sūtradhāraṇā: Preserving the Sūtra

In reply to Candraprabha's questions, the Buddha expounds further on the path. His discourse ends with a recommendation to memorize and preserve the sūtra. Such recommendations punctuate the text and are especially obvious in chapters XVIII, XXXII and XL, in which the main topic is the theme of transmission and preservation.

(Translated by Tatz.)

Chapter XII. Samādhyanuśikṣaṇā: Recounting the Virtues of the Buddha through the Practice of Samādhi

The Buddha's virtues and the state of mind that is the liberating samādhi are the same insofar as they are both ungraspable and empty. The chapter further addresses the bodhisattva's detachment.

Chapter XIII. Samādhinirdéśa: Explanation of the True Meaning of Samādhi

The true meaning of the King of Samādhis is the experience of emptiness.

E. The Narrative Resumes

1. Third Narrative Section

Chapter XIV. Smitasāṃdarśana: The Buddha's Smile

After a brief recasting of the theme of the previous chapter, Candraprabha recites the perfections mastered by the Buddha in his former

existences and makes a vow to become a buddha himself. Upon hearing this the Buddha smiles. Maitreya then asks about the meaning of the Buddha's smile.

Chapter XV. Smitavyākaraṇa: The Reasons for the Buddha's Smile

This chapter explains the reasons for the Buddha's smile. The Buddha predicts Candraprabha's enlightenment and his future name as a buddha, Vimalaprabha.

Chapter XVI. Pūrvayoga: Previous Existence of the Buddha as the Son of Matirāja

This chapter recounts the story of Prince Matirāja, who was Śākya-muni's incarnation at the time of the Buddha Śimhadhvaja. The prince was saved from an incurable disease by the recitation of the *Samādhirāja* by the reciter (*dharmabhāṇaka*) Brahmadata.

The Buddha predicts the future decay of the monastic life among certain monks.

2. Narrative Bridge

Chapter XVII. Bahubuddhanirhārasamādhimukha: Approaches to the Samādhi that Manifests Multiple Buddhas

The Buddha travels to the Vulture Peak to deliver a sermon. Once there, Candraprabha asks for an explanation of the dharmas required to attain the King of Samādhis. After enumerating and defining four of these dharmas, the Buddha recounts his previous lives as King Śiribala and as the son of King Dṛḍhabala. In stanzas 56–129 this chapter also repeats some of the terms enumerated in chapter I and defined in chapters XXXVIII and XXXIX.

Chapter XVIII. Samādhyanuparindana: Transmission of the Samādhi to Candraprabha

This is the first of the two "transmission" chapters (chapters XVIII and XL) and the third of the transmission passages. See also chapters II, XI, XXXII and XL.

F. Second Doctrinal Section

Chapter XXIX. Acintyabuddhadharmanirdeśa: Explanation of the Inconceivable Dharma of the Buddha

This chapter deals with the impossibility of conceiving the full nature of buddhas or their teachings.

(Translated by Régamey.)

Chapter XX. Indraketurdhvajarāja: Teachings of the Former Buddha Indraketu

This is an exposition of the teachings of emptiness and the paradox of teaching and preserving the Dharma with words.

G. Avadāna

Chapter XXI. Pūrvayoga: A Previous Existence

This chapter uses the *mise en scène* of two friends in a previous existence to expound upon the importance of virtuous friends. It is said in some manuscripts that this is the story of an incarnation of Dīpaṅkara and Śākyamuni before their meeting as buddha and future buddha.

H. Third Doctrinal Section

1. General Statements

Chapter XXII. Tathāgatakāyanirdeśa: Description of the Body of a Tathāgata

This chapter discusses the bodhisattva's detachment and the two bodies of a buddha, *rūpakāya* and *dharmakāya*.

(Translated by Régamey.)

Chapter XXIII. Tathāgatācintyanirdeśa: The Inconceivability of the Tathāgata

This is an exposition on the four kinds of "penetrating understanding" (*pratisamvid*) as a key to the nature of reality and buddhahood, and a discussion of their inconceivability.

Chapter XXIV. Pratisaṃvidavatāra: Approaches to Penetrating Understanding

This chapter develops the main theme of chapter XXIII.

Chapter XXV. Anumodanā: Rejoicing at the Merit of Others

This chapter concerns (1) the transfer to other beings of the merit of the aspiration toward buddhahood and (2) the merit of taking pleasure in the merit of others.

Chapter XXVI. Dānānuśaṃsā: The Value of Generosity

The practice of the virtue of giving generously and the fruits that result from such a practice are discussed in this chapter.

Chapter XXVII. Śīlanirdeśa: Explanation of the Virtue of Morality

This chapter describes the benefits of practicing a pure morality.

Chapter XXVIII. Daśānuśaṃsā: Ten Advantages

This chapter lists the ten advantages to be gained by each of ten different practices of the bodhisattvas. These practices are: (1) patience and benevolence; (2) energy; (3) meditation; (4) discernment; (5) learning; (6) preaching the Dharma; (7) mental cultivation of emptiness; (8) solitude; (9) retiring to the forest; and (10) living on alms.

2. The Virtues of this Samādhi

Chapter XXIX. Tejaguṇarāja: Previous Life of Śākyamuni at the Time of the Tathāgata Tejaguṇarāja

The Buddha uses the story of his life as King Dṛḥhadatta to recommend the life of the hermit to ruling monarchs. The chapter ends with a long passage praising the virtues of the samādhi.

Chapter XXX. Anuśaṃsā: Merits of the Samādhi

This chapter continues the last section of the previous chapter.

Chapter XXXI. Sarvadharmasvabhāvanirdeśa: Explanation of the Absence of an Essence in all Dharmas

This chapter discusses the sūtra's description of itself as the sūtra of the samādhi that produces the realization of the sameness of all things. The virtues of someone who masters this samādhi are explained in detail.

I. Preserving the Samādhirāja

Chapter XXXII. Sūtradhāraṇānuśāsā: The Value of Preserving the Sūtra

This chapter first discusses the prerequisites for the full knowledge (*mahābhijñā*) of enlightenment, and then fully details the ungraspable character of this experience and its expressions. Finally, the sūtra itself is praised as an embodiment of the knowledge of buddhas and bodhisattvas. This chapter explores several topics which on the surface appear to be quite distinct, but probably should be understood to be connected through the equation sūtra = samādhi = śūnyatā.

J. Narrative Section: Avadānas

1. The Bodhisattva's Perfect Generosity and Sacrifice of Self: Doctrinal Points Illustrated with Exemplary Stories

Chapter XXXIII. Kṣemadatta: The Story of Buddha as Kṣemadatta

The previous incarnation of Śākyamuni as Kṣemadatta, a disciple of Buddha Ghoṣadatta, is recounted. This took place at the time of King Śrīghoṣa, a previous birth of Maitreya. Kṣemadatta showed his dedication and renunciation by burning his right hand.

(Partly translated by Filliozat.)

Chapter XXXIV. Jñānavatī: The Story of Jñānavatī

To illustrate the true practice of unattached giving, Śākyamuni tells the story of Jñānavatī, daughter of King Jñānabala who reigned at the time of Buddha Acintyapraṇidhānaviśeṣasamudgatarāja. She cut a piece of her own flesh and offered it as food to a monk named Bhūtamati who was ill and in need of nourishment. Unaware of its origin, the monk ate

the meat and was cured. After several subsequent existences of intense practice, Jñānavatī became a male at the time of Buddha Dīpaprabha. Bhūtamati was later reborn as Dīpaṅkara, Jñānabala as Maitreya, and his daughter Jñānavatī as Śākyamuni.

(Partly translated by Weller.)

Chapter XXXV. Supuṣpacandra: The Story of Supuṣpacandra

This chapter contains an *avadāna* reminiscent of the “Kṣāntivādin-avadāna” of the *Jātakamālā*.¹⁴ It is the story of Padmottara Buddha when he was reborn as the reciter of the Dharma (*dharmabhāṅaka*) Supuṣpacandra, at the time of Buddha Ratnapadmacandraviśuddhābhudgatarāja. At that time Śākyamuni was a jealous king called Śūradatta who, upon seeing Supuṣpacandra’s success in converting the ladies of his court and harem, suspected him of having dishonest intentions and had him killed. Unlike other stories of the genre, this one does not end with the bodhisattva’s miraculous recovery or return to life.

The main narrative of this chapter is quoted by Prajñākaramati in his *Bodhicaryāvatāra-pañjikā*, with the notation *Supuṣpacandrasya itivṛttake*.¹⁵

K. Praise of the Samādhirāja

Chapter XXXVI. Śīlaskandhanirdeśa: Explanation of the Element of Morality in the Path

The title of this chapter is deceptive. Only a few introductory lines refer to the theme of the constituents of morality. Most of the chapter consists of sixty-nine stanzas on the merit of preserving and reciting this sūtra.

L. The Power of Virtue: Another Avadāna

Chapter XXXVII. Yaśaḥprabha: Previous Life of Śākyamuni as Yaśaḥprabha

At the time of Buddha Gaṇeśvara there were many corrupt monks who did not practice the true Dharma and resented those who did. The king Varapuṣpa was a devout disciple of the Buddha and had as spiritual guide a monk named Yaśaḥprabha. The latter’s virtue provoked envy among the less virtuous monks, but they could not harm him because he

was protected by one of the king's sons. The latter was Puṇyamati Bodhisattva, who would later become Maitraka Buddha. His father, King Varapuṣpa, would become Padmottara Buddha (see chapter XXXV).

M. Terminological Review

Chapter XXXVIII. Kāyavāṇmanaḥsaṁvara: The True Meaning of Restraint of Body, Speech and Mind

This chapter explains the meaning of self-restraint in Mahāyāna terms. It can be construed as a development of the first three of the "three hundred words" listed in chapters I and XVII as attributes or virtues of the King of Samādhis.

Chapter XXXIX. Padatṛisatanirdeśa: Explanation of the Three Hundred Terms

This chapter attempts to define most of the remaining terms from the lists in chapters I and XVII.

N. Coda: Transmission

Chapter XL. Parīdanā: Transmission

This chapter follows the traditional themes of the "transmission" section of a sūtra.

2.5 Characteristics of Style and Structure

In many ways the *Samādhirāja* follows the traditional stylistic and structural model of most Mahāyāna sūtras. The text is loosely held together and there is no obvious overarching thread of argument. Still, it would be inaccurate to limit a description of the text to those features that are common to the genre. Furthermore, the text cannot be explained as a simple expansion of the outline laid down in the introductory chapter (*nidāna*). The sūtra is not a recasting, by repetition and enumeration, of this catechetical list. To accept such descriptions as exact and complete one would have to ignore the bulk of the text—its argumentative, expository and narrative elements.

Our understanding of the function and meaning of Mahāyāna sūtras, as well as our knowledge of their role in the religious life of the community (*Sitz im Leben*), is still imperfect. The *Samādhirāja* certainly does not fit the stereotypes that are often used to explain the peculiarities of sūtra style. This sūtra shows some of the stock phrases that recur in the genre, but it is difficult to see how these repetitions and their purported mnemonic function could explain the most distinctive features of our text. In this sūtra the expository and the formulaic clearly interact with a narrative frame.

As far as literary form is concerned, the *Samādhirāja* is written in mixed prose and verse. In general, these differences in form are not significant. At times the prose provides only a preliminary, and often unnecessary, setting or explanation for the verse. The latter sometimes repeats the prose or, at best, continues the thread of the narrative or the argument with no transparent stylistic purpose. The verse is of mixed quality, but for the most part it is of some aesthetic merit, though never classical in style or form. For the most part figures of speech in the sūtra fit the categories described by Georg von Simson in his study of the so-called Sanskrit Canon.¹⁶

In terms of theme and style, the sūtra can be divided into three classes of passages. First, the main narrative or backbone of the text, that is, the events surrounding the Buddha's meeting with Candraprabha. Only five chapters—I, X, XIV, XV and XL—are dedicated to this narrative theme. Also in a semi-narrative style are the *avadānas* or *pūrvayogas* inserted throughout the sūtra—chapters II, V, VIII, XVI, XX, XXI, XXIX, XXXIII, XXXIV, XXXV and XXXVII. This leaves the bulk of the text (twenty-four chapters) for expository prose and verse.

The *Samādhirāja* weaves into its plot a great number of traditional themes, stock phrases and idioms, many of which are common to non-Mahāyāna Buddhist literature as well. In the first four chapters alone we count the following (page and line numbers refer to Vaidya's edition):

1. formulae establishing the setting of sūtras (*nidāna*):
 - a. opening formula and description of the assembly (1.1-22):
evam mayā śrutam . . .
 - b. the formula to introduce the interlocutor (2.5-9): *tena khalu punaḥ samayena tasminn eva parśatsamnipāte . . .*
 - c. the formula of salutation and questioning (2.9-16): *prccheyam aham . . .*

2. the Dharma that is good in the beginning, the middle and the end (2.3-4): *dharmam deśayati sma ādau kalyāṇam madhye kalyāṇam ...*
3. the single dharma that summarizes all teachings and practices (3.21-25): *ekadharmeṇa ... samanvāgato bodhisattvo mahāsattvaḥ ...*
4. a great number of those present attain realization (7.8-14): *asmin khalu punaḥ ... dharmaparyāye bhagavatā bhaṣyamāne ...*
5. portents: an earthquake at the end of the Buddha's sermon (7.14-24): *ayam ca trisāhasramahāsāhasro lokadhātuḥ ṣaḍvikāram kampitaḥ ...*
6. a buddha's former existence (8.3-10): *smarami ... purimabhava ...* Also 310 (app. I, no. 4): *ye smarāmy aham anekāni kalpakotiṇiyutāsatasāhasrāni ...*
7. epithets of a buddha (13.8-9 and 13.10-19): *tathāgato 'rhan samyak sambuddhaḥ ...*
8. traditional idiom to request and formulate a definition (19.1-3): *samādhiḥ samādhir iti bhagavann ucyate, katam asya etad dharmasya adhivacanam samādhir iti ... samādhiḥ samādhir iti kumārocyate yad uta cittasya nidhyaptiḥ.*
9. formulae to introduce *gāthās* (2.17-18, 3.26 and 8.1-2): *atha khalu ... tasyām velāyām ... gāthābhir adhyabhaṣata; atha khalu ... tasyām velāyām ... bhūyasya mātrayā gāthābhigītena vistareṇa samprakāśayati sma.*
10. formulae associated with recommendations for the future preservation and spread of the doctrine (*parīndanā* formulas):
 - a. how the sūtra should be preserved and communicated to others (13.4-6 and 16.9-10): *udgrahītavyaḥ paryavāptavyo dhārayitavyaḥ ...*
 - b. the purpose of preserving and spreading the teaching—the good of many beings (16.10-12): *bahujanahitāya bahujanasukhāya lokānukampāyai ...*

3. The *Samādhirāja* in Buddhist Literature

3.1 *The Samādhirāja and the Madhyamaka*

The central role played by Buddhist philosophy in the development of the tradition itself, and then later in the development of western understanding of Buddhism, tends to affect our perception of Buddhist sūtras. It is therefore customary to ask about the scholastic affiliation of any given Mahāyāna sūtra. The *Samādhirāja*, for instance, has been identified consistently with the Madhyamaka tradition. Similar efforts have been made with regard to the *Vimalakīrti* and the *Heart Sūtra*, among others.¹⁷

Régey has shown, however, that the *Samādhirāja* cannot be considered a clear representative of a single philosophical tradition.¹⁸ The sūtra's doctrinal position cannot be described accurately as unambiguously Mādhyamika, or even as pure *śūnyavāda*. That is to say, one would find it difficult to show that the sūtra is the product of, or a legitimate representative of, Mādhyamika circles. Still, it is obvious that the sūtra was considered highly authoritative by Mādhyamika scholastics and ignored by Yogācāra authors.

In spite of its clearly defined philosophical position, the *Samādhirāja* does not fit our stereotype of a sectarian document. It is difficult to set it in a specific sectarian context with any degree of historical certainty. Furthermore, in terms of religious types it is eclectic and universalistic, so that it would be pointless to attempt to box it in some general category. It makes room for more than one dimension of Buddhist religion: meditation, worship of the Buddhas, the cult of the Book, philosophical speculation, rehearsal of myth (in *avadāna* style) and so on.

At the present stage of our knowledge of the history of Mahāyāna sūtra literature, we can only say that the *Samādhirāja* played an important role as a "proof text" for the Madhyamaka. But it seems unlikely that the text was composed with such a role in mind. It would be more accurate to say that it was conceived as a representative text of general doctrine, with a strong leaning towards a philosophic position that can be described as akin to that of the Madhyamaka. Because of its comprehensive, almost encyclopedic, character, it offered a wider range of ideas from which to quote than did other texts. In this sense, perhaps only a general statement such as the one made by Nalinaksha Dutt in the last volume of his edition of the *Samādhirāja* would do justice to the text:

Śāntideva in his *Śikṣāsamuccaya* utilized [extracts from the sūtra to illustrate] the ethical teachings of Māhāyāna Buddhism while Candrakīrti drew support for the thesis of Nāgārjuna from the highly philosophical verses. This text evidently contains the cream of both ethical and philosophical teachings of Mahāyāna Buddhism.¹⁹

Still, there is another way to express the relationship between the *Samādhirāja* and the Madhyamaka. The Madhyamaka in general can be regarded as a viable exegesis of the sūtra. Candrakīrti quotes it so frequently in his *Prasannapadā* that one can construe many of his comments on Nāgārjuna's *Kārikās* as comments on the sūtra, at least in the sense that they place the sūtra within a wider interpretive context.

However, this approach does not solve the problem we face due to the lack of classical sources that would help us understand the text in its earliest contexts, outside the framework of later Mahāyāna scholasticism. We have neither early commentaries nor related sūtras of proven contemporaneity to rely on for a trustworthy interpretation. Furthermore, the Madhyamaka tends to emphasize only certain aspects of the rich thought and imagery of the sūtra. Some scholastics, like Śāntideva, went beyond the philosophical framework, but even they were not concerned or interested in the text as a whole or as an independent statement.

3.2 The Samādhirāja as Quoted in Mahāyāna Literature

As mentioned above, the *Samādhirāja* is often quoted in the works of the Madhyamaka masters, but it is generally ignored by the Yogācāra tradition. Among the works in which the text is quoted, the following have been identified.²⁰ There are undoubtedly many others that could be cited.

I. Candrakīrti:

In the *Prasannapadā Madhyamaka-vṛtti* the sūtra is cited as *Samādhirāja*, *Ārya-Samādhirāja-Bhaṭṭāraka*, or simply with the words *mahāyāna-sūtreṣu*, *tathā*, etc.:

Sr unidentified prose passage in Cecil Bendall, ed., "Subhāṣita-Saṅgraha (suite)." *Le Muséon*, n.s. 5 (1904): 36.7-13.²⁹

3.3 Classical Commentaries on the Samādhirāja

As observed above, it is difficult to regard the Mādhyamika use of this sūtra as exegetical, that is to say, in most of the passages listed in section 3.2 the *Samādhirāja* is used as a source for "proof texts," not as the primary object of scriptural interpretation. The frequency of quotation from the text in the literature of the Mādhyamika is remarkable, but we are not in a position to determine the exact historical significance or possible ramifications of this fact. At any rate, we must wait for further research on the text before assuming a direct connection between the sūtra and the philosophical schools.

The tradition itself is sparing in exegetical clarification. Only one extant commentary is devoted exclusively to the *Samādhirāja*, and it is quite late. This exegetical work is preserved in the Tibetan Tanjur (Tōh 4010; P 5511) under the title *'Phags-pa chos thams-cad-kyi rang-bzhin mnyam-pa-nyid rnam-par spros-pa'i ting-nge-'dzin-gyi rgyal-po shes bya-ba theg-pa chen-po'i mdo'i 'grel-pa grags-pa'i phreng-ba zhes bya-ba*, or, in Sanskrit *Ārya-Sarvadharmasvabhāvasamatāvīpañcitasamādhirājā-nāma-mahāyāna-sūtra-ṭīkā-kīrtimālā-nāma*, or *Kīrtimālā*, for short. This is the work of Mañjuśrīkīrti, a tantric author about whom very little is known.

The Ldan-dkar catalogue lists a rather short (600 ślokas, 2 bam po) commentary to the sūtra under the title *Ting-nge-'dzin-gyi rgyal-po chos nyid zab-mo'i 'grel-pa*, but nothing is said about the author, and the work does not seem to be extant.

4. Classical Translations

4.1 Chinese Translations

According to the *K'ai-yüan shih-chiao lu*, the earliest translation of the *Samādhirāja* into Chinese was that of An Shih-kaio. Unfortunately

it is now lost.³⁰ If the attribution of this translation to An Shih-kao is correct, it allows us to fix a *terminus a quo* for the sūtra of ca. 150 C.E.

Only one complete classical translation into Chinese is extant—the *Yüeh-teng san-mei ching* in 120 scrolls (*chüan*), translated by Narendrayāśas.³¹ This translation was completed in 557 C.E. in the T'ien-ping Monastery in Shang-chou. On first analysis this translation seems to be based on an original closely related to the Gilgit recension, but the textual history of Narendrayāśas's translation is not clear. Citations in the Chinese catalogues are inconsistent, in some instances describing the translation as consisting of 11, sometimes of 10, scrolls.³² One would like to think that these variations merely reflect variations in the dimensions of the scrolls in which the sūtra was transmitted, and not recensions of varying lengths.

The translation of Hsien Kung of the Liu-Sung dynasty, also titled *Yüeh-teng san-mei ching*, corresponds to the first part of scroll 6 in the ten-scroll version. Another translation by Hsien Kung, extant under the same title, was preserved only in the Kao Li edition of the Chinese Buddhist Canon, and corresponds to the latter part of scroll 5 of Narendrayāśas's version, excluding the verse portion.³³

Synoptic Table

All three of these texts are found in several of the Chinese Tripiṭaka collections now in circulation:

- Taishō 639 (XV) 549a–620a = *Shukusatsu Zōkyō* 3:10 = *Manji Zōkyō* 10:3 = *Tripitaka* (Koreana) 181.
 Taishō 640 (XV) 620a–623b = *Shukusatsu Zōkyō* 3:10 = *Manji Zōkyō* 10:4 = *Tripitaka* (Koreana) 182.
 Taishō 641 (XV) 623b–629b = *Shukusatsu Zōkyō* 3:10 = *Manji Zōkyō* 10:4 = *Tripitaka* (Koreana) 183.

4.2 Tibetan Translation

Only one Tibetan translation is extant. It appears in the Mdo section of the Kanjur under the title *'Phags-pa chos thams-cad-kyi rang-bzhin mnyam-pa-nyid rnam-par spros-pa ting-nge-'dzin-gyi rgyal-po zhes bya-ba theg-pa chen-po'i mdo* (P 795 and Tōh 127). The sūtra was translated by Śilendrabodhi and Dharmatāśīla. The Ldan-dkar catalogue shows the work under the present title (no. 77), and gives its size as

15 bam po and 4,500 ślokas—a bit shorter than the present Tibetan version, if the number of bam po is to be taken as an exact measurement. The text was likely translated into Tibetan in the eighth or early ninth century. We give the references only to the most commonly used xylographic editions of the Kanjur.

Synoptic Table

- Peking 795: *Mdo Sna-tshogs, thu*, 1a1-185a7.
 Narthang 114: *Mdo-sde, ta*, 1b1-273b5.
 Derge 127: *Mdo-sde, da*, 1b1-170b7.
 Lhasa 129: *Mdo-mang, ta*, 1a1-269b4.
 Cone 768: *Mdo-mang, da*, 1b1-200a6.

5. Modern Research on the *Samādhirāja*

5.1 Textual Materials

5.1.1 Extant Manuscripts and Modern Editions

The Sanskrit text of the *Samādhirāja* is extant in manuscripts from only two locations in the South Asian subcontinent—Gilgit, in what is now Pakistan, and the Kathmandu Valley in Nepal. From the former site only one badly damaged manuscript has been unearthed, but it clearly represents the earliest extant redaction. Various manuscripts have been recovered from Nepal and are now kept in museums and archives in Kathmandu, Calcutta, Tokyo, Paris and Cambridge. Unfortunately, no modern editor has had direct access to all the extant manuscripts.

The Gilgit manuscript presents the oldest and clearly least developed redaction. It is also very similar to the single surviving complete Chinese translation. The manuscript of the Buddhist Text Society in Calcutta represents the most expanded version, and the manuscript of Hara Prasad Shastri the one closest to the Tibetan translation. Other manuscripts in Nepalese collections remain to be investigated.

The text of the *Samādhirāja* was first published in 1896 by Rai Sarat Chandra Das and Harimohan Vidyabhushan through the Buddhist Text Society of Calcutta. This edition was based on a single very defective

manuscript from the Hodgson Collection. A major lacuna extended from the beginning of chapter XII to the middle of chapter XV. The printed edition added some mistakes of its own. Lastly, publication of this edition was interrupted halfway, in the middle of chapter XVI.

Constantin Régamey, with the intention of eventually publishing the complete text of the sūtra, edited and translated into English chapters VIII, XIX and XXII, basing his text on three manuscripts from the Bibliothèque Nationale in Paris (Fonds Sanskrit 143, 144/145 and 146), and the Cambridge manuscript (Add. 916).³⁴ His manuscripts were very imperfect, but he tried to compensate for this by consulting the Tibetan translation of Mañjuśrīkīrti's commentary *Kīrtimālā* and comparing the Sanskrit text of the three chapters with their Tibetan translations.

Régamey's work could not profit from the discovery of the Gilgit manuscript in 1930, as this valuable source would not be published for another decade. Nalinaksha Dutt made public the first part of his edition of the Gilgit manuscripts in 1941. His edition of the *Samādhirāja* was produced by consulting not only the unique Gilgit manuscript but also the Tibetan translation, the Buddhist Text Society manuscript and a manuscript found in Nepal by Hara Prasad Shastri.

Thanks to the availability of the manuscript material in a facsimile edition published by Lokesh Chandra, Dutt's edition can now be subjected to critical examination. For the first sixteen chapters, and for the first half of chapter XVII, the Gilgit manuscript is badly damaged. The left side of every folio is either damaged or lost, resulting, on the average, in the loss of 10 to 14 akṣaras at the beginning of every line. This means that a considerable portion of the text is missing. Dutt supplied the missing portions on the basis of what are clearly later recensions—the Nepalese manuscripts and the Tibetan translation.

Accordingly, Dutt's edition is wanting in more than one respect. It is, unfortunately, at its best a conflation of manuscripts, at its worst a reconstruction from the Tibetan. Dutt tried to fill in the gaps in the Gilgit text, apparently largely on the basis of the text of the Nepalese manuscripts. However, it is clear that the text preserved in the Gilgit manuscript represents a redaction considerably different from that found in the Nepalese manuscripts, and the redactional differences are by no means limited to the addition or omission of material. There are frequent variations in wording, construction and overall thematic development. Dutt's edition obscures or ignores these differences. He conflates a redaction that is probably from the fifth or sixth century with the eighteenth- and nineteenth-century Nepalese redaction. Because of Dutt's frequent carelessness in using brackets, it is often impossible to distinguish between what is in the Gilgit manuscript and what is in fact

Dutt's "reconstruction." It appears that, with very little consistency, he uses more than one criterion to emend or to fill in lacunae. Sometimes he adopts a reading from his Nepalese manuscript, ignoring the distinct character of the Gilgit redaction, while on other occasions he follows the Tibetan. On still other occasions, he adopts a conjectural reading without due annotation.

Equally problematic is the more recent edition of P. L. Vaidya, published in 1961. While this is essentially a copy of Dutt's edition, the editor claims in his introduction that he has made "such modifications as they [sic] seemed to be necessary in view of modern trends in textual criticism."³⁵ It is not clear what this expression means, but Vaidya has omitted all the brackets which Dutt—not always consistently—used to mark his reconstructions. Vaidya prints Dutt's reconstructed "Gilgit" version, and places those passages from the Nepalese manuscripts which are not found in the Gilgit text in an appendix at the end of his edition. The reason offered for the latter decision is that these passages are "not supported by the unanimity of [the] manuscripts and [the] Tibetan translation."³⁶

A more rigorous task has been accomplished by Seiren Matsunami, who has thus far published seven chapters of the text.³⁷ His is an edition of the Nepalese redaction, unfortunately based on only three Nepalese manuscripts kept at the Library of the University of Tokyo (nos. 424, 425 and 426 in Matsunami's own catalogue).³⁸ Matsunami also cites the variants from the Gilgit text, carefully keeping them apart from the Nepalese materials by citing them in a separate critical apparatus.

The following bibliographic sections provide a chronological listing of the available editions, translations and studies of the sūtra.

5.1.2 Bibliography of Editions

1896 Rai Sarat Chandra Das and Pandit Harimohan Vidyabhushan, eds. *Samādhirāja-sūtram: One of the Earliest Buddhist Scriptures, Written in Sanskrit and Gatha Language*. Fasc. 1. Calcutta: Buddhist Text Society.

Only the first fascicle was published. It was reprinted in Shanghai in 1940.

1938 Konstantin (Constantin) Régamey, ed. and trans. *Three Chapters from the Samādhirājasūtra*. The Warsaw Society of Sciences and Letters. Publications of the Oriental Commission,

no. 1. Warsaw: Nakładem Towarzystwa Naukowego Warszawskiego Wydane Zasiłkiem Kasy Im. Mianowskiego.

Critical edition of the Sanskrit and Tibetan, and English translations of chapters VIII, XIX and XXII.

- 1941-** Nalinaksha Dutt, ed. *Gilgit Manuscripts*. Vol. II, pts. 1-3:
54 Srinagar and Calcutta: J. C. Sarkhel at the Calcutta Oriental Press.

Pagination of the edition is continuous throughout the three parts.

- 1961** P. L. Vaidya, ed. *Samādhirājasūtram*. Buddhist Sanskrit Texts, no. 2. Darbhanga: The Mithila Institute.

Essentially a copy of Dutt.

- 1972** Mark Tatz. "Revelation in Mādhyamika Buddhism." M.A. thesis. University of Washington.

Contains an edition of the Tibetan and English translation of chapter XI. Not seen; referred to in Rockwell 1980.

- 1975** Seiren Matsunami 松濤誠廉, ed. *Bonbun Gattō Zanmai kyō* 梵文月燈三昧經. TDKK 60 (1975): 244-188. Also *Bonbun Gattō Zanmai kyō (II)* 梵文月燈三昧經 (II). TDKK 61 (1975): 796-61.

Chapters I-IV are contained in the first of these installments, chapters V-VII in the second.

- 1979** G. Bongard-Levin, ed. "A New Fragment of the Sanskrit Samādhirājasūtra from Central Asia." *Sanskrit and Indian Culture*. Articles and Papers Presented by the Soviet Scholars to the Fourth World Sanskrit Congress, Weimar, GDR, 23-30 May 1979. Moscow: N.p., 62-72.

In Russian. English summary on page 252. Includes facsimile of the fragment—a single folio corresponding to Dutt and Vaidya chapter XVII, vss. 3-16.

- 1980** John Rockwell, Jr. "Samādhi and Patient Acceptance: Four Chapters of the *Samādhirāja-sūtra* Translated from the San-

skrit and Tibetan." M.A. thesis. The Naropa Institute, Boulder, Colorado.

Tibetan edition and English translation of chapters IV, VI, VII and IX, along with English translation of the *Kīrtimālā* commentary on those chapters.

5.2 Bibliography of Translations³⁹

- 1930** Taiun Hayashi 林岱雲, trans. *Gattō Zanmai kyō* 月燈三昧經. In *Kokuyaku Issaikyō*: Kyōshū-bu, I 國譯一切經·經集部一. Tokyo: Daitō shuppansha, 1-211.

This was the first modern translation of the sūtra. It is a complete rendering into Japanese of Narendrayāśas's Chinese version. Though still of some value, this work was carried out in the *koku-yaku* style of translation and cannot be regarded as a translation of interpretive significance.

- 1938** Constantin Régamey, ed. and trans. *Three Chapters*. See 5.1.2.

This was the first translation into a western language of any part of the *Samādhirāja*. Contains an English translation of chapters VIII, XIX and XXII.

- 1963** Jean Filliozat. "La mort volontaire par le feu et la tradition bouddhique indienne." JA 251: 21-51.

Contains a translation of most of chapter XXXIII.

- 1972** Mark Tatz. "Revelation in Mādhyamika Buddhism." See 5.1.2.

Contains a translation of chapter XI.

- 1973** Friedrich Weller. "Der arme Heinrich in Indien." OLZ 68: 437-48.

Contains a translation of most of chapter XXXIV.

1974

Mitsuhara 1974a. Keinosuke Mitsuhara 蜜波羅圭之介.⁴⁰ “*Sanmai-ō kyō no Kenkyū* (1): *Kyōhonbun narabi ni Chibettogoyaku no Chūshakusho: Shōman (Kīrtimālā) no Wayaku: Dai 1 shō*” 三昧王經の研究 (1): 経本文並びに西藏語訳の注釈書・称鬘(*Kīrtimālā*)の和訳・第1章. *Kōyasan Daigaku Ronsō* 9.

Japanese translation of chapter I of Sr and the *Kīrtimālā* commentary upon it.

Mitsuhara 1974b. Keinosuke Mitsuhara. “*Sanmai-ō kyō (Samādhirājasūtra) to sono Chūshakusho: Dai 2 shō no Wayaku*” 三昧王經(*Samādhirājasūtra*)とその注釈書・第2章の和訳. *Bukkyōgaku Kaihō* 6.

Japanese translation of chapter II of Sr and the *Kīrtimālā* commentary upon it.

1975

Mitsuhara 1975. Keinosuke Mitsuhara. “*Sanmai-ō kyō no Kenkyū* (2): *Kyōhonbun narabi ni Chibettogoyaku no Chūshakusho: Kīrtimāra (Kīrtimālā, Shōman) no Wayaku: Dai 2-3 shō*” 三昧王經の研究 (2): 経本文並びに西藏語訳の注釈書・キールティマーラー(*Kīrtimālā*, 称鬘)の和訳・第2-3章. *Kōyasan Daigaku Ronsō* 10.

Japanese translation of chapters II and III of Sr and the *Kīrtimālā* commentary upon them.

Tamura and Ichigō 1975. Chijun Tamura 田村智淳 and Masamichi Ichigō 一郷正道. *Sanmai-ō kyō* 三昧王經. 2 vols. Daijō Butten 10 and 11. Tokyo: Chūōkōronsha.

This is a modern Japanese translation (*gendaigo-yaku*) of chapters I-XXXVII, based on the text of Dutt's edition. Volume 1 includes chapters I-XIX, translated by Tamura, and vol. 2 chapters XX-XXXVII, translated by Tamura and Ichigō.

- 1977 Hōshū (Keinosuke) Mitsuhara 蜜波羅鳳洲 . “*Sanmai-ō kyō* no Kenkyū (3): Kyōhonbun narabi ni Chibettogoyaku no Chūshakusho: *Kīrutimāra* (*Kīrtimālā*, *Shōman*) no Wayaku: Dai IV shō” 三昧王經の研究 (3): 經本文並びに西藏語訳の注釈書・キールティマーラー (*Kīrtimālā*, 称鬘) の和訳・第IV章. *Mikkyō Bunka* 119: 96-81

Japanese translation of chapter IV of Sr and the *Kīrtimālā* commentary upon it.

- 1980 John Rockwell, Jr. “Samādhi and Patient Acceptance.” See 5.1.2.

Contains an English translation of chapters IV, VI, VII and IX and the *Kīrtimāla* commentary upon them.

5.3 Bibliography of Studies

- 1930 Taiun Hayashi, trans. *Gattō Zanmai kyō*. See 5.2.

The earliest modern study of the Sr was Hayashi's introduction to his translation of Narendrayāśas's Chinese version. The introduction, “*Gattō-zanmai kyō* Kaidai,” is on pages 1-18. This essay is, of course, primarily an analysis of the Chinese text.

- 1938 Constantin Régamey, ed. and trans. *Three Chapters*. See 5.1.2.

The only modern study of any length of the Indian text of the sūtra.

- 1941-Nalinaksha Dutt, ed. *Gilgit Manuscripts*. See 5.1.2.

54 In the introductions to the three volumes of his edition of the Gilgit MS, Dutt considers some of the most important issues in the study of the sūtra.

- 1963 Jean Filliozat. “La mort volontaire.” See 5.2.

Deals with chapter XXXIV as an account of Buddhist ritual self-immolation.

1966

Hachiriki 1966. Hiroki Hachiriki 八力広喜. "Purasannapadā no Inyō-kyōten (Ichi)—Toku ni *Samādhirājasūtra* ni tsuite" プラサンナアパダーの引用経典 (一)・特に *Samādhirājasūtra* について. IBK 14.2 (28): 649-45.

Analysis of various scriptural references in Pras, especially those from the Sr. The article discusses the differences between the verses cited in Pras and the variants in the MSS of the sūtra.

Murakami 1966a. Shinkan Hirano (Murakami) 平野真完.⁴¹ "*Samādhirājasūtra* no Honbun-hattatsu ni tsuite" *Samādhirājasūtra* の本文発達について. IBK 14.2 (28): 653-50.

Considers the textual history of the sūtra in terms of several interpolations or additions. Also, in nn. 7 and 8 this article gives references to most of the occurrences of Sr passages in Pras and Śikṣ.⁴²

Murakami 1966b. Shinkan Hirano (Murakami). "*Gattō-zanmai kyō* ni okeru Budda-kan" 月燈三昧経における仏陀観. NBGN 31: 105-20.

Discusses the sūtra's conception of the Buddha.

Murakami 1966c. Shinkan (Hirano) Murakami 村上真完. "*Samādhirājasūtra* Kenkyū, 1, 17, 38-39—shō no Hikaku-taishō" *Samādhirājasūtra* 研究, 1, 17, 38-39—章の比較対照. *Hachinohe Kōgyō Kōtō Senmon-gakkō Kiyō* 1: 65-80.⁴³

This article examines the lists of terms in chapters I, XVII and XXXVIII-XXXIX of the sūtra.

1967

Mitsuhara 1967. Keinosuke Mitsuhara. "*Gattō-zanmai kyō* ni okeru Gokei-henka no Ichi-kōsatsu" 月燈三昧経における語形変化の一考察. IBK 15.2 (30): 879-75.

Discusses several phonological and metrical problems in the Sanskrit text of the sūtra.

Mitsukawa 1967. Toyoki Mitsukawa 光川豊藝. "Prasannapadā ni mirareru *Gattō-zanmai kyō*; Sono Inyōmen ni okeru Naiyō-kentei" *Prasannapadā*に見られる月燈三昧經・その引用面における内容検討. IBK 15.2 (30): 715-19.

Discusses the necessity and the purpose of the sūtra quotations in Pras.

Murakami 1967a. Shinkan Murakami (Hirano). "Samādhirājasūtra no Goi Kenkyū" *Samādhirājasūtra*の語彙研究. *Hachinohe Kōgyō Kōtō Senmon-gakkō Kiyō* 2: 72-109.

Offers a concise concordance to some of the most important technical terms in the sūtra, especially in chapters I and XXXVIII-XXXIX.

Murakami 1967b. Shinkan Hirano (Murakami). "Samādhirājasūtra Dai-issō to Dai-jūshichi-shō, Dai-sanjūhachi-sanjūkyū-shō" *Samādhirājasūtra* 第一章と第十七章, 第三八—三九章. IBK 15.2 (30): 711-14.

A general discussion of the relationship between chapters I, XVII and XXXVIII-XXXIX.

Murakami 1967c. Shinkan Hirano (Murakami). "Gattō-zanmai kyō ni okeru Kai no mondai" 月燈三昧經における戒の問題. NBGN 32: 47-65.

Discusses the concept of *śīla* in the Sr.

1968

Mitsuhara 1968. Keinosuke Mitsuhara. "Gattō-zanmai kyō ni okeru Renjō (*Sandhi*) no Ichi-kōsatsu—Gairenjō -ēa- ni tsuite" 月燈三昧經における連声 (*Sandhi*) の一考察・外連声 -ēa-について. IBK 16.2 (32): 921-17.

A study of five types of external sandhi in the sūtra.

Muramaki 1968. Shinkan Murakami (Hirano). “*Samādhirājasūtra no Seiritsu ni tsuite*” *Samādhirājasūtra の成立について*. IBK 16.2 (32): 833-36.

Further notes on the history of the composition or compilation of the sūtra. The author tries to establish the date of completion of the compilation on the basis of Chinese materials. He also identifies chapter XXXIV (“*Jñānavatī-parivarta*”) with the *Yüeh-ming p'u-sa ching* translated by Chih Ch'ien, ca. C.E. 253 (T 169 [III] 411a-c).

1972 Keinosuke Mitsuhara. “*Gattō Zanmai kyō no Geju ni okeru konkō sansukuritto no ichi kōsatsu: On'in to Renjō*” 月燈三昧經の偈頌における混淆サンスクリットの一考察・音韻と連声. *Tōhoku Indogaku Shūkyōgakkai Ronshū* 3.

A study of the hybrid Sanskrit of the verses of the Sr.

1973 Fredrich Weller. “Der arme Heinrich in Indien.” See 5.2.

Discusses a universal folk motif as contained in chapter XXXIV.

1977 Gregory Schopen. “*Sukhāvati as a Generalized Religious Goal in Sanskrit Mahāyāna Sūtra Literature.*” IJ 19: 185-208.

Pages 189-94 discuss the references to Sukhāvati and Amitābha in the Sr; pages 202-4 summarize the discussion concerning the date of the text; pages 207-8, appendix II, describe the Gilgit MS of the Sr.

1983 Hōshū (Keinosuke) Mitsuhara. “*Indorakīra (indrakīla) kō: Sanmai-ō kyō Dai X shō Seiritsu no ichi kōsatsu*” インドラキーラ (*indrakīla*) 考: 「三昧王經」第 X 章成立の一考察. In *Nakagawa Zenkyō Sensei Shōtoku Kinen Ronshū: Bukkyō to Bunka* 中川善教先生頌徳記念論集・仏教と文化. Kyoto: Dōbōsha shuppan, 183-99.

A study of the composition and dating of chapter X of the Sr based on an examination of the term *indrakīla*.

Translation of the King of Samādhis

CHAPTER I

The Setting

(Du 6, Ma 234, Va 1)¹ Thus I heard on one occasion when the Blessed One was staying in Rājagṛha, on the Vulture Peak, together with a large community of monks, with a full hundred thousand monks, (Du 7) and with eighty million bodhisattvas.²

And all these bodhisattvas were bound to only one more birth; they were well known for their extraordinary faculties (*abhiññā*), and had assembled from world spheres in all the ten directions. They had mastered the dhāraṇīs and the sūtras; (Du 8) they satisfied all beings through the gift of Dharma; they were skilled in giving expression to the knowledge of their great extraordinary faculties; they had arrived at the fullest perfection of all the perfections and were skilled in all the states of samādhi and meditative attainments (*samāpatti*) of the bodhisattvas. They had been praised, eulogized and celebrated by all the buddhas; they were skilled in advancing through all buddhafiels. They were skilled in recognizing all of Māra's attempts to instill fear; they were skilled in knowing all dharmas as they are, in knowing the superior or inferior faculties of all beings, and knowing what is necessary for the worship of all buddhas. They were unsoiled by any of the dharmas of the world, fully ornamented in body, speech and mind, armed with the armor of great friendliness and great compassion, and possessed of a mind which, through great vigor, is unwearied even through incalculable aeons. They had roared the great lion's roar; they were never overcome in discussion by anyone; they were sealed with the seal of irreversibility and had received final initiation into the Dharma of all buddhas.

Such indeed were the Bodhisattva Mahāsattva named Meru, and the Bodhisattvas Mahāsattvas Sumeru, (Du 9) Mahāmeru, Meruśikhara-dhara, Merupradīparāja, Merukūṭa, Merudhvaja, Merurāja, Meru-

śikharasaṃghaṭṭanarāja, Merusvara, Megharāja Dundubhisvara, Ratnapāni, Ratnākara, Ratnaketu, Ratnaśikhara, Ratnasambhava Ratnapra-(Ma 233)-bhāsa, Ratnayaṣṭi, Ratnamudrāhastā, Ratnavyūha, Ratnajāli, Ratnaprabha, Ratnadvīpa, Ratimkara, Dharmavyūha, Vyūharāja, Lakṣaṇasamalaṃkṛta, Svaravyūha, Svaraviśuddhiprabha, Ratnakūṭa, Ratnacūḍa, Daśaśataraśmihutārcis, Jyotīrasa, Candrabhānu, Sahacittot-pādadharmacakrapravartin, Śubhakanakaviśuddhiprabha and Sata-tamabhayaṃdad. The Blessed One dwelt with these, and with all the bodhisattvas mahāsattvas of the Auspicious Kalpa with the Bodhisattva Ajita at their head, and with sixty whose thought was incomparable, headed by Mañjuśrī. And he dwelt with the sixteen worthy men headed by Bhadrāpāla, with devas belonging to the retinue of the Four Great Kings, (Du 10) headed by the Four Great Kings, and with the other devas up to those belonging to the retinue of Brahma, with Brahma at their head.

The Blessed One, honored, revered, esteemed, worshipped, saluted and venerated by these and other mighty and very exalted gods and nāgas, yakṣas and gandharvas, by asuras, garuḍas, kimnaras, mahoragas and both human and nonhuman beings. (Va 2) He was worthy of the veneration, worship, honor, reverence, esteem, salutation and respect of that fourfold assembly and the world together with its gods.

And there the Blessed One, surrounded and attended by an assembly of several thousands, taught the Dharma, which is good in the beginning, good in the middle, good in the end, (Ma 232) excellent in both meaning and expression. There he taught the complete, full, clear and entirely purified spiritual practice.³

Then, again, on that occasion there was seated in that assembled group a young man named Candraprabha,⁴ a young man who had offered due honor and service to former buddhas, who had planted roots of merit, was possessed of remembrance of his former births, had obtained inspired speech and set out on the Great Vehicle, and who was committed to great compassion.

Then that young man Candraprabha rose from his seat, placed his upper robe over one shoulder, placed his right knee on the ground, raised his hands, palms joined, toward the Blessed One, and said to him: "I would ask the Blessed One, the Tathāgata, Arhant and Fully Enlightened One a question, if the Blessed One would make this an occasion for explaining whatever might be asked."

When that was said, the Blessed One said this to the young man Candraprabha: "Young man, ask the Tathāgata, Arhant and Fully Enlightened One (Du 11) whatever you like. I will satisfy your mind with an explanation of whatsoever question might be asked. I am, young

man, all-knowing, all-seeing and have achieved preeminence in the powers, the grounds of confidence and all the other qualities of a buddha (*sarvadharma-bala-vaiśāradya-vr̥ṣabhita*). I possess unobstructed freedom and knowledge. In the endless and boundless world spheres, young man, there is nothing which is not known, seen, heard, understood (Ma 231) or directly realized by a tathāgata, nothing to which a tathāgata has not fully awakened. May there always be, young man, an occasion for you to ask questions of the Tathāgata! I will satisfy your mind through an explanation of whatsoever question might be asked.”

Then the young man Candraprabha, having been given this opportunity by the Blessed One, addressed him with these verses:

1. How, O Fully Enlightened One, O Protector of the World, O Light-maker, does one who practices obtain that inconceivable knowledge? O Benefactor, explain this to me!
2. Practicing in what way, O Leader of Men, O Bull of Men, O Speaker of Truth, you who are worthy of veneration by both gods and human beings, is the most excellent vehicle obtained, the incomparable and best? O Protector, you whose speech is most excellent, please answer this question. (Du 12)
3. I ask sincerely (*adhyāśayena*);⁵ there is no guile on my part. For me, apart from the Highest of Men, there is no authority.
4. I have made a far-reaching vow and have strong resolve.⁶ You, O Lion of the Śākya, know my conduct. I will not be one who only thinks about what is said. (Ma 230) O Leader of Men (*narendra*), please explain to me at once the actual practice (*pratipatti*). (Va 3)
5. In the vehicle of the Buddha, which dharmas carry one forward and which are clearly the most effective? May you, O Great Hero, please explain the realization of all dharmas.
6. Explain to me, Protector, how a man who has had recourse to the beneficial dharma attains to piercing wisdom and, although free of fear and trembling and without dread, still does not abandon the elements of morality (*śīlaskandha*).
7. One who is free from intoxication, passion, hatred and delusion, whose defects have all been extinguished, he follows the practice and thinks of his body as the empty sky. Indeed, all dharmas are by nature luminous.⁷ (Du 13)

8. How does one not abandon morality? How does one not neglect meditation? In what way should one withdraw to the forest and how does one increase wisdom?
9. How does one who guards morality find delight in the excellent teaching of He Who Possesses the Ten Powers? How does one keep the elements of morality intact? And how does one assess the intrinsic nature (*svabhāva*) of what is conditioned (*samskṛta*)?
10. How is the wise man pure in body and speech; (Ma 229) and how, with undefiled mind, does he seek for the knowledge of a buddha?
11. How does he become pure in his bodily actions, and how does he avoid fault in his speech? How does he attain an undefiled mind? Answer my questions, O Most Excellent of Men!

When that had been said, the Blessed One said this to the young man Candraprabha: "Young man, a bodhisattva mahāsattva, when he is possessed of one single dharma, obtains those qualities, and quickly awakens fully and completely to unsurpassable, perfect and complete awakening. Young man, possessed of which single dharma does the bodhisattva mahāsattva obtain those qualities, and quickly awaken fully and completely to unsurpassable, perfect and complete awakening? It is this dharma: that his mind is the same (*sama*) toward all beings, (Du 14) that he has a mind disposed to benefit others, a mind of sympathy, a mind free from aversions, a mind that is never partial (*aviśama*).⁸ Possessed of this single dharma, young man, a bodhisattva mahāsattva obtains these qualities and quickly awakens fully and completely to unsurpassable, perfect and complete awakening."

Then, on that occasion the Blessed One addressed the young man Candraprabha with these verses: (Ma 228, Va 4)

12. The bodhisattva who adopts one dharma obtains these qualities and quickly awakens to awakening.
13. There is no aversion in his mind. The bodhisattva whose mind is without aversion produces no harshness or ill will, and obtains these qualities as they have been described.
14. By maintaining an even (*sama*) mind, he perceives the fruits of all actions to be the same (*sama*). His feet tread evenly (*sama*) on the ground; evenness (*sama*) marks the range of his conduct.⁹
15. Having developed an even mind, a mind that is not partial, free from hatred and harshness, (Du 15) having fully abandoned strong

inclinations, the soles of his feet tread evenly on the ground; they are wonderfully luminous, pure and delightful to see.

16. That bodhisattva, blazing in the ten directions, (Ma 227) fills the buddhafield with splendor and light. When he obtains the stage of serenity (*śāntabhūmi*), he establishes many beings in the knowledge of the buddhas.

“There, young man, the bodhisattva mahāsattva, whose mind is the same toward all beings, a mind disposed to benefit others, a mind free from aversion, a mind that is never partial, attains this samādhi called ‘the manifestation of the sameness of the essential nature of all dharmas.’¹⁰ And what, young man, is this samādhi called ‘the manifestation of the sameness of the essential nature of all dharmas’?

“It is restraint of one’s body, restraint of one’s speech and restraint of one’s mind.¹¹

“It is the purification of karma.¹²

“It is going beyond all supports (*ālamba*).

“It is thorough knowledge of the aggregates (*skandha*), the sameness of the bases of consciousness (*dhātu*) and withdrawal from the sense fields (*āyatana*).

“It is abandoning thirst and entering into the direct realization of nonproduction (*anutpāda*). It is the illumination of all causes and the nondestruction of the fruits of karma.

“This samādhi is the seeing of dharmas (*dharmadarśana*), the cultivation of the path (*mārgabhāvanā*) and the meeting with a tathāgata.

“It is the state of possessing penetrating wisdom, knowledge concerning entrance into truth, knowledge of the Dharma, knowledge of the entrance into the special knowledges (*pratīsamvid*), knowledge of the proper divisions into syllables and words, going beyond objects and topics (*vastu*) and thorough understanding of the sounds of human speech.

“It is obtaining joy (Du 16), the state of experiencing delight in Dharma, sincerity, gentleness, honesty, nondeception and lack of deviousness. It is to be unfrowning, contented, well-disposed, friendly, sweet, to have a smiling face, to be gracious and to be hospitable. It is not to be given to laziness, to be respectful to one’s teacher and to be obedient to one’s teacher.

“This samādhi is being content with one’s birth and being unsatiated by good (*śukla*) dharmas.

“It is knowledge of the differentiation of the stages (*bhūmi*) of religious development (Ma 226).

“It is the nondestruction of mindfulness. It is skillfulness in knowing the aggregates, skillfulness in knowing the bases of consciousness and skillfulness in knowing the sensefields. It is the entrance into the direct realization of the extraordinary faculties.

“It is the removal of the afflictions (*kleśa*) and the destruction of the continuation of habitual patterns (*vāśana*). It is focusing totally on knowledge, the natural outcome of cultivation (*bhāvanā*), skillfulness in rising above transgressions, suppressing obsessions, abandoning one’s proclivities (*anuśaya*) (Va 5) and going beyond continuous becoming. It is the state of remembering one’s former births and not hoping for the [beneficial] results of karma.

“It is the state of being totally occupied with Dharma, seeking for learning, thirsting for knowledge and the awakening of knowledge.

“It is the stage of the noble born.

“It is having a mind like a mountain, being unshakable and unmovable; it is having knowledge that is firmly established at the irreversible stage. It is the natural outcome of good (*kuśala*) dharmas and aversion to evil (*pāpa*) dharmas. It is the state of not acting according to the afflictions, not abandoning the rules of training, (Du 17) being firmly established in the samādhis.

“It is the knowledge of the dispositions (*āśaya*) of beings, the knowledge of the various kinds of rebirths and the knowledge of sameness.¹³

“It is the knowledge of well-constructed speech.

“It is giving up life as a householder and taking no pleasure in anything connected with the three spheres of existence.

“It is the state of not being depressed. It is not settling down (*abhiniveśa*) in any dharmas, taking up the Good Dharma and keeping watch over the Dharma.

“It is the firm conviction that actions must have results.

“It is skillfulness in discipline (*vinaya*), putting to rest contentions, freedom from disputes and freedom from arguments.

“It is the stage of patience (*kṣānti-bhūmi*) and the undertaking of patience.

“It is the sameness of all destinies (*gati-samatā*).¹⁴

“It is skillfulness in the investigation of dharmas and in the analysis of dharmas, knowledge of and skill in distinguishing the words of Dharma, knowledge of and skill in the application of words of Dharma and (Ma 225) knowledge of and skill in applying words by distinguishing what is meaningful from what is not.

“This samādhi is the knowledge of the past, the future and the present; it is knowledge of the sameness of all three periods of time.

“It is knowledge of the three spheres of purification.¹⁵

“It is knowledge of the states of the body and of the states of the mind, watching carefully one’s deportment (*īryāpatha*), being unperturbed in one’s deportment, discrimination (*vikalpa*)¹⁶ with respect to deportment and being serene in one’s deportment.

“It is knowledge of and skill in what is meaningful and what is not; it is appropriate speech and knowledge of the ways of the world.

“It is unrestrained generosity and openhandedness. It is the absence of mental aloofness. It is modesty and shame. It is aversion to non-meritorious (*akuśala*) thoughts, not abandoning the ascetic practices and undertaking the practice of begging (*caritra*). It is being pleasant in behavior, rising for and giving one’s seat to teachers, suppressing one’s pride and restraining one’s mind.

“It is the knowledge of the arising of thoughts and knowledge of the penetration into meaning. (Du 18) It is the awakening of knowledge and separation from what is not knowledge (*ajñāna*).¹⁷ It is knowledge which is penetration into thought and knowledge which is awakening to the essential nature of thought. It is knowledge and skill in bringing together and taking away.¹⁸ It is knowledge of all sounds and knowledge of the range of definitions, knowledge of the analysis of meaning and rejection of what is not meaningful.

“It is the seeking for worthy men (Ma 224). It is keeping company with and attending to worthy men and avoiding unworthy men.

“It is accomplishing meditative states, but not relishing them. It is the performance of marvelous feats through the extraordinary faculties. It is knowledge which enters into the intrinsic nature of names, verbal conventions and designations. It is the elimination of designations and total indifference to conditioned things.

“It is being free of desire for honors and being indifferent to abuse. It is the state of not seeking after gain and not being downcast in the absence of gain, not seeking fame and not resenting its absence. It is not succumbing to praise and not being dejected by reproach. It is non-attachment to happiness and nonaversion to suffering. It is not appropriating conditioned things. It is nonattachment to true praise and patient endurance (*adhivāsanatā*) of false praise.

“It is the absence of intimacy with either householders or renunciants. It is avoidance of that which is outside of one’s range (*agocara*) (Du 19) and moving within one’s own range (*gocara*). It is perfection in conduct and avoiding what is not proper conduct.

“This samādhi is gentleness, not corrupting families, protecting the teaching, being of few words, talking quietly, skill in replying. It is suppressing hostility. It is holding back at the right time and avoiding the wrong time. It is not placing confidence in common men.

“It is not humiliating those who suffer, but offering material assistance to them. It is not disappointing the poor. It is compassion toward those who are immoral, possessing things for a beneficial purpose, being compassionately aware, benefitting through Dharma, renouncing the purely material and being constant in not accumulating things. (Va 6) It is the state of praising morality (Ma 223) and aversion to what is not moral, not being deceptive towards those possessed of morality, the renunciation of all one has. It is summoning one’s highest resolve (*adhyāśaya*).¹⁹ It is the habit of acting in accordance with what one says, of being constantly occupied, of experiencing the joy of reverence.

“This samādhi is the knowledge of similes. It is skill in the knowledge of former lives. It is the habit of being primarily concerned with the roots of merit. It is having skill in means, abandoning external marks, avoiding perceptual frames and fully understanding the nature of things. It is putting the sūtras into practice. (Du 20) It is experience (*kausalya*) in the vinaya. It is the determination of truth, the entrance into the direct realization of release. It is uttering comprehensive speech (*ekāṃśa-vacana*). It is not rejecting the knowledge and vision of things as they are. It is speaking without doubts.

“It is attending to emptiness, attending to the absence of external marks and looking into the intrinsic nature of desirelessness.

“This samādhi is attaining the four types of confidence. It is illumination through knowledge, firmness in morality, the entrance into the meditative attainments, the attainment of wisdom, delighting in solitude, knowing the self.²⁰ It is satisfaction with only a little recognition. It is absence of mental confusion, the rejection of that which is produced by views. It is obtaining the dhāraṇīs, the entrance into knowledge, the knowledge of the possible, the impossible, the undertaking and the practice. It is the cause, the reason, the method, the gate, the immediate cause, the path (Ma 222), the actual practice. It is the direction, the instruction, the teaching and the practice.

“It is adaptable patience (*anulomikī kṣānti*),²¹ the stage of patience, the separation from impatience. It is the stage of knowledge; it is abandoning what is not knowledge (*ajñāna*)²² and being established in knowledge.

“It is the stage of the practice of yoga and the range of the bodhi-sattvas. It is attending to worthy men and avoiding those who are not worthy. It is the knowledge of awakening to and penetrating into the intrinsic nature of all dharmas. (Du 21)

“This samādhi is the stage (*bhūmi*) of a buddha which was proclaimed by the Tathāgata, in which the wise rejoice, which is rejected by the foolish, not easily understood by those who are mere disciples

(*śrāvaka*), unknown to hermit buddhas (*pratyekabuddha*). It is not a stage (*abhūmi*) accessible to outsiders (*tīrthika*). It is the stage of a buddha which is embraced by the bodhisattvas, recognized by those possessed of the ten powers, to be worshipped by the gods, honored by Brahma, accessible to Indras, venerated by nāgas, rejoiced in by yakṣas, praised by kimnaras, extolled by mahoragas, cultivated by bodhisattvas and mastered by the wise.

"This samādhi is the most excellent possession, a spiritual gift, medicine for the sick, the joy of those whose minds are at peace, a storehouse of knowledge, inexhaustible inspired speech, the method of the sūtras, the end of sorrow, the field of the courageous, the comprehension of the three realms of existence. It is a raft for those who are crossing over, a boat for those who are caught in the flood. It is glory for those seeking fame, praise of the buddhas, the renown of the tathāgatas, eulogy for those possessed of the ten powers.

"It is the virtue of bodhisattvas, the equanimity of those who are compassionate, the friendliness of those who wish to pacify anger, the joy of those who have taken up the Great Vehicle, the actual practice of those who roar the lion's roar (Ma 221), the path to the knowledge of a buddha, the seal of all dharmas, that which brings the knowledge of the All Knowing One. It is a garden for bodhisattvas, (Du 22) a terror for the armies of Māra, a spell for those seeking security, the goal of those who have accomplished the goal, the refuge for those who find themselves among enemies, the defeat of opponents through a powerful dharma. It is a true source of the various kinds of confidence, the true search for the various powers, a first sign of the eighteen dharmas that are unique to a buddha. It is the ornament of the Body of Dharma, the natural outcome of practice, the ornament of the sons of the buddha. It is satisfaction for those seeking release. It is the joy of the Buddha's eldest sons, the fulfillment of the knowledge of a buddha. It is not a stage (*abhūmi*) accessible to mere disciples (*śrāvaka*) and hermit buddhas.

"It is the purification of the mind, the purification of the body. It is the full development of the doors to liberation. It is the nondefilement of the knowledge of a buddha. Passion does not approach it, (Va 7) hatred departs from it, delusion finds no place in it.

"It is the arrival of knowledge (*jñāna*), the production of understanding (*vidyā*) and the abandonment of ignorance (*avidyā*).²³ It is satisfaction for those whose chief concern is release, contentment for those whose chief concern is samādhi. It is the eye for those desiring to see. It is the extraordinary faculties for those who desire to perform miraculous feats, magic powers for those who wish to display them. It is

the dhāraṇīs for those who seek learning. It is not losing mindfulness. (Ma 220) It is the empowerment of the buddhas, the skill in means of the Guides.

“It is subtle, not easily understood and incomprehensible for those who are not prepared, because it is difficult to understand. It is not easily understood through the sound of articulated syllables. (Du 23) It is perceived by the wise, known by the calm, penetrated by those whose wishes are few, obtained by those who have exerted effort and maintained by those possessed of mindfulness.

“This samādhi is the exhaustion of suffering. It is the nonproduction of all dharmas; it is the use of a single method to explain all existences, destinies, rebirths and resting places.

“This, young man, is the samādhi called ‘the manifestation of the sameness of the essential nature of all dharmas.’”

Then, while the Blessed One was giving this explanation of the samādhi called “the manifestation of the sameness of the essential nature of all dharmas,” there occurred, for eighty million gods and men who had formerly prepared themselves, the obtainment of the patient acceptance of the fact that dharmas are not produced (*anutpattikeṣu dharmeṣu kṣānteḥ*). For ninety-six million there was the obtainment of adaptable patience (*anulomikāyāḥ kṣānteḥ*). For ninety-three million there was the obtainment of the patient acceptance adapted to words (*ghoṣānugāyāḥ kṣānteḥ*).²⁴ The minds of a full hundred thousand monks were, without clinging, freed from the outflows. For sixty thousand living beings—both gods and men—the spotless, clear (Ma 219) vision of dharmas was purified. The minds of eighty thousand nuns, without clinging, were freed from the outflows. Five hundred laymen attained the fruit of the nonreturning stage and six thousand laywomen attained the fruit of the once returning stage.

And this world system, which contains three thousand times many thousands of worlds, in six ways shook, shook much and shook entirely. It trembled, trembled much and trembled entirely. It swayed, swayed much and swayed entirely. It moved, moved much and moved entirely. It rattled, rattled much and rattled entirely. It rumbled, rumbled much and rumbled entirely. In the east it sank down, in the west it heaved up. In the west it sank down, in the east (Du 24) it heaved up. In the north it sank down, in the south it heaved up. In the south it sank down, in the north it heaved up. From the ends it sank down, from the middle it heaved up. From the middle it sank down, from the ends it heaved up.²⁵ And a boundless light flooded the world and the whole world system with its gods and Māras and Brahmas, with its śramaṇas and brahmins. All living beings were suffused with that light. And the sun and the moon,

though powerful, mighty and strong, seemed not to shine at all. (Ma 218) Even the pitch-dark spaces between worlds, even they were suffused by that light, and the beings who had been reborn there suddenly became aware of each other, saying, "What! Could it be that another being has also been reborn here!" And so it was down to the great Avīci Hell.

**The First Chapter,
Entitled "The Setting"**

CHAPTER II

A Former Life during the Time of Sāleṅdrarāja

(Va 310, Ma 217)²⁶ Thereupon, the Blessed One addressed the young man Candraprabha: "Young man, I remember immeasurable, incalculable tathāgatas, arhats, fully awakened buddhas who were honored by me on this very Vulture Peak for hundreds of thousands of millions of billions of aeons when I was formerly practicing the bodhi-sattva practice as a wheel-turning king, seeking for this samādhi and intent on quickly and fully awakening to unsurpassable, perfect and full awakening. They were honored by me, revered, esteemed, worshipped, saluted and venerated with all kinds of jewels, flowers, incense, perfumes, garlands, unguents, aromatic powders, garments, umbrellas, flags and banners, with musical instruments, cymbals and streamers, and with hundreds of thousands of millions of billions of diverse and variegated arrays of shrines (*vihāra*) made of manifold precious things. And in the presence of all those tathāgatas, young man, I heard in detail this samādhi called 'the manifestation of the sameness of the essential nature of all dharmas.' I took it up, I inquired about it, preserved and recited it; I propagated it, cultivated it by developing a sense of solitude (*araṇā*), repeatedly practiced and fully illuminated it in detail for others.²⁷

"And, young man, the last of all these tathāgatas was the Tathāgata, Arhant, Fully Awakened Buddha named Sāleṅdrarāja. And, young man, the community (*saṅgha*) of the Tathāgata Sāleṅdrarāja consisted of eighty hundred thousand million disciples (*śrāvaka*) and bodhisattvas. His life span was seventy-six thousand billion years.²⁸ And for eighteen thousand billion years I offered great worship and honor to that Tathāgata, Arhat, Fully Awakened Buddha Sāleṅdrarāja. And a billion shrines were made of heavenly sandalwood and precious jewels. (Ma 216) And, young man, the life span of that Blessed One Sāleṅdrarāja, the Tathāgata, Arhant, Fully Awakened Buddha was seventy-six thousand billion years.

“And, having gone forth (*pravrajitvā*) in the presence of the Blessed One Sāleṅdrarāja, the Tathāgata, Arhat, Fully Awakened Buddha, having heard in detail the exposition of the samādhi called ‘the manifestation of the sameness of the essential nature of all dharmas’ for fourteen thousand billion years, I took it up, I inquired about it, preserved and recited it. I engaged in its practice, cultivated it by cultivating the absence of depravities, repeatedly practiced and fully illuminated it in detail for others.”

Then the Blessed One once again addressed the young man Candraprabha: “Therefore, young man, while seeking for this samādhi and intent on quickly and fully awakening to unsurpassable, perfect and full awakening, you should do as I did—you should be intent on worship, honor and service to all tathāgatas. What is the reason for this? It is, young man, that since unsurpassable, perfect and full awakening is obtained without difficulty as the natural outcome of worship, honor and service to all tathāgatas, then it stands to reason that this samādhi would be even easier to obtain through the same practice! Therefore, young man, you should always be of untiring spirit in regard to worship, honor and service to all tathāgatas.”²⁹

(Du 25, Va 8) Thereupon, the Blessed One on that occasion further illuminated in greater detail this account of his former life. He illuminated it for the young man Candraprabha by delivering these verses (Du 26):³⁰

1. I remember sixty billion buddhas,³¹ endowed with the ten powers, who dwelt in former times on the Vulture Peak. (Ma 215) While I was at that time practicing the practice of a bodhisattva, they taught this excellent, auspicious samādhi.
2. The last one of these Protectors of the World and Makers of Light was named Sāleṅdrarāja. I questioned him about this samādhi.
3. And I was a kṣatriya, the chief of kings, a lord of the earth. I had not less than five hundred sons.
4. I had a billion shrines (*vihāra*) made for that Buddha, some made of the most precious sandalwood and some of jewels.
5. Beloved and dear to my people, I was a king named Bhīṣmottara. I offered the most excellent forms of worship (*pūjā*) to that Buddha for eighteen thousand billion years.

6. The life span of that Conqueror, the Best of Men, the Guide, the irreproachable Śāleन्द्रarāja, (Du 27) was then seventy-six thousand billion years.
7. And that Best of Men had then a community of eighty hundred million disciples (Ma 214) who possessed the three knowledges (*trividyā*) and the six extraordinary faculties, who had mastered their senses, whose outflows were exhausted and who were in their last birth. (Va 9)
8. To that Conqueror, the Best of Men, I offered many kinds of worship for the sake of the world, together with its gods, while always seeking for this samādhi.
9. Having gone forth together with my wife and children in the presence of the Conqueror Śāleन्द्रarāja, for fourteen thousand billion years I asked about this samādhi.
10. There were eighty thousand million verses and another hundred billion more. I took up in the presence of that Sugata only a single chapter from this samādhi. (Du 28)
11. My hands, my head, my wife and sons, great wealth, my food and drink—there is nothing I did not formerly give up while seeking for this excellent samādhi. (Ma 213)
12. I remember a thousand billion buddhas, more numerous than the sands of the Ganges, who, having stayed here on the Vulture Peak, taught this excellent, auspicious samādhi.
13. And they were all named the Bull of the Śākya. And they all had sons named Rāhula and attendants named Ānanda. And they all went forth from a city named Kapilavastu.
14. Their two leading disciples were Maudgalyāyana and Śāriputra, and their holy disciples all had the same names. The world sphere was then called Saha, and all these buddhas were born in the period of the decline of Dharma.³² (Du 29, Va 10)
15. All these leaders of men were honored by me while I was engaged in the practice directed towards awakening. And while seeking for this samādhi I offered them every form of worship that can be offered to conquerors. (Ma 212)
16. Through actual practice (*pratipatti*) this samādhi is obtained, and many kinds of practice (*pratipatti*) have been described. For one

who is established in all these qualities this samādhi is not difficult to obtain.

17. For one who is without longing and desire for things of pleasure, who is not attached to family, not envious, who dwells in friendliness and is free from anger, this samādhi is not difficult to obtain.
18. For one who is not interested in gain and honor, who is pure in livelihood, who is without possessions, (Du 30) whose moral behavior is pure and who is confident, this samādhi is not difficult to obtain.
19. For one who puts forth effort, is unwearied, is committed to the forest life and is established in the ascetic practices,³³ for one who is established in the patient acceptance of the absence of a self (*nairātmya-kṣāntiya*), this samādhi is not difficult to obtain.
20. For one whose mind is well tamed, who is not arrogant, who is established in practice and good conduct, (Ma 211) this samādhi is not difficult to obtain.
21. The major and minor marks, the eighteen dharmas unique to buddhas that were praised by the Guide, the powers, the types of self-confidence—for one who preserves this auspicious samādhi, these are not difficult to obtain. (Va 11)
22. If all the beings who are seen by the eye of the Buddha were to become buddhas at the same time, and if the life-span of each one of them were to be unthinkable thousands of billions of aeons, (Du 31)
23. and if each one of these buddhas would have as many heads as there are grains of sand in the oceans, and if in each of these heads there would be as many tongues
24. describing the blessings (Ma 210) of one who would preserve only a single verse from this samādhi, still not even a fraction of those blessings would be described. How much more difficult it would be to describe the blessings of one who would preserve this samādhi after training in it!
25. The gods, asuras, yakṣas and guhyakas, all are drawn to one who, having taken upon himself the ascetic practices,³⁴ abides in them. And kings attend on one who preserves this auspicious samādhi which is not easily found.

26. There is no opposition for one who preserves this auspicious samādhi which is difficult to obtain, is adopted by the conquerors and is constantly attended by gods and nāgas.
27. There is endless inspiration (*pratibhāṇa*) for one who preserves this auspicious samādhi. He will recite endless thousands of sūtras (Du 32) without ever ceasing.
28. Those who, in the final horrifying times of this world cycle, would preserve this samādhi after hearing it will see the Buddha Amitābha, (Ma 209) as well as his world sphere Sukhāvātī. (Va 12)
29. After proclaiming these blessings the Teacher, the Self-Made One (*svayambhū*), himself requested: “When I will have entered Parinirvana, in the final times of this world cycle, preserve this pure samādhi!”
30. All the buddhas from the ten directions who have passed away into the peace of nirvana, and all the present and future buddhas, all these conquerors, having trained here in this samādhi, awaken to stainless and unconditioned awakening.

The Second Chapter,

Entitled: “A Former Life during the Time of Sāleन्द्रarāja”

CHAPTER III

The True Qualities and Characteristics of a Buddha

(Du 33, Ma 208, Va 13)³⁵ Then the Blessed One once again addressed the young man Candraprabha: "Moreover, young man, suppose a bodhisattva mahāsattva wants to make fully known the true buddha qualities and characteristics possessed by the Tathāgata, Arhat, Perfectly and Fully Awakened One. He wishes to make them known without exhausting the spirit or the letter, thinking 'May all my words be upheld by the Buddha as they come forth!' Young man, this bodhisattva mahāsattva, for the sake of all beings, should take up this samādhi, master, preserve, recite, propagate, explain and repeat it. He should develop it by cultivating a sense of solitude; he should repeatedly practice and fully illuminate it in detail for others.

"And what, young man, are the true buddha qualities possessed by the Tathāgata? With regard to this, young man, a bodhisattva mahāsattva, having gone into the forest, or to the root of a tree, or to a desolate place, or to an abandoned dwelling, there meditates as follows:³⁶ "The Blessed One is perfectly and fully awakened, endowed with knowledge and good conduct, a sugata, knower of the world, unsurpassed, a guide for those who need to be led, a teacher of gods and men, (Du 34) a buddha, a blessed one. (Ma 207) The Tathāgata is the result of merit; he is one in whom the roots of good (*kuśala-mūla*) are not exhausted; he is ornamented with patience; he is the access to treasures of merit. He is adorned with the minor marks, like flowers the major marks adorn his body; he is perfectly suited to his field of action; he is pleasing to look at; he is the delight of those who are committed to faith; he is unconquerable in his wisdom, invincible in his powers. He is the teacher of all beings, the father of bodhisattvas, the king of the holy persons (*āryapudgala*), pure in speech, pleasant in voice, lovely in form, unequalled in body, unstained by desire, unsullied by forms, uninvolved with the formless realms. He is free from suffering, unfettered by the aggregates, unat-

tached to the bases of consciousness. He is restrained with respect to the sense-fields. He is cut free from the bonds, free from mental anguish, released from thirst. He has crossed over the flood; his knowledge is complete, abiding in the knowledge of past, present and future buddhas, blessed ones. But he is not in nirvana; he is established in the true goal, on the stage of those to whom all beings look up.' These, young man, are the true buddha qualities of the Tathāgata.

"Possessed of these qualities and characteristics the bodhisattva mahāsattva, (Du 35) through the power of this samādhi, makes fully known the true buddha qualities and characteristics possessed by the Tathāgata, Arhat, Perfectly and Fully Awakened One, with uninterrupted inspiration. (Ma 206) He makes them known without exhausting the spirit and the letter, and all his words are upheld by the Buddha as they come forth."

Then the Blessed One clarified further the meaning for the young man Candraprabha and illuminated it in much greater detail by uttering on that occasion this set of verses:

1. It would not be easy to pronounce the full praise of the conquerors even by speaking for many thousands of aeons (Va 14)—such are the qualities acquired by them while seeking for this excellent, auspicious samādhi.
2. Young girls with delightful, truly charming bodies and lovely ornamented limbs were formerly given away by me—without regret—while seeking this excellent, auspicious samādhi.
3. So too were wealth and provisions, and male and female slaves, (Ma 205) so too were jewels and pearls and gold and silver (Du 36) given away by me—without regret—while I was seeking for this excellent, auspicious samādhi.³⁷
4. Garlands of pearls colored by gems and jewels, with brightly woven threads of beautiful gold, were formerly given by me to the guides while I was seeking for this excellent, auspicious samādhi.
5. For immeasurable, endless billions of aeons the most excellent, sweet smelling flowers and jasmine were given by me to the shrines (*cetiya*) of the conquerors after I had given rise to the most excellent, unsurpassable thought.³⁸
6. In the same way I gave the gift of Dharma, eliciting great admiration in the assembly. Still, after giving the gift of Dharma the

thought never occurred to me that (Ma 204) this would make for me a great reputation. (Du 37)

7. Formerly I mastered the ascetic practices. I always dwelt in a quiet forest. At all times was I compassionate. My thought was always, "I must obtain the knowledge of a buddha."
8. I never grasped at even the dearest things for my own enjoyment. (Va 15) I gave abundant meritorious gifts, and always my thought was, "I must obtain the knowledge of a buddha."
9. Benign, gentle, accustomed to sharing, always with a smile on my face, preserving what I heard, with mild voice and gentle speech, I was loved by many. People never grew tired of seeing me. (Ma 203)
10. Not even for a moment was I envious; not for a million lives was I ever jealous. (Du 38) I was always satisfied by the food placed in my bowl, and all invitations were rejected without exception.³⁹
11. Those who were learned and preserved what they had heard, who preserved even a single four-lined verse from this samādhi, they were always venerated by me with the most excellent unsurpassed love (*prema*).⁴⁰
12. I gave an endless variety of gifts, and so too I guarded my moral practice for a very long time. I constantly offered worship to the guides while I was seeking for this excellent, auspicious samādhi.
13. If someone were to fill this broad, manifold and endless world system (Ma 202) with jewels and precious gems, and give it as a gift to the tathāgatas, and if someone else were to preserve a single verse from this samādhi, the merit of the latter would greatly exceed that of the former.
14. If someone, desiring merit, were to worship the Conqueror for many endless and immeasurable aeons with every kind of flower or with fragrances lovely and fine, (Du 39)
15. and if another one, desiring merit, were to worship the Conqueror for many endless and immeasurable aeons with every kind of music and many kinds of garments and food—both solid and liquid—(Va 16)
16. and if any [other] person were to give rise to the thought of awakening: "I will become a conqueror, a Self-Made One (*svayāmbhū*), a King of Dharma," and then preserve a single verse from this

samādhi (Ma 201), the merit of the latter would greatly exceed that of the former. (Du 40)

17. If I were to proclaim its blessings (*ānuśamsā*) for as many aeons as there are numerous grains of sand in the Ganges, and if its praise would not cease, still much more merit would be gained by preserving this samādhi. (Du 40)

“Therefore, young man, this samādhi is to be taken up, preserved, recited and learned by the bodhisattva mahāsattva. And when it has been taken up, preserved, recited and learned, then he should apply himself to the practice of cultivating a sense of solitude. In this way he acts for the benefit and happiness of a great many people, for the comfort of the world, for the profit, the benefit and the happiness of a vast number of gods and men.”

Then, moreover, the Blessed One on that occasion spoke these verses:

18. Therefore, upon hearing of its wonderful benefits for the buddhas, quickly proclaim this samādhi that is praised by them.
19. Seventy-three billion buddhas were venerated by me in former existences, and this sūtra was taught by all of them.
20. This sūtra was described as the entrance into great compassion.⁴¹ (Ma 200) I studied it extensively and, after training in it, the qualities (*dharma*) of a buddha were not difficult to obtain.
21. In the final period, after the Guide of the world has entered into nirvana, there will be many uncontrolled monks who will not strive for great learning. (Du 41)
22. They will speak effusively about morality, but they will not strive for morality. They will speak effusively about meditation, but they will not strive for meditation.
23. They will speak effusively about wisdom, but they will not strive for wisdom. They will speak effusively about liberation, but they will not strive for liberation.
24. It is just as if some man were to advertise the virtues of sandalwood, saying, “Such sandalwood indeed has a lovely perfume.”
25. But then if another man were to ask him, “Do you yourself use the kind of sandalwood which you praise?” (Va 17)

26. The first man would answer saying, "O no. I praise the perfume through which I make my living, but I do not use that perfume."
27. Just so, in the final period even those who are not engaged in its practice (Ma 199) will make a good living through praising morality, but they will not have actual morality. (Du 42)
28. Just so, in the final period even those who are not engaged in its practice will make a good living through praising meditation, but they will not have actual meditation.
29. Just so, in the final period even those who are not engaged in its practice will make a good living through praising wisdom, but they will not have actual wisdom.
30. Just so, in the final period even those who are not engaged in its practice will make a good living through praising liberation, but they will not have actual liberation.
31. Suppose there was a man, inferior and poor, who was rejected by the great majority of people, but later he obtained wealth and, having become a rich man, then indeed he would be honored by the people.
32. In the same way, as long as he has not obtained this samādhi (Ma 198), a bodhisattva is not highly regarded (Du 43) in this world by gods and men, kumbhāṇḍas and rākṣasas—as if he were a poor and insignificant person.
33. But when the wise man obtains this stage of the incalculable treasure of Dharma, men and gods are drawn to him and he gives them the finest gift.
34. Having heard the benefits of that which is highly valued and praised by the Conqueror, renouncing all reputation, possessions and comforts, proclaim this excellent, auspicious samādhi!
35. All the buddhas in the ten directions who have entered nirvana, and the future and present buddhas as well, (Ma 197) after training in this samādhi, are awakened to the incalculable, inconceivable awakening. (Va 18)
36. The young man Candraprabha was delighted and, standing before the Conqueror, spoke these words: (Du 44) "In the difficult times after the Best of Men will have entered into nirvana, I will preserve this sūtra.

37. "In those times of great fear, having renounced both life and limb and whatever comforts there are in the world, I will preserve this excellent, auspicious samādhi.
38. "Seeing that they suffer much and are without a protector, I give rise to great compassion (Ma 196) for all living beings. I extend friendliness toward them, and teach them this excellent, auspicious samādhi."
39. At that time, no less than five hundred of those who preserve this samādhi rose up, and the young man Candraprabha was the foremost among them in his enthusiastic acceptance of this excellent sūtra.

**The Third Chapter,
Entitled: "The True Qualities and Characteristics
of a Buddha"**

CHAPTER IV

Recollection of the Buddha

(Ma 195, Va 19)⁴² Then the young man Candraprabha rose from his seat, placed his upper robe over his shoulder and knelt with his right knee on the ground. He raised his hands, palms joined, toward the Blessed One, and said to him: "I would ask the Blessed One, the Tathāgata, Arhant and Fully Awakened One a question, if the Blessed One would make this an occasion for explaining whatever might be asked."

When that was said, the Blessed One said this to the young man Candraprabha: "Young man, ask whatever you desire of the Tathāgata, Arhant and Fully Awakened One. The Tathāgata will always grant you the opportunity, young man."

Then the young man Candraprabha, having been granted this opportunity,⁴³ (Du 45) said this to the Blessed One: "O Blessed One, the word 'samādhi' is often used. Exactly what thing (*dharma*) is designated by the word 'samādhi'?"

When that was said, the Blessed One said this to the young man Candraprabha: "What is referred to as 'samādhi', young man, is the deep comprehension of mind, the absence of rebirth, the knowledge of non-continuation, the discarding of one's burden, the knowledge of a tathāgata, the majestic power of a buddha. It is the cure for passion, the calming of enmity and the removal of delusion. It is engaging in what is appropriate and avoiding what is inappropriate. It is desire for good dharmas, the desire for release from conditioning, following through with strong determination, devotion to wakefulness and never abandoning strong effort.⁴⁴ It is preserving pure dharmas, not depending on rebirth, not accumulating karma, (Ma 194) not paying attention to organs of sense (Du 46) and not becoming involved with objects of sense. It is not elevating oneself, not disparaging others. It is not becoming overly involved with lay households and not placing any confidence in common people. It is the natural outcome of moral behavior; it is the condition of being unassailable, the state of majestic power, self knowl-

edge. It is to be unwavering, abiding in the fulfillment of the bodily postures. It is absence of ill-will, absence of harshness, not mistreating others, taking care of friends, preserving secret mantras, absence of cruelty, not mistreating persons who maintain the precepts and speaking gently. It is not to rely on the three world realms. It is the patience of being receptive to all dharmas, in accord with emptiness.⁴⁵ It is strong desire for the knowledge of the all-knowing ones. The word 'samādhi' is often used, young man, [to refer to these conditions]. The actual practice of such dharmas—no contrary practice—young man, is called 'samādhi.'

Thereupon, the Blessed One, revealing this samādhi called "the manifestation of the sameness of the essential nature of all dharmas," further illuminated it in greater detail. He illuminated it for the young man Candraprabha by uttering on that occasion these verses:

1. Already I have thrown open the gateway to immortality. I have taught as it is the essential nature of dharmas. I have shown the process of rebirth as it occurs and I have revealed nirvana and its blessings. (Du 47, Ma 193)
2. You should always avoid false friends and devote yourself to true friends (*kalyānamitra*). You should live in the forest, forsake the multitude and always cultivate a benevolent mind.
3. Moreover you should always maintain pure moral behavior. You should constantly find satisfaction in strict ascetic practices and devote yourself to renunciation and wisdom. This samādhi will not be difficult to attain. (Va 20)
4. Then, after attaining this stage of peace, which is not a stage (*abhūmi*) accessible to the common mass of mere disciples (*śrāvaka*), you, as true witnesses to the Sugata's Dharma, will acquire the inconceivable virtues of a buddha.
5. If you see men who are suitable vessels and endowed with intelligence, direct them (*samādapetha*) towards the practice of the thought of awakening. Once established in unsurpassable knowledge, this King of Samādhis will not be difficult to attain.
6. When envy arises with respect to worldly goods, (Ma 192) if one examines [this envy] in terms of its source and its outcome here (Du 48)—from the point of view of what one seeks and what one enjoys—this samādhi will not be difficult to attain.⁴⁶

7. Since indeed this King of Samādhis is the same as emptiness, it stands at the head of all pure moral practices. Dharmas are by nature always composed.⁴⁷ The foolish, who apply their minds to what is inappropriate (*ayuktayoga*), do not understand this.
8. The Buddha is never absent for those who seek after this auspicious samādhi.⁴⁸ (Du 49) They forever contemplate the Most Excellent of Men once they have had recourse to this stage of peace.
9. One who recollects the tathāgatas in all their aspects comes to be one whose mind and senses are calm. His thoughts will not be confused; he will forever be collected and he will become like an ocean, vast in learning and knowledge.
10. Moreover, after becoming established in this samādhi (Ma 191) the bodhisattva who walks the promenade (*caṅkrame caṅkrami*) sees thousands of millions of buddhas, more numerous even than the grains of sand in the Ganges.⁴⁹
11. The man who would try to grasp the measure of the qualities of a buddha would lose his mind, (Va 21) for there is no measure of the immeasurable.⁵⁰ The Guides are inconceivable because of all their qualities.
12. There is no one anywhere in the ten directions who is the equal of a world protector—not to mention his superior! One must desire and obtain the knowledge of a buddha, endowed with all the qualities of omniscience. (Du 50)
13. With his golden body the World Protector is beautiful in every way. The bodhisattva who makes this body the object of his thought is said to be collected.
14. A wise man who understands both the conditioned and the unconditioned, becoming free from apperception of any sign, (Ma 192) abides in the signless and knows that all dharmas are empty.
15. He who is firmly established in the body of the Dharma knows all being as nonbeing. Becoming free of apperception of nonbeing, he does not perceive the Lord of the Conquerors in his body of form.
16. I proclaim and declare that as a man repeatedly reflects [on the qualities of a buddha] his mind tends towards them, moved by these acts of reflecting on them. (Du 51)

17. Thus, if a person calls to mind the King of Sages and knows him with all his unfathomable attributes, and if he cultivates such recollections constantly, his thoughts will tend and be directed toward the Buddha.
18. If, engaging [in this practice] while walking, standing or sitting, (Ma 189) he longs for the knowledge of the Best of Men, filled with longing he makes a vow to attain awakening: "I will become an unsurpassable conqueror in the world." (Va 22)
19. He perceives the Buddha, he sees the Buddha and he examines the qualities (*dharma*) of buddhas. Abiding in this samādhi, he will pay homage to the overpowering inspiration (*mahānubhāva*) of the buddhas. (Du 52)
20. His mind is calm both in thought and deed. He perpetually speaks in praise of the buddhas and, once he has so cultivated the stream of his thoughts, he sees the World Protector both during the day and during the night.
21. Even when he is ill, diseased, or when he feels the pangs of death, his recollection of the Buddha never fades, nor is he overcome by whatever feelings and sensations he then has.
22. When he has reflected in this way he understands the emptiness of all dharmas, past and future, and, (Ma 188) firmly established in such a practice of the Dharma (*dharma-naya*), he does not in the least grow weary of walking the path of [the bodhisattva's] practice (*carantu carikam*).
23. Therefore, now that you have heard its benefits, strive to realize incomparable awakening. (Du 53) Do not be overcome with grief about some future time, for audience with the excellent sugatas is very rare.
24. I will speak of the most excellent Dharma; you must listen and practice. A patient accepts the vile medicine, and his disease is cured so that it no longer overpowers him.
25. Thus, a person of clear vision who knows how to proceed will always strive after this samādhi. When one attends to moral behavior, learning and renunciation, this samādhi is not difficult to obtain.

**The Fourth Chapter,
Entitled: "Recollection of the Buddha"**

NOTES

Full citation information is provided in the list of abbreviations and bibliography found at the beginning of Part I or in the relevant bibliographic sections (3.2, 5.1.2, 5.2 and 5.3). For the latter references the reader is directed to first consult the general list, which provides a note to the location of the work in the introduction.

Notes to the Introduction

1. These nine texts are the *Aṣṭasāhasrikā*, *Daśabhūmiśvara* (*Daśabhūmika*), *Gaṇḍavyūha*, *Lalitavistara*, *Laṅkāvatāra*, *Samādhirāja*, *Saddharmapuṇḍarika*, *Swarna-prabhāsa*, and *Tathāgataguhyaka* (*Guhyasamāja*).
2. Régamey 1938: 10–11.
3. Régamey 1938: 11.
4. See Muramaki 1966a and 1968.
5. Muramaki 1968. The Chinese translation putatively dates to ca. C.E. 253. It occupies only one page in the Taisho ed. (T 169 [III] 411a9–c27).
6. In the present introduction, as in the translation, the title *Samādhirāja* has been chosen as the title for the work, since this is the title found in the extant Sanskrit MSS. Other works with similar titles occur in the Chinese Canon, but these are not thematically or genetically related to our sūtra. Further details are provided in n. 31 to this introduction.
7. The term *sarvadharmasvabhāvasamatāvipañcita* is highly problematic. In chapter XL (“Parīndanā-parivarta”; see Va 303.8; also, the colophon to the same chapter) the sūtra is called the “Discourse on Dharma” (*dharmaparyāya*) which is (or contains) “an explanation of the samādhi that is manifested as the sameness of the essential nature of all dharmas” (*sarvadharmasvabhāvasamatāvipañcitasamādhinirdeśa*, as a possessive compound). In chapter VIII, the Nepalese MSS A and B and the Tibetan translation explain this title. The stanza of explanation, however, is not found in the Gilgit MS (“Abhāvasamudgata-parivarta”; Du 87, n. 2 and Va app. I, no. 7, 312.3–10). The stanza reads as follows:

Nonexistent are all dharmas, signless, markless,
Without origination or cessation—know that all dharmas are like this.
Nonexistent, inexpressible, empty, quiescent, from the beginning
mere constructs
—He who knows dharmas in this manner is called a buddha.

Therefore, one seeking the Mother of the Sugatas,
Who manifests herself as sameness of essential nature,
By meditating on all dharmas as nonexistent,
Will attain to this Mother of the Conquerors.

See Régamey 1938: 65-66 for a different translation. On the authority of the Tibetan, Régamey reads *nirmilaḥ* in line 3, where all MSS have some variant of *nirmītaḥ*. We follow the latter reading ("construct" or "magical creation"). Cf. also n. 10 to our translation.

8. It must be noted, however, that the title *Candrapradīpa* occurs twice in the introductory stanzas (*praśasti-śloka*) of the sūtra (not part of the original text). See Va 306.1 and 310.2.
9. MAV (P 73a7; D 74b4) and MAP (P 130a1; D 122b2), ed. in Ichigō 1985: 250-51.
10. Dutt reads *mahākaruṇajētāraṃ . . . sūtraṃ*, but with no support in the Gilgit MS. *Otāra* is a normal Middle Indic form of *avatāra*. The reading of the Nepalese MSS is supported by the Tibetan and Chinese translations. The Tibetan reads: *mdo sde 'di yi ming yang ni // snying rje chen por 'jug ces bya //* (P 277.2.4-5). The Chinese reads: 亦說如是修多羅 / 由此能入大悲心 (T 639 [XV] 552b14-15). The latter does not support the interpretation of the phrase as indicating a title, but see the phrase quoted in the following note. According to Ono Genmyō, the title "Ju yū ta-peī" 入於大悲 is known to the Chinese tradition. See Ono 2.77b5. See also sections 2.4.1 and 4.1 in the introduction and n. 10 to the translation.
11. See Va 303.25-26; T 639 (XV) 619c20: 是經名爲入於大悲 .
12. Du 1, xiii-xxiii; 2, i-xxix and 3, i-xxvii.
13. It is not clear whether the terms or epithets are meant as definitions or descriptions, or if they are attributes of the samādhi, its causes or its effects. Furthermore, it is not always obvious where a new epithet is intended. In many cases a phrase that appears to be a list of terms may also be construed as a listing of various aspects of one attribute. See n. 11 to the translation.
14. *Jātakamālā*, chap. 28. Translated by Speyer 1895: 253-68.
15. See section 3.2.V in this introduction.
16. See von Simson 1965.
17. On the first of these, see Régamey 1938: 25; also the introduction to Lamotte 1962: 37ff. On the *Heart Sūtra*, see the article by Wayman 1977.
18. Régamey 1938: 23, 25-26.
19. Du 3, introductory note (unpaginated).
20. The quotations are grouped and referred to according to their location in the work in which they occur. Most quotations found in the *Prasannapadā*, *Madhyamakāvātāra* and *Śikṣāsamuccaya* have been identified by the editors of these works, Louis de La Vallée Poussin, Cecil Bendall and P. L. Vaidya. The following identifications also take into account and expand upon the listings of Du 3 (introductory note; unpaginated) and, more recently, Murakami 1966a.
21. The unlocated stanza reads:

*tvaksnāyumānsāsthisamucchraye ca
utpādya samjñān mama patnir eṣa /
mūḍhā hi bālā janayanti rāgaṃ
striyo na jānanti yathaiva māyām //*

22. The unlocated stanza reads:

*bhāva abhāva vibhāvayi jñānaṃ
sarvi acintayi sarvi abhūtaṃ /
ye puna cittavaśānuga bālāḥ
te dukhitā bhavaakoṭīśateṣu //*

23. For the first of these unlocated stanzas, see the preceding note. The others read:

*yo pi ca cintayi śūnyakadharmān
so pi kumārgapapannaku bālāḥ /
akṣarakīrtita śūnyakadharmās
te ca anakṣara akṣara uktāḥ //*

*śāntapaśānta ya cintayi dharmān
so pi ca cittu na jātu na bhūtaḥ /
cittavitarkaṇa sarvi papañcāḥ
sūkṣma acintiya budhyatha dharmān //*

24. The unlocated stanza reads:

*parinirvṛta loki ta śūrā
yehi svabhāvata jñātimi dharmāḥ /
kāmaguṇair hi caranti asaṃgāḥ
saṅgu vīvarjīya sattva vinentī //*

25. La Vallée Poussin, in the index to his edition of the Mav, claims that Sr 32:5-7 quoted at Mav 200.11ff. is also quoted at Pras 128.13, but the two quotations are definitely not the same. Pras does not seem to contain any passage close to Sr 32:5-7. La Vallée Poussin also wonders whether the stanza in Mav 144.3-6 may be from Sr. We have not been able to locate it in the sūtra.

26. References are to page and line number in Bendall's edition. Cp. the edition of P. L. Vaidya, where most of the passages are identified. We have added a few citations and corrected mistakes in Vaidya's references. Dutt is of the opinion that "Śānti-deva's quotations reveal that he used an earlier copy of MS B." See Du 3, introductory note (unpaginated).

27. Attributed by tradition to Nāgārjuna, perhaps incorrectly.

28. The verse attributed to Sr reads:

*phan tshun gnod pa'i sems su gang byed pa //
de la tshul khrims thos pa skyob mi byed //
bsam gtan dang ni dgon gnas mi skyob ste //
sbyin dang sangs rgyas mchod pa'ang skyob mi byed //*

29. The passage reads:

*yathoktaṃ samādhirājasūtre / tasmāt tarhi kumāra bodhisattvena mahāsattvena
imam samādhim ākāṅkṣatā kṣīpram cānuttarām samyaksambodhim abhisam-
boddhukāmena kāyajuvitānādhyavasitena bhavitavyam / tathā laukikāstasid-
dhayaś ca na prārthayitavyāḥ vikṣepetvād vaivartikatvāc ca //*

30. T 2154 (LV) 480b5. See also T 2153 (LV) 399a6. The catalogues give the length of the translation as one scroll (*chūan*), perhaps an indication that this first translation was only a section of the complete sūtra.

31. Hence the common Japanese title, *Gattō-zanmai kyō* 月燈三昧經. But modern scholars in Japan prefer *Sanmai-ō kyō* 三昧王經, based on the Sanskrit title. Three other texts in the Chinese Canon have similar titles, derived also from the name of one of the characters in the narrative: the *Candraprabha-avadāna* (or *Candraprabhabodhisattvacaryā-avadāna*), the *Candraprabhakumāra-sūtra* and the

Candraprabhabodhisattva-sūtra. These three are each only one scroll in length. The first of these works is the *avadāna* of King Candraprabha, *Yüeh-kuang p'u-sa ching* 月光菩薩經, read *Gakkō bosatsu kyō* in Japanese. It is preserved in two translations (T 153 [5] and T 166) and corresponds to *Divyāvadāna*, no. 22. The second is the "Mahāyāna Sūtra of Candraprabha the Youth," *Yüeh-kuang t'ung-tzu ching* 月光童子經 in Chinese; *Gakkō dōji kyō* in Japanese. It is preserved in three translations (T 534, 535 and 536). The third is T 169 (*Yüeh-ming t'ung-nan ching* 月明童男經; that is, *Gatsumyō dōnan kyō*, also known as the *Yüeh-ming p'u-sa* [*san-mei*] *ching* 月明菩薩[三昧]經 or, in Japanese, *Gatsumyō bosatsu* [*zanmai*] *kyō*). In the first of these works the character's circumstances are not the same as those of the Candraprabha of the Sr, for T 153 (5) and 166 speak of a previous existence of Śākyamuni, in which he existed as a king called Candraprabha. In the last two texts, on the other hand, the principal interlocutor is Candraprabha, the son of a rich guild master of Rājagṛha. This character is probably the same as the Candraprabha of the Sr. The topics treated in these texts, however, are different from any theme in the Sr. For further details see Ono 2.76-78; also, *Buddhist Text Information*, 29: 20-22 and Murakami 1968. Catalogue references are to T 2153 (LV) 399a10 and T 2149 (LV) 270c7.

32. Eleven *chüan* in T 2149 (LV) 270c7; ten or eleven in T 2154 (LV) 543c17 and T 2153 (LV) 399a10. The difference could, however, also be due to error in the catalogues.
33. Cf. T 2154 (LV) 532c2.
34. Cf. Filliozat 1941 and Bendall 1883.
35. Va vii.
36. Va x.
37. Details in section 5.1.2.
38. Matsunami 1965.
39. A manuscript of a complete French translation of the Gilgit text by the late Jean Filliozat is in the possession of his heirs. We have not been able to examine this work. A letter from Pierre Filliozat to Mr. Michael Wurmbrand of Torrance, California (4 January 1985) announces plans for the publication of this translation by UNESCO.
40. This author publishes using two first names, Keinosuke and Hōshū. His last name can also be read Mippara. We follow the more common form Keinosuke Mitsuhara, but list the name under which each article was actually published.
41. This scholar sometimes uses his family name, Hirano, but his works also appear under his adopted name, Murakami. We have referred to all his publications under the latter name, for the sake of consistency, but the actual name under which the article was published is used in the full bibliographic reference, with the other name in parentheses.
42. The pagination of Japanese journals is sometimes complex. We have adopted in all cases the pagination which comes closest to being continuous throughout a given number of the journal, in this case the arabic numerals at the bottom of the page. Some items, especially those printed horizontally, may end on a page with a page number that is lower than that of the first page in the article. The reader will note this pagination; e.g., Matsunami's 1975 edition of the sūtra (included in parentheses in the English translation).
43. In Japan the first word in the title of this journal is transliterated with the old phonetic reading "Hachinohe." The aspiration is no longer present in modern speech or, for that matter, in the orthography of most words, and is not used in

western transliterations. However, we have respected the preferences of the publishers of this journal and retained the ancient spelling.

Notes to the Translation

1. Arabic numerals in parentheses refer to the Sanskrit text. The prefatory stanzas (*praśasti-śloka*), which the Nepalese MSS add at the beginning of the text, have been excluded as being of obviously late origin. They are included in the editions of Dutt and Matsunami; Vaidya places them in an appendix.
2. The opening phrase of Buddhist sūtras has been the object of debate among scholars. The discussions have focused above all on how the formula is to be punctuated, that is, whether it should be read "Thus have I heard. At one time the Blessed One was dwelling in" or "Thus have I heard at one time. The Blessed One was dwelling in." These discussions, however, have not produced conclusive results, since it appears that neither alternative is entirely impossible and that some Buddhist authors were aware of both. See Staël-Holstein 1933: iv; Brough 1949-50; Samtani 1964-65; and Wayman 1974: 59, n. 1. Cf. also Kajiyama 1977. In the present translation we have tried to follow the punctuation actually found in our Sanskrit manuscripts—both Nepalese and Gilgit—where if there is any punctuation it almost always comes after *viharati sma* ("was staying"). For a general discussion of stock phrases in the sūtra see the introduction, section 2.5.

A note is also necessary regarding abstract numbers, a difficulty met not only in the opening of the sūtra, but throughout the text wherever it is a matter of large quantities or measurements. The characteristically Buddhist numerals used to express mythical or fantastic amounts (more appropriately "abstract numbers") are often left untranslated in English renderings, though sometimes an attempt is made to establish exact numerical equivalents. The latter effort is by necessity futile, since the sources are not in agreement as to the "true value" of these numerals, and they usually are not concrete numbers. While there is no point in trying to fix English or mathematical equivalents to these numbers, it is obvious that the Sanskrit terms would say nothing to an English reader. We have opted therefore for the use of English numerals, without attempting to establish an exact numerical equivalent. In a few instances this has meant that the translation could not contain one-to-one correspondences or consistent equivalents.

3. The Chinese text omits much of what stands between this point and the opening formula, inclusive of the description and enumeration of the attending bodhisattvas. The following is a translation of all that the Chinese version has up to this point in the text (T 639 [XV] 549a6-12):

Thus I heard. On one occasion the Bhagavan was staying in Rājagṛha, on the Gṛdhrakūṭa, together with a large community of monks, with a hundred thousand of them, and with eighty million bodhisattvas who were bound to only one birth, with the Bodhisattva Mahāsattva Ajita at their head.

The Four Great Heavenly Kings, and Indra, King of Heaven, chief in the Saha World, and all other exalted gods of great merit, and very exalted and mighty asura kings, nāga kings and yakṣas, gandharvas, kiṁnaras, mahoragas, and both human and nonhuman beings honored, revered and esteemed the Tathāgata.

4. The Sanskrit term *kumārabhūta* is ambiguous. It can mean both "young man" and "prince" or "heir apparent." There is nothing in the sūtra to indicate that the

second possibility should be chosen here, as Candraprabha does not belong to royalty. See also n. 31 to the introduction.

5. There are, of course, technical overtones to this expression, for *adhyāśaya* is the strong or deeply rooted predisposition to follow the Buddha's teachings—a disposition that is founded on the determination and effort of many previous lives. However, the context here seems to require a less technical rendering. Cp. Sr 17:95 and Gv 42:1, 54: 91, 97.
6. This is a free rendering of the hyperbolic *vipulapranidhi mahyam asti chandas*. The first expression, *vipulapranidhi*, is paralleled by Gv 1:60 and 3:39.
7. The last hemistich of this stanza (7d: "indeed . . . luminous") appears contextually to be an interpolation. However, metrically the hemistich seems indispensable. The full line (7cd: "and thinks . . . luminous") is attested by only one MS, which has led some editors to omit the line altogether—Vaidya without acknowledging its existence and Dutt by placing it in a footnote. If the line is omitted, either stanza 6 becomes a six-line stanza (as Dutt and Vaidya print it), or number 7 becomes a two-line verse. Furthermore, the line in question (7cd) agrees metrically with 7ab better than the latter does with 6, suggesting that 7ab cannot be read as part of 6. This and other minor differences in interpretation affect the way stanzas are numbered in various editions and translations. In the present translation we follow Matsunami's numbering.
8. The pun (*sama*, *a-vi-ṣama*) is further expanded in stanzas Sr 1:14–15. Similar figures of speech with the word *sama* are found elsewhere in Buddhist literature, as pointed out in the following note. Cp. also Sr 13:9–10.
9. This stanza develops the pun initiated in the prose section (see the preceding note) and continued in stanza 15. One of the 32 bodily marks indicating a superior person who is to become either a Universal Monarch or Buddha is that his feet rest firmly and evenly on the ground (DN 3:145: *supatitṭhitapādo hoti, samam pādān bhūmiyam nikkhipati*; also DN 3:143, 146). The English translation is in *Dialogues* 3:137, 139. Cp. Lv 106, Mv 2:304 and Mvy 260–66. The attribute *aviṣamapadatā* is included among the eighty secondary marks; see Mvy 278 and *Dharmasaṅgraha* 84(10) in Nishiwaki 1962: 26.
The spiritual interpretation of this attribute is summarized in SN 1:4. Cp. the stock description of an arhant as *ākāśa-pāṇitalasamacitta* (Aś 1.348.4 and *passim*).
10. As the title of the text, as well as the name of the samādhi, this phrase suggests the ambiguity of the topic of the sūtra. It presents some problems of translation. Cp. the introduction, section 2.2, especially n. 7. Variations on the title also occur in the stock phrase referred to in n. 27 to this translation.
11. The following list contains over 300 Buddhist doctrines, ideals and technical terms. The exact number depends to a great extent on the way one chooses to read or count certain sets of epithets or attributes. The Japanese translators of the Sr count 327. The terms are discussed also in chapter XXXIX and in stanzas 56–129 of chapter XVII (see Murakami 1966c). But the sūtra devotes one whole chapter (XXXVIII) to only the first three terms. Murakami, on the basis of a comparison of these chapters, counts 330 terms in chapter I, 297 in chapter XVII and 293 in the combined list in chapters XXXVIII and XXXIX. However, if one assumes that each question phrase in chapter XXXIX marks one item, this chapter contains 265 items, not 290.
The Chinese text counts 316. However, many individual items in the Chinese text do not correspond to those in the Sanskrit list. The overall plan is also different, for the Chinese divides the recitation of terms into 21 separately numbered lists of ten dharmas, and a single, unnumbered series of 106 epithets of the samādhi. The first 210 items are presented as effects of the samādhi, whereas the last 106 are presented as alternate names for the samādhi.

12. Many of the terms from the fourth to the last item in the list are discussed briefly in chapter XXXIX. See the preceding note.
13. Compare this item (Va 5.5) with the item below (Va 5.7, marked by our n. 14 just below). In the latter the notion of the sameness of all forms of rebirth is mentioned as a separate item in the list.
14. See the preceding note. This item is omitted from the list in chapter XXXIX.
15. The phrase is *trimaṇḍala-pariśuddhi-jñāna*; lit. "knowledge of the purification of the three spheres" or "knowledge of purity in three spheres." The usual definition of the "three spheres" is "giver," "act of giving" and "receiver." In chapter XXXIX the term is defined as "not appropriating (*anupalabdhi*) any dharma in the past, the present or the future" (Va 298.11-12), but this is evidently due to conflation with the definition of the previous item in the list, which is missing in the Sanskrit text of chapter XXXIX but found in the corresponding passage of the Chinese and Tibetan editions.
16. In the corresponding discussion in chapter XXXIX, the term is *avikalpa*; we have nevertheless preferred the reading of most MSS of chapter I, as a *lectio difficilior*.
17. *Ajñāna* is interpreted in a nontechnical sense in spite of its definition in chapter XXXIX as *adhyāropa*. See also n. 22 to this translation.
18. The first part of this compound, *āhāranirhāra*, is a highly problematic term (Tibetan: *sgrub pa dang nge par sgrub pa la mkhas pa'i shes pa zas sgrub pa la mkhas pa*). The translation is conjectural.
19. See n. 5 to this translation.
20. The edited text reads *ekālabātmaññatā*, which is both problematic and unsupported by any of Matsunami's MSS. The latter have *ekāramatā ātmajñatā* (P), *ekāramataḥ ātmajñatā* (L), and *ekāramatāpratiṣṭhāna ātmajñatā* (D). The Tibetan, which reads *gciḡ bur dga' ba dang bdag shes pa dang*, also suggests a reading like *ekāramatā ātmajñataḥ*. We have translated accordingly.
21. This item is missing in chapter XXXIX, but is included in chapter XVII, where it is expanded to *buddha-ghoṣa-*, etc. See n. 24 to this translation.
22. See nn. 17 and 23 to this translation.
23. The juxtaposition of *jñāna*, *vidyā* and *avidyā* creates some problems for the translator. According to chapter XXXIX, *jñāna* refers to knowledge in a general sense, both common (*laukika*) and supramundane (*lokottara*) cognition, whereas *vidyā* refers specifically to knowledge that is in agreement with reality and properly focused on the real (*yonīśas*). But elsewhere the same chapter seems to identify the two terms; cp. the translation of *ajñāna*, nn. 17 and 22 to this translation.
24. These three types of *kṣanti* are mentioned elsewhere in the sūtra (see, e.g., Va 118.5 and 135.23). However they do not seem to correspond exactly to the three types of patience discussed in chapter VII (see, e.g., Sr 7:22). Cf. also n. 21 to this translation.
25. The same stock phrase occurs in chapter XL (Va 303.11-17). In chapter XIX (Va app., 326.12-17) the earth's shaking is described with eighteen verbs followed by a shorter version of the six ways (or directions) of the earth's movement. This description is also prefaced by the word *śadvikāram*. The passage is missing in the Gilgit MS and the Chinese, but found in the Tibetan text. Cp. the earthquake on the occasion of the Buddha's death (DN 2:156) at the time of Māra's defeat (Lv 318-19) and on the Buddha's enlightenment (Lv 352). Mvy 3000-31 lists thirty-one ways in which the earth shakes, including the twelve verbs denoted by the phrase above.

26. Vaidya places the introductory passage in an appendix (app. I, no. 4) because it is lacking in the Gilgit MS. The Chinese translation also omits this portion; see n. 29 to this translation.
27. This stock phrase on preserving and propagating the sūtra (see the introduction, section 2.5) occurs with very minor variations at the beginning of chapters III, XVI (Va app. I, no. 17), XX (Va app. I, no. 21), XXIII, XXIX, XXX, XXXI, XXXII, XXXVI (Va app. I, no. 36), XXXVII and XL, and, with major changes, in chapters VIII and XVIII. It is not found in the Gilgit or Chinese MSS. The expression translated here as “developing a sense of solitude” (*araṇā-bhāvanā*) appears in some of these occurrences (e.g., chapters III and XVI). Its translation is problematic. More standard seems to be *araṇā-vihāra*. See BHSD, s.v. *araṇā*. Cp. also Sr 79.7 (*araṇābhūmiḥ / śāntabhūmiḥ / sarva-prapañcasamucchedaḥ*) and Régamey 1938: 34 (= 8§16; Va 312, from Du’s MSS A and B and Tibetan). Also MN Sutta No. 139 (*Araṇavibhaṅgasutta*), Aṣṭa 3.29, Conze 1974: 35.8 and the references in Lamotte 1962: 154 n. 27. The term has been discussed by Walleser 1917: *passim* and Conze 1974: 97f.
28. Given the position of this phrase, one could assume that the antecedent for *tasya* (“his”) is *saṅgha*, as a collective noun for the Buddha’s disciples, since the Buddha’s own life-span is mentioned below. However, it seems more reasonable to assume a mechanical repetition than to assume that the text attributes to the Buddha’s disciples the same life-span as to the Buddha.
29. Here ends the introductory passage that is missing in the Gilgit MS.
30. The first section of this chapter—all that precedes the verses—is missing in the Chinese translation. Instead, the Chinese has the following (T 639 [XV] 551a11-13): “At that time in the midst of the world, in all of the regions within the Cakravāḍa, there was a great darkness, and all living beings looked about in awe. Each of them was startled and said, ‘How is it that suddenly there should appear here a man of this kind?’ Thereupon the World Honored One spoke these verses:”
Perhaps this section arose from a misreading of the end of chapter I, in which the inhabitants of the Avīci hells look around, see each other and remark, “so there are others here.” The origins of this passage are unclear, but it does seem that an originally shorter ending to chapter I has been turned into an introduction to chapter II.
31. This is the traditional formula for beginning a *pūrvayoga* or account of a previous existence of a buddha. Cp., e.g., Sr 16:1.
32. The form *Sahā* is the more common, but we have adopted throughout the reading of the MSS, *Sahā*.
33. The Sanskrit has simply “purity” (*dhūta*), which we take as an abbreviation of *dhūta-guṇa*. See the following note.
34. We have assumed that with the expression *dhūtān samādāya guṇāms ca vartate*, the Sanskrit text intends the technical compound *dhūta-guṇa*, broken up for metrical reasons. We base our assumption on the context of this stanza, on that of stanza 19 and on the evidence collected by Edgerton (BHSD, s.v. *dhūta*). If our assumption is false, the two verses (19b and 25b) should be translated, respectively: “is committed to the forest life and is established in purity” and “one who, having adopted [these] pure qualities, abides in them.”
35. There is some confusion in the manuscripts regarding the title of this chapter. Some of the Nepalese versions call it “Buddhānusr̥ti,” reserving the title “Samādhi” for the fourth chapter.
36. The preceding verb, *pratisamsīkṣate*, in this context clearly refers to the practice of *buddhānusr̥ti*, which is the subject of this paragraph (see BHSD, s.v.).

37. For this and the preceding verse see Nāgārjuna's *Ratnāvalī*, III.59–60, in Hahn 1982: 83.
38. A reference to the *bodhicitta*, the thought or will of attaining enlightenment, expressed in stanzas 7 and 8.
39. This translates the Sanskrit text literally, but the expression is problematic, since it would not be proper etiquette for a monk to refuse an invitation.
40. The theme and stock phrase of the four-lined verse is repeated later in the sūtra. Cf., e.g., Sr 11:58, 24:64–67 and 32:6. See also stanza 16.
41. See the introduction, section 2.2 and nn. 10 and 11.
42. Dutt, following the Gilgit text, omits the opening passage up to our n. 43 just below, giving the text instead in a note.
43. Gilgit begins with the next words.
44. This seems to be a case of a double etymology (*pra-hā/pra-dhā*) lending itself to an obvious Buddhist pun. The word *prahāṇa*, according to the *Mahāvīyūtpatti*, has two seemingly opposite meanings. One is “exertion”; *vyāyacchate* 勤 (Mvy 962); *vīryam ārabhate* 精進立, 發精進 (Mvy 963). The other is “becoming free from” or “abandoning.” In section XXXIX the Mvy cites *catvāri prahāṇāni*. Except for the second occurrence, the other three, though named *prahāṇāni*, not only do not include the term *prahāṇa* but apparently do not imply any concept of abandoning. The Mvy adds two other synonymous expressions; that is, *cittam praḥhnāti* 心極持 (964) and *samyak pradhāti* 眞實坐, 用眞實工夫 (965).
- Edgerton (BHSD, s.v.) rejects the negative meaning “abandonment” as impossible, adopting “exertion” or “strenuosity.” He thinks “exertion” in the sense of Pali *padhāna* is implausible. However, one should consider carefully the context of this term in Buddhist practice. Becoming free is the goal of Buddhist exertion. The Pali equivalent in the noun form, *padhāna* (= *padahāna*), conveys the meaning which Edgerton wrongly rejected as implausible. The Mvp 1481 gives the fourth of the *catvāri dhyānāni* as *sa sukhasya ca prahāṇād duḥkasya ca prahāṇāt pūrvam eva ca saumanasya-daurmanasyayor astaṅgamād aduḥkhasukham upekṣāsmrtipariśudham caturthaṃ dhyānam upasampadya viharati*. This passage undoubtedly suggests the original usage of the term *prahāṇa*: “getting free from,” “abandoning” or “giving up.”
45. Lit. “patient acceptance agreeing with emptiness with respect to all dharmas” (*sarvadharmesu śūnyatānulomikī kṣāntiḥ*).
46. This stanza is highly problematic. We interpret *yasyārthi* as *yasya arthe*. The Chinese translation reads:

If for the sake of food one gives rise to a jealous mind,
 The moment one perceives that the food is already impure,
 The karmic input is immeasurable and the fruit is obtained (?),
 If [then] one examines this deeply, he is able to attain the samādhi.

T 639 (XV) 553a21–22:

若爲食起嫉妬心	當觀食已無有淨
用功無量乃得成	若深觀此能得定

The Tibetan translators seem to have been equally confused by this passage. They render: “Why should one give rise to karmic seeds and consequences through desire and enjoyment? If one examines this point, this samādhi is not difficult to attain.” The Tibetan text (P 795 [*mdo, thu*, 14b3–4]) reads:

yongs su tshol dang kun tu long spyod dang //
kha zas rgyu 'thun dag ni gang gi phyir //
phrag dog skyes pa de la rab tu rtogs //
ting 'dzin 'di ni rnyed par yod mi dka' //

Tamura and Ichigō's modern Japanese translation construes the stanza as follows: "Even though an envious mind should repeatedly arise [in him] with respect to (worldly) gain, if he examines carefully the source and the outcome that this (worldly gain) produces in this world, from the point of view of (the means) by which one strives for it and the ways of enjoying it, (if [in this way] he has stopped envy for worldly gain), for such a one. . . ." See Tamura and Ichigō 1975: 1.109.

A free, interpretive, reading of the Sanskrit would be: "If one should become envious of the worldly possessions of others, this samādhi can be easily obtained—that is, if one examines the way in which this envy will create a karmic base and a karmic consequence—observing these possessions from the point of view of what he expects from them and what he will actually get from them." The verse is not commented upon in the *Kīrtimālā*.

47. "Composed" translates here *samāhita*, which in vs. 13 is rendered "collected." Etymologically related to samādhi, the word is meant to pun here with the theme of the sūtra. We have chosen to render the term "collected" when the context is that of the active practice of meditation and mental concentration and "composed" when referring to the state of calm sought in meditation and believed to correspond to the inherent peace of all things.
48. We interpret the *nayu* of all Nepalese MSS as *na ayam*. The Tibetan text suggests the translation "Those who seek after this auspicious samādhi never have thought of fear." A corresponding Sanskrit is difficult to imagine.
49. Reading with the Gilgit text. Ma reads: *yaś caṅkrame ca krami bodhisattvaḥ /*.
50. This is the topic of chapter XXII. See especially Sr 22:35.

INTRODUCTORY NOTE*

Since the Gilgit manuscript of the *Vajracchedikā* has already been edited twice, the reasons for another edition may not be altogether apparent. There are, however, several good reasons for a reedition. First of all, the manuscript of the *Vajracchedikā*—which contains in addition three other texts—is one of the most carefully written of the Gilgit finds. In the introduction to his edition Chakravarti, for example, notes with regard specifically to the text of the *Vajracchedikā* that the manuscript “is remarkably free from errors. . . . The few mistakes which occur are mainly orthographical or are due to oversight.”¹ The Gilgit text of the *Vajracchedikā* is, in fact, a fine example of what a *Prajñāpāramitā* text in Sanskrit prose actually looked like in the sixth or seventh century, as opposed to how we—under the watchful eye of Pāṇini and the influence of the expectations derived from much later, mostly Nepalese, manuscript traditions—might think it should have looked. In consequence the manuscript has considerable significance for the history of the “style” of this literature, as well as for the history of the language *as it was actually written*. This is especially so in regard to syntax and the use of sandhi and sandhi forms.

But, if all of this is true, then it is of some importance to have as accurate an edition of the manuscript as is possible, and this brings us to a second good reason for making another edition of the text: both of the previous editions are full of mistakes and distortions. Since all of these will be signaled in my notes, there is no reason to cite them here and we might simply note the broad types of errors that occur in the editions.

In Chakravarti’s edition, for example, in less than ten pages of romanized Sanskrit there are at least twenty-nine cases in which the manuscript has, correctly, a long vowel, which Chakravarti reads or prints, incorrectly, as a short vowel. There are at least seven cases in which the opposite occurs, that is, what in the manuscript is, correctly, a short vowel is printed in Chakravarti’s edition, incorrectly, as a long

*The initial work for this text edition and translation was made possible by a grant from the Translations Program of the National Endowment for the Humanities, an independent federal agency.

vowel (virtually all of these mistakes occur at the ends of words and involve case endings, gender and number distinctions, etc.). There are at least six cases in which the manuscript has, correctly, a plural verb form, but in which Chakravarti prints, incorrectly, a singular. There are at least thirty-two cases in which Chakravarti omits an *anusvāra* found in the manuscript, printing an *-m* instead, and at least nine places where Chakravarti's edition omits entire words which are found in the manuscript. Although I know very well from experience that some mistakes are always made in working from manuscripts, this, I think, is a little excessive.

Dutt's edition is equally problematic and gives an equally distorted impression of the manuscript. He, for example, completely misrepresents the sandhi found in the manuscript. There are at least thirty-seven cases in which a perfectly correct sandhi in the manuscript is printed by Dutt as an unresolved hiatus (*-y + a-* printed as *-i a-* eight times; *-e-* printed *-a i-* five times; *-ā-* printed as *-a a-* ten times; *-ai-* printed as *-a e-* four times; *-o-* printed as *-a u-* seven times, etc.). His treatment of *anusvāra* and the nasals is equally problematic. In addition to this, there are five places where he adds words—once a whole line—which are not found in the manuscript, four places where he omits words—again, in one case a whole line—which occur in the manuscript, and in four more places he brackets words which actually occur in the manuscript.

There are yet other reasons for undertaking a new edition of the Gilgit text. Its appearance might serve to stimulate a badly needed critical investigation and revision of other editions of the text. The edition of the late Edward Conze, for instance, has become the standard one, and has recently been reprinted. Yet it is of very dubious value from a text-critical point of view. Conze's edition, for example, is badly conflated. He mixes texts of clearly different recensions and widely different dates, and does so with a high degree of arbitrariness. He says in his introduction that the text he wants to present "is substantially that of Max Müller" which "is based on three documents, all comparatively late."² But at 14b, for example, he reads *na mama bhagavan duṣkaram*. *Duṣkaram* is not the reading in any of Müller's three sources, the Gilgit text or the Tibetan translation. All of these sources read *āścaryam* (*ngo mtshar*). In spite of this, and without any stated justification, Conze adopts the reading found in Pargiter's Central Asian manuscript (which is probably a thousand years earlier than the manuscripts on which Conze's basic text is based) and the "reading" found in Kumārajīva's translation. This, of course, is not a terribly significant example, but it is typical of one aspect of Conze's methodology. We might look at another

case which underscores even more clearly the arbitrary nature of Conze's editorial procedures. At the end of his 17c he omits an entire passage which is found in Müller's edition (i.e., Conze's basic text), because it is not found in Kumārajīva, Pargiter or the Tibetan text. It is also not found in the Gilgit text (although Conze fails to note this) and therefore we can "infer," he says, that it "is a later addition which has crept into the text after 800 A.D."³ He also adds that "it is also doctrinally suspect . . . contradicting the whole of Buddhist tradition" and, he says elsewhere, "the idea is contrary to the tradition of the Prajñāpāramitā."⁴ Obviously, if each editor were allowed to exclude passages which contradicted what he thought was "the whole of Buddhist tradition" or "the tradition of the Prajñāpāramitā," the resulting text would be little more than a personal document. If, on the other hand, Conze excludes the passage primarily on the grounds that it does not occur in Kumārajīva, Pargiter, the Tibetan and Gilgit texts, then he must also exclude passages like *evaṃ parityajan gaṅganadīvālukāsamān kalpāms tān ātmabhāvān parityajet* at 13e, *'grayānasamprasthitānām sattvānām arthāya śreṣṭhayaṅnasamprasthitānām arthāya* at 14a or any number of other passages, each of which is omitted in all four sources.

In regard more specifically to the Gilgit text it should be noted that Conze's notes to his edition reproduce all the errors in Chakravarti's edition, and that there are a number of cases in which Conze's notations in regard to the Gilgit text are wrong or misleading. For example, at 15b he notes that *na-abodhisattva-pratijñaiḥ sattvaiḥ śakyam ayam dharmaparyāyaḥ* is missing in the Tibetan translation, but he does not note that it is also missing in the Gilgit text. Clearly, then, the text established by Professor Conze can only be used with the greatest circumspection, and a new critical edition is badly needed. The discovery of three new manuscripts of the *Vajracchedikā* in Nepal makes such an edition even more desirable.⁵

Given the fact that the Gilgit manuscript of the *Vajracchedikā* represents both an early and a well-written text, and given the fact that one of my primary purposes is to provide a readily available example of what a *Prajñāpāramitā* text in the sixth or seventh century actually looked like, I have chosen to present, not an edition of the manuscript, but a transcription. I have added a series of notes—in the most economical way possible—signaling the errors and silent alterations which appear in Chakravarti's and Dutt's editions. I have offered virtually no emendations, conjectures or "corrections." The text stands almost exactly as it occurs in the manuscript. This is true of the punctuation as well. I have simply reproduced the punctuation found in the manuscript, which is, I might add, usually good. I have added no grammatical or syn-

tactical notes, although there are things of interest which fall into both categories, nor have I catalogued sandhi forms. I have, in fact, done very little except try to present as accurately as possible the text as it is found in the manuscript.

In presenting the transcription I have, for the sake of economy, not used footnoting or footnote numbers. I first give the transcription of the folios line by line. The second section of the article consists of a series of notes for each line of each folio indicating the misreadings and errors concerning that line found in the published editions. The word or words in my transcription that have been wrongly read or printed by Chakravarti, Dutt, etc., are signaled in these notes by bold face type, and they are followed by statements giving the reading found in Chakravarti, Dutt, etc.

In addition to the transcription and notes, I have provided a translation. The translation is included for two basic reasons: first, to allow those who cannot read Sanskrit, but who are interested in the text, to be able to see what an early version of this text looked like and, second, because I think, rightly or wrongly, that the available English translations of this text can be usefully supplemented by another interpretation. That, in the end, is what every translation is. The first of these reasons has also very largely determined the kind of translation I have given. Apart from having paraphrased some recurring rhetorical phrases, I have tried, in the main, to stay as close to the text as possible. This procedure has, I hope, preserved some of the "style" of the original. It has, I know, resulted in what might most politely be called a "Sanskritic" English. I can here only repeat the words of an obscure scholar writing some years ago: "In reference to the translation given here, it should be noted first that it was not intended to be beautiful. In this, I am afraid, I have succeeded beyond even my greatest expectations."

I have added to the translation a few notes, especially where there are textual uncertainties or where I thought a particular point needed further interpretation. The notes are obviously incomplete and clearly reflect my own particular interests.

TRANSCRIPTION OF THE GILGIT TEXT

TEXTUAL NOTES

Folio 5a

1. **yā(vat) subhūt(e)** MM, Cz, Tib *tat kim manyase subhūte yāvat*, but Cz's notation for G and Par is wrong; they both have *yāvat subhūte*, and both omit *tat kim manyase*. **kaccit** Chak w. *kaścit*, which is cited by Cz. **vahu** Chak, Du w. *bahu*. **āha** Cz *subhūtir āha*, but with no indication that G and Par omit *subhūtir*. **bahu bhagavan tat prthivīrajaḥ** Cz's notation for Par is wrong here; although it has more than G it too omits *bahu sugata*. **arajas tathāgatena** Du w. *arajas tat tathāgatena*, probably under the influence of MM and Par. **bhāṣitas** Du w. *bhāṣitam*; cf. Chak n. 1 on page 182.
2. **adhātuḥ** Chak w. *adhātum*; because of his insertion of material from MM, Du's sandhi does not correspond to that found in the MS. **bhāṣitas** Du w. *bhāṣitaḥ*. **dvātrīṃsatā** Du w. *dvātrīṃsan*; Cz cites G w. as *dvātrīṃsatā*.
3. **āha** Cz *subhūtir āha*, but with no indication that both G and Par omit *subhūtir*. **no** Cz *no hīdam*, and while he indicates that Par has *no iti* instead, he does not indicate that G both omits *hīdam* and has nothing corresponding to Par's *iti*. **bhagavaṃs** Du w. *bhagavan*; after *bhagavan* Cz has *na dvātrīṃsanmahāpurusa-lakṣaṇais tathāgato 'rhan saṃyaksambuddho draṣṭavyaḥ*, which he indicates is missing in G and Tib; he fails to note that it is also missing from Par. **heto tāni tāni** Chak w. *hetor yāni tāni*; Du w. *hetoḥ / yāni [hi] tāni*; although the first *tāni* is slightly blurred, it is clearly not possible to read *-r yāni*. Cz has *hetoḥ yāni hi tāni bhagavan*; he indicates only that G omits *hi*, but in fact both *hi* and *bhagavan* are omitted by both G and Par as well as Tib. **bhāṣitāny alakṣaṇāni** Du w. *bhāṣitāni alakṣaṇāni*. **tenocyante** Chak, Du w. *-ocyate*. **mahāpurusalakṣaṇānīti** Chak w. *-lakṣaṇānīti*; Du w. *-lakṣaṇāni iti*.

4. **gaṅgānadībālukopamān** Chak, Du w. *gaṅgānadīvālukopamān*. **parityajed** Chak w. *parityajyed*; Du w. *parityajet*. **catuṣpadikām** Chak, Du w. *catuṣpādikām*; cf. Par. **deśayed** Du has *deśayet* because he inserts after it a piece of text from MM and is therefore "required" to alter the sandhi found in the MS. This kind of thing is very frequent in Du and will not normally be noted hereafter. MM and Cz add *samprakāśayed* after *deśayed* and, while Cz indicates that this is missing from G, he does not indicate that it was probably also missing from Par; cf. Par n. 4 on page 183.
5. **asaṁkhyeyaṁ** Chak, Du w. *-am*. **āyusmām** Du w. *-an*. **subhūtir** Du w. *-iḥ*. **dharmapravegenāsrūṇi** Chak w. *-pravegenāsrūni*; Du w. *-pravegeṇāsrūni*. Both here and in the following 'srūṇi the dental s is quite clear. Cz has *-vegena-* without noting G's *pra-*. **prāmuñcat** Du w. *prāmuñcat*. **'srūṇi** Chak w. *'srūṇi*; Du w. *'srūni*. **prāmṛjya** Du w. *pramṛjya*, but cf. his n. 4 on page 152.
6. **bhagavaṁ** Du w. *bhagavan*.
7. **samanvāgatā** after *samanvāgatā* MM, Cz have *bodhisattvā*; Cz indicates this is missing in Par and G, but not that it is also missing in Tib which has *sems can de dag ni*. **bhāṣyamāṇe** after *bhāṣyamāṇe* MM, Cz have *śrutvā*; Cz indicates it is missing in Par and G, but it is also missing in Tib. **saivāx-m(j)-x-ā xsmāt** Chak *saiwābhūtasamjñā tasmāt*, but this is clearly too much for the space in the MS; Du has *saiwā[bhūta]samjñā tasmāt*, the reading of MM. Although mostly obliterated, it is virtually certain from the MS that there were only three akṣaras in the space, and enough remains to indicate that the first two were probably *samjñā*; the third akṣara would then have been *ta-*. Par has *saiwāsamjñā tasmā* and Tib *de nyid 'du shes ma mchis pa . . . de bas na*. Read: *saiwāsamjñā tasmāt*.

Folio 5b

1. **(bh)ūxxx(bh)ūtasamjñeti** since MM and Par have *bhūtasamjñā bhūtasamjñeti* (so MM; Par *-samjñā iti*), and since this would fit the gap perfectly, it is safe to assume that G too read *bhūtasamjñā bhūtasamjñeti*, which is also the reading of Tib. **āścaryaṁ** note that Cz rejects *āścaryaṁ*, the reading of G, MM and Tib, and prefers *duṣkaraṁ*, the reading of Par and Ku. **bhāṣyamāṇam** Chak

- w. *bhaṣyamāṇam*. **avakalpayāmy** Du w. *-kalpayāmi*. **adhimucya** Du w. *adhimucye*; the reading of G could be the result of the loss or accidental omission of the vowel sign. **satvā** in both MM and Cz the following passage occurs after *satvā*: *bhaviṣyanti anāgate 'dhvani paścime kāle paścime samaye paścimāyāṁ pañcaśatyāṁ saddharmavipralope vartamāne ya*. Cz indicates that all of this is missing in G, but he does not indicate that Par too omits the greater part of it. Par probably had only *paścimāyāṁ pañcaśatyāṁ* and no more. Tib too, though fuller than Par, omitted *anāgate 'dhvani* and *saddharmavipralope vartamāne*, but Cz does not indicate this either. **imaṁ** Cz has *bhagavan* after *imaṁ* and he does not indicate that it is omitted by G, Par and Tib.
2. **paramāścaryasamanvāgatā** Du adopts the reading of MM and Cz: *paramāścaryeṇa samanvāgatā*, though he cites the actual MS reading in his n. 2. Cz indicates that G reads *paramāścaryasamanvāgatā*, but he does not indicate that Par has the same reading. **api tu khalu punar** Chak w. *api khalu*; Cz, following Chak, indicates that *tu* and *khalu* are missing in G; this, however, is not the case. Note that what I have read as *tu* in G could also be read as *tr*. **pravartsyate** Du w. *pravartisyate*. **na satvasaṁjñā na jīvasaṁjñā** Du w. *na jīvasaṁjñā na satvasaṁjñā*; that is to say, Du has here inadvertently inverted the order. **pudgalasaṁjñā** after *pudgalasaṁjñā* Cz has *pravartisyate na-api teṣāṁ kācit saṁjñā* (read -ā) *na-a-saṁjñā pravartate. tat kasya hetoḥ. yā sa bhagavann ātmasaṁjñā* (read -ā) *saiva-a-saṁjñā yā sattva-saṁjñā jīvasaṁjñā pudgala-saṁjñā saiva-a-saṁjñā*. Cz's notation here is very confused and incomplete. First, he indicates that *na-api teṣāṁ kācit saṁjñā na-a-saṁjñā pravartate* is not found in Par, but he does not indicate that it is also missing in G and Tib. Secondly—and here probably the result of a printing error—since there is a marker at the end of the passage, but no marker at the beginning to indicate where the omission begins, it is not clear that G omits all the rest of this passage as well. **sarvasaṁjñā(pagatā)** in Chak this is printed by mistake as *sarvasaṁjñā pagatā*.
3. **bhagavān āha** where G has only *bhagavān āha*, Cz has *evam ukte bhagavān āyusmantam subhūtim etad avocat* (= Par, MM, Tib); this is not noted in Cz. **ya** Du w. *yatra*. **saṁtrasiṣyanti** Chak w. *saṁtrāsiṣyanti*; Du w. *santrasiṣyanti*. **sa(m)trā(sam)** Chak w. *saṁtrasam*; Du w. *santrāsam*.

4. **paramapāramiteyaṃ** in Chak this is printed by mistake as *paramapā ramiteyaṃ*; Du w. *paramapāramitā iyaṃ*. **yāṃ ca** after *yāṃ ca* Cz adds *subhūte* without a note; but *subhūte* is not found in G, Par or Tib. Moreover, just before *yaṃ ca* Du adds without brackets *yadutāpāramitā*, which he appears to have taken from MM. **aparimāṇā** after *aparimāṇā* Du adds without brackets or a note *api*; this does not occur in the MS or in Tib (Par is fragmentary). **buddhā** Chak w. *buddha*.
5. **-ramapāramiteti** Du w. *-pāramitā iti*. **ya** Chak, Du w. *yā*. **kali-rājāṅgapratyaṅgamāṃsāny** Chak w. *-pratyāṅga-*; Du w. *kali-rājo 'ṅgapratyaṅgamāṃsāni*. MM and Cz both read *kaliṅga(-)*; cf. the former's n. 2 on page 31 and the latter's n. 5 on page 41.
6. **tasmin** Chak misprinted as *ta-asmin*. **jīvasaṃjñā** the akṣara I have transliterated *jī* may in fact have a superscribed *r*. **'bhaviṣyad** Du w. *abhaviṣyat*. **atīte 'dhvani** Chak w. printed *atītedhvani*; Du w. *atīte adhvani*. **pañca** Du w. *pañca*.
7. **yo 'haṃ** Du w. *yadāhaṃ* with the following note "MS. *yemām*." The *yo*, however, is very clear and beyond any doubt. What Du takes as *mām* I read with reservations *haṃ*; these two akṣaras can look very much alike. **kṣāntivādī** Chak w. *-vādī*. **abhūvaṃs** Du w. *abhūvaṃ*. **nātmasaṃjñābhūn** Du w. *nātmasaṃjñā abhūt*; Cz *na-ātmasaṃjñā babhūva* with no note citing G. **varjayitvā** Cz *vivarjayitvā* with no note citing G.

Folio 7a

1. **mamāṃsena** Chak, Du w. *samāṃsena*; MM and Cz also read *samāṃsena* and Cz adds a note (pages 116-17) in which he seems to want to account for the fact that the reading *samāṃsena*, which he thinks is correct, does not correspond to the reading of Tib. Tib has *nga'i byang chub phrag pa la thogs par 'gyur ro* and this, of course, corresponds exactly with the actual reading of G. Both Chak and Du must have been influenced by MM. Although the initial *ma-* is, in the MS, slightly smudged at the bottom, the dental *s*—which cannot be confused with the palatal *ś* in this script—is absolutely certain and there is virtually no possible doubt that G reads *mamāṃsena*. Tib then, unlike Cz, MM, Chak and Du, clearly reflects the "true" reading, and the recognition of this reading renders the remarks of Cz (page 116) superfluous. Note too that

Cz's text has between *-rimāṇena* and *sarve* the phrase *puṇyaskandhena samanvāgatā bhaviṣyanti* which is not found in G, although Cz does not indicate this. The same applies to the *subhūte* between *te* and *sattvāḥ* in Cz.

2. **sthānaṃ** Chak w. *sthānānī*, which Cz cites in his note. **pṛthivī-pradeśe** Du w. *-pradeśa*. **prakāśayiṣyati** Chak w. *-iṣyate*.
3. **caityabhūta** Du w. *-bhūtaḥ*.
4. **satvānām** Chak omits *satvānām* although it is in the MS. The *subhūte* preceding *satvānām* in Cz is not found in G. **-janmikāny** Du w. *-janmikāni*.
5. **apāyasaṃvartanīyāni** in Chak this is misprinted as *apāya saṃvartanīyāni*. **tāni** Chak omits *tāni* although it is in the MS; it is, however, not found in MM and Cz. **'dhvany** Du w. *'dhvani*.
6. **ddīpaṃkarasya** Chak w. *ddīpaṃkarasya*; Du w. *dīpaṃkarasya*. **caturaśītir buddhakoṭīniyutaśatasahasrāṇy** Chak w. *caturaśītibuddhakoṭi-*; Du w. *caturaśītibuddhakoṭīniyutaśatasahasrāṇi*. **ārāgya** Chak w. *ārāgyā*, which is cited in Cz's notes.

Folio 7b

1. **bhagavanta** Du w. *bhagavantaḥ*. **carime** Du reads *carime*; Chak *varime*. I am not certain; *va-* and *ca-* can be virtually indistinguishable. **pañcāśatyāṃ** Du w. *pañcaśatyāṃ*. **varttamānāyām** Du emends to *vartamāna* and in his n. 2 w. cites the MS as *vartamānāyām*. **imāṃ** Du w. *imān*.
2. **pūrvakaḥ** Cz reads *paurvakaḥ* and, although he notes the reading of Par, he does not cite G. **śatatamīm** Chak w. *śatamīm*. **kalān** Du w. *kalām*. **apy** Du w. *api*.
3. **kulaputrāṇām** Chak w. *-pūtranām*. **kuladuhitṛiṇām** Du w. *-duhitṛiṇām*. **ca** Chak omits *ca* although it is found in the MS; its presence in G is not noted in Cz. **bhāṣeyaṃ** Du w. *bhāṣeya*. **yāvantaḥ te satvā** Du emends to *yāvat te* and cites the MS in his n. 7 where he w. gives *sattvāḥ*.
4. **parigrahīṣyanti** Chak, Du w. *prati-* which is also the reading of MM and Cz. **asyācintya** Du w. *asya acintya*.

5. **āha** where G has only *āha* Cz has *atha khalv āyusmān subhūtir bhagavantam etad avocat* (MM and Tib also have this reading), but Cz has not noted G. **pragṛhītavyaṁ** Chak w. *pragrahītavyaṁ*; Du w. [*pra*]grahītavyaṁ; Du's brackets are here more than usually mysterious since *pra-* is quite clearly in the MS. **bodhisatvayāna-saṁprasthitenaivaṁ** Chak w. *-(aivam)*; Du w. *-tena evaṁ*.
6. **-dayitavyaṁ** Chak is misprinted as *-dayita vyaṁ*.

Folio 8a

1. **pravartteta** Chak, Du w. *pravartteta*.
2. **dīpaṅkarasya** Du w. *dīpaṅkarasya*. **tathāgatasyāntikād** Chak w. *tathāgatasya antikād*. **samyaksaṁbodhim** Chak w. *-sambodhim*. **abhisāmbuddhaḥ** Chak w. *-sambuddhaḥ*. **āha** Cz has *evam ukta āyusmān subhūtir bhagavantam etad avocat* instead of G's *āha*, but the reading of G is not noted.
3. **tathāgatasyāntikād** Du w. *-āntikāt*. **anuttarā** Chak, Du w. *anuttarām*. **samyaksaṁbodhim** Chak w. *-sambodhim*. **abhisāmbuddhaḥ** Chak w. *-sambuddhaḥ*. **āha** Cz has *evam ukte bhagavān āyusmantam subhūtim etad avocat* instead of G's *āha*, but the reading of G is not noted. **vyākṛto** Du w. *vyākṛtaḥ*. **bhaviṣyasi** Du reads *bhaviṣyasi* but cites the MS w. in a note as *bhaviṣyāmi*. **mānavānāgate** Chak w. *mānavānāgate*; Du w. *māṇava anāgate*.
4. **samyaksaṁbuddhas** Chak w. *-sambuddhas*; Du w. *-buddhaḥ*. **tathāgata** Chak is misprinted as *tathā gata*. **adhivacanaṁ** Du w. *-vacanaṁ*. Cz notes that a passage is added in MM after *-vacanaṁ* which is not found in Ku, Par and Tib; it is also not found in G although Cz does not note this. **tathāgatenānuttarā** Du w. *tathāgatena anuttarā*; he also w. cites the MS reading in n. 2 as *anuttarām*. **samyaksaṁbodhir** Chak w. *-sambodhir*; Du in his n. 2 w. cites the MS as *-sambodhim*. **abhisāmbuddheti** Chak w. *-sambuddheti*; Du in his n. 2 w. cites the MS as *-sambuddhaḥ*.
5. **tathāgatenānuttarā** Du w. *tathāgatena anuttarām*. **samyaksaṁbodhir** Du w. *-bodhim*. **abhisāmbuddhaḥ** Chak w. *-sambuddhaḥ*. **mṛṣāḥ** Chak reads w. *mṛṣaḥ* and then adds a note saying "Rd. *mṛṣā-*," but the MS does read *mṛṣāḥ!* Du w. *mṛṣā*. It is pos-

sible, of course, that what I have transliterated here as *-h* was intended only as a mark of punctuation.

6. **-sarvadharmā iti** Chak has w. omitted *sarvadharmā iti* and Cz, as a consequence, w. indicates that it is missing in G. **tenocyante** Chak w. *tenocyate*, which Cz cites; Du w. *tena ucyante*. **bhaved** Du w. *bhavet*.

Folio 8b

1. **bhāṣita** Du w. *bhāṣitaḥ*. **bhāṣitas** Du w. *bhāṣitaḥ*. **tenocyate** Du w. *tena ucyate*. **etat** Du w. *etate*.
2. **vaded** Chak, Du w. *vadet*. **parinirvāpayiṣyāmīti** Du w. *-nirvāpayiṣyāmi iti*. **āha** Cz has *subhūtir āha*, without noting that G omits *subhūtir*.
3. **niḥsatvāḥ** Cz's notation here is potentially misleading since it seems to suggest that G reads *sarvadharmā niḥsattvāḥ*, which is not the case. **sarvadharmāḥ** Du w. *-dharmā*. **vaded** Du w. *vadet*. **niṣpādayiṣyāmīti** Chak w. *niṣpadayiṣyamīti*; Du w. *niṣpādayiṣyāmi iti*.
4. **kṣetravyūhāḥ kṣetravyūhā iti** Chak w. *kṣetravyūhā iti*, omitting one of the two *kṣetravyūhās* found in the MS; Cz w. follows Chak. **bhāṣitās** Chak w. *bhāṣitas*. **tenocyante** Chak w. *tenocyate*, which Cz cites; Du w. *tena ucyante*. **bodhisatvo** Chak is misprinted as *boodhisatvo*. **nirātmāno** Chak w. *nirātmano*.
5. **-tmāno** Chak w. *nirātmano*. **bodhisatva** Cz reads *bodhisattvo mahāsattva* and, although he notes that G has a second *bodhisatva* in place of *mahāsattva*, he does not note that Par agrees with G. **ā(khyāta)s** Du w. *ākhyātaḥ*. After *ākhyātas* Cz has *bhagavān āha*, but he does not note that this is missing in G, Par and Tib. **āha** Cz has *subhūtir āha* without noting that it is missing in G and Par.
6. **cakṣuḥ** Du w. *divyacakṣuḥ*. **prajñā(ca)kṣur** Du w. *-cakṣuḥ*. **dharmacakṣur** Du w. *-cakṣuḥ*. **āhaivam** Du w. *āha evam*.

Folio 9a

1. **divyaṃ cakṣuḥ** Du w. *divyacakṣuḥ*. **pra(jñāca)kṣur** Du w. *-cakṣuḥ*. **dharmacakṣur** Du w. *-cakṣuḥ*. **bhagavān āha** Du w. omits *bhagavān āha*. **yāvantyo** Chak w. *yavantyo*. **gaṅgā-nadyām** Du w. *gaṅgā-*; Cz has *gaṅgāyām mahānadyām* without noting G. **bālukās** Chak, Du w. *vālukās*. **tāvantya** Du reads *tāvatyo* with a note w. citing the MS as *yāvantyo*. **gaṅgānadyo** Du w. *gaṅgā-*. **bhaveyus** Du w. *bhaveyuḥ*. **bālukās** Chak, Du w. *vālukās*.
2. **kaccid** Chak w. *kaścid*, which is cited by Cz; Du reads *kaccid* but then w. cites the MS as *kaścit*. **bhaveyuḥ** Chak w. *bhaveyūḥ*; Du adds after *bhaveyuḥ* a sentence not found in the MS: *subhūtir āha / evam etat bhagavann evam etat sugata bahavas te lokadhātavaḥ*; this Du presumably took from MM, which has virtually the same reading, although it adds *bhaveyuḥ* after *lokadhātavaḥ*; Cz has the same reading as MM without noting the omission in G. **jānīyās** Chak has been misprinted as *jā nīyās*; Du reads *prajānāmi* and w. cites the MS as *jānīyaḥ*.
3. **-ś** Du w. *hetoḥ*. **cittadhārā** Du w. *-dhārās*. **bhāsitās** Chak w. *bhāsītās*. **tenocyante** Chak w. *tenocyate*. **hetor** Chak, Du w. *hetoḥ*. **nopalabhyate** Chak w. *nopalabyate*. **anāgataṃ cittaṃ** Du w. *anāgatacittaṃ*.
4. **pratyutpannaṃ** Chak misprinted as *pratyuypannaṃ*. **ya** Du w. *yaḥ*. **dānan** Du w. *dānaṃ*. **dadyād** Du w. *dadyāt*.
5. **puṇyaṃ** Cz has *puṇyaskandhaṃ* without noting that G omits *-skandhaṃ*. **prasaveta** both Chak and Du also read *prasaveta*, but the final akṣara could also be read *-tā*. **āha** Cz has *subhūtir āha* without noting that G omits *subhūtir*; Du w. omits everything from the first *āha* in line 5 down to *prasaveta* in line 6. Chak w. *aha*. **vahu** Chak w. *bahu*.
6. **puṇyaṃ** Chak w. *puṇyam*, which Cz cites (this citation could be misleading since Cz gives only *puṇyam* as the equivalent in G for his *puṇyaskandhaṃ*, when in fact the equivalent in G is *bahu puṇyaṃ*). **sacet** Du w. *sa cat*.

Folio 9b

1. **āha** Cz has *subhūtir āha* without noting that both G and Par omit *subhūtir*. **rūpakāyaparinīṣpattī** Du w. *-parinīṣpattiḥ*. **ity aparinīṣpattir eṣā** Du has *iti aparinīṣpattir iti [bhagavan] aparinīṣpattir eṣā*, etc., but his first *aparinīṣpattir*, as well as the following *iti*, not only do not occur in the MS, but are not found in MM, Cz, Par or Tib. Cz does have the *bhagavan* but does not indicate that it is not found in G.
2. **tenocyate** Du reads *anena ucyate*, but cites the MS as reading *tena*. **āha** Cz has *subhūtir āha* without noting that *subhūtir* is not found in G. **bhagavan** Chak is misprinted as *bhavan*.
3. **tenocyate** Du w. *tena ucyate*.
4. **tathāgatasyaivaṃ** Chak w. *-aivam*. **na** Du w. omits *na*. **asatād** Cz has *'satodgrhītena*, and both Chak and Du, though they cite the MS correctly, would emend to this. Cz does not note the reading of G.
5. **-dgrhītena** Chak w. *udgrhītena*. **hetor** Du w. *hetoḥ*. **dharmadeśaneti** Du w. *-deśanā iti*. **āhāsti** Du w. *āha asti*; Cz has *āha* instead of *evam ukta āyusmān subhūtir bhagavantam etad avocat*, without indicating the reading of G. **bhaviṣyanty** Du w. *bhaviṣyanti*. **anāgate 'dhvani** Chak is misprinted as *anāgatedhvani*; after *'dhvani* Cz has *paścime kāle paścime samaye paścimāyām pañcaśatyām saddharmavipralope vartamāṇe* and, while he notes that none of this occurs in G, he does not indicate that neither could it have occurred in Par nor is it found in Tib.
6. **(bhāṣyamā)ṇām** Chak w. *bhāṣamānām*; Du w. *bhāṣyamāṇān*; Cz omits *bhāṣyamāṇām* and, while he notes that G has it (he cites the incorrect reading of Chak), he does not note that Par probably had something like it, and that Tib also has it. **cchrutvābhiṣraddadhāsyanti** Du w. *śrutvābhiṣraddhāsyanti*. **nāsatvās** Chak w. *nāsatvā*; Du w. *na asattvāḥ*. **bhāṣitās** Du w. *bhāṣitāḥ*.

Folio 10a

1. **-cyante** Chak w. *-cyate*. **tv** Chak w. *nv*; Du w. *nu*. **tathāgatenānuttarā** Chak w. *-anuttara*; Du w. *tathāgatena anuttarām*. **samyaksambodhir** Chak w. *samyaksambodhir*; Du w. *samyaksam-*

- bodhim. abhisambuddhaḥ* Chak w. *-sambuddhaḥ. āha* Cz has *āyusmān subhūtir āha*, without noting that G does not have the first two words.
2. *-nānuttarā* Chak is misprinted as *-anuttarāsamyak-*, etc.; Du w. *tathāgatena anuttarām. samyaksambodhir* Chak w. *-sambodhir*; Du w. *-sambodhim. abhisambuddhaḥ* Chak w. *-sambuddhaḥ. tenocyate* Du w. *tena ucyate. 'nuttarā* Du w. *anuttarā. samyaksambodhir* Chak w. *-sambodhir. iti* Chak w. *ity.*
3. *tu* Du w. prints *tu* in brackets. *kiñcid* Du w. [*kaścid*]; both the reading and the brackets are wrong. *viśamas* Du w. *viśamaḥ. tenocyate* Du w. *tena ucyate. 'nuttarā* Du w. *anuttarā. samyaksambodhir* Chak w. *-sambodhir. nirjīvatvena* Du w. *nirjīvatvena. sānuttarā* Chak w. *sānuttara.*
4. *-dhiḥ* Chak w. *-sambodhiḥ. sarvaiḥ* Du is misprinted as *sarveḥ. kuśalair* Chak, Du w. *kuśalaiḥ. bhāṣitās* Du w. *bhāṣitāḥ. tenocyante* Chak, Du w. *tenocyate.*
5. *subhūte* after *subhūte* Cz adds *strī vā puruso vā* and, although he notes that this is not found in G, he does not note that it also does not occur in Par and that Tib has for the beginning of this passage *rigs kyi bu 'am / rigs kyi bu mo gang la la zhig gis*, etc. *trisāhasramahāsahasre* Chak w. *-mahāsahasre. abhisamhṛtya* Chak misprinted as *abhisamhartya. dadyād* Du w. *dadyāt. yaś cetaḥ* Chak w. *yaś caiva*, which is cited by Cz.
6. *catuṣpadikām* Chak, Du *catuṣpādikām. deśayed* Du w. *deśayet. asya* Du w. *etasya. (ka)lān* Du w. *kalām. yāvad* Chak w. *yavad.*

Folio 10b

1. *tathāgatasyaivam* Chak w. *-aivam. subhūte-r-evam* Chak has *subhūte cevam* (Cz cites G as *caivam*, but *caivam* is only an emendation suggested by Chak in a note and not the reading found in the MS); Du has w. *subhūte evam. ce* and *re* frequently can only be distinguished with difficulty—if at all—in the script. I have read *r* and, on the assumption that this is the correct reading, I would interpret *r* here as an “inorganic” sandhi consonant or “hiatus-bridger.” But the use of such “hiatus-bridgers,” though common enough elsewhere, is certainly not characteristic of our MS. *draṣṭavyam* Du w. *draṣṭavyam.*

2. **'bhaviṣyad** Du w. *'bhaviṣyat*. **pudgalagrāhaḥ** Du w. *pudgala-grā[ho 'bhaviṣyat]*.
3. **ātmagrāha** Chak is misprinted as *ātamgrāha*. **ete** Chak, Du w. *eva te*.
4. **bhāṣitās** Du w. *bhāṣitāḥ*. **tenocyaṁte** Chak, Du w. *tenocyante*. **lakṣaṇasaṁpadā** Chak w. *-sāmpadā*. **āhaivam etad** Chak w. *āhai vaṁ*, omitting *etad*; Du w. *āha / evam etad*. **bhagaval lakṣaṇasaṁpadā** Du w. *bhagavan lakṣaṇa-*; Cz cites G as *evam bhagavann alakṣaṇasāmpadā*, which is not the reading of Chak, but an emendation suggested by Chak in a note. Moreover, Cz does not indicate the reading of Par, which is essentially the same as G: *āha · evam eva bhagavaṁ lakṣaṇasaṁpadāyās tathāgato draṣṭavyaḥ*. What is in Cz a negative statement is in both G and Par an affirmative statement.
5. **punaḥ** Chak w. omits *punaḥ* and Cz, following Chak, w. indicates that *punaḥ* is not found in G. **lakṣaṇasaṁpadā** Chak w. *-sāmpadā*. **dra[ṣṭa]vyo** neither Chak nor Du indicate that *-ṣṭa-* has been inadvertently omitted in the MS. **'bhaviṣyad** Du w. *'bhaviṣyat*. **'bhaviṣyat** Chak *bhaviṣyat*. **āha** for G's *āha* Cz has *āyusmān subhūtir bhagavantam etad avocat* but, without noting G or Par, the latter having only *āyusmān subhūtir āha*. **yathāham** Chak w. *yathāham*.
6. **lakṣaṇasaṁpadā** Chak w. *-sāmpadā*. **bhagavāms** Chak w. *bhagavaṁs*. **imā gāthā** Du w. *ime gāthe*. **abhāṣataḥ**)) Chak and Du both have *abhāṣata* and it is very possible that the : of the :)) after *-ta* should simply be taken as part of the mark of punctuation, :)) being a variant form of · :)). **adrākṣur** Du w. *cādrākṣur*; Cz reads *ca-adrākṣur* and, though he notes that G does not have *ca*, he does not note that it is also missing from Par. **anvayuḥ** Cz has *ca-anvayuḥ* and w. indicates that G and Par also have the *ca*, though it occurs in neither.

Folio 11a

1. **dharmatā cāpy avijñeyā** Chak w. *dharmato cāsya vijñeyā*, which Cz cites; Du w. *dharmatā cāpy abhijñeyā*. **sā** Chak w. *sa*, which Cz cites. **vijānituṁ** Chak w. *vijānitum*. **lakṣaṇasaṁpadā** Chak w. *-sāmpadā*.

2. **samyaksambodhir** Chak w. *-sambodhir*. **abhisambuddhāḥ** Chak w. *abhisambuddhaḥ*; Du w. *abhisambuddhā*. **lakṣaṇasaṃpadā** Chak w. *-sāpadā*. **samyaksambodhir** Chak w. *-sambodhir*. **abhisambuddhā** Chak w. *abhisambuddhaḥ*.
3. **syād** Chak w. *syad*, which is cited by Cz. **evaṃ** Chak w. *evam*. **prañapta** Du w. *prañaptaḥ*. **vā** Du w. adds an *iti* after *vā*, which is not found in the MS (Du probably took it from MM or Cz). **draṣṭavyaṃ** Du w. *draṣṭavyam*.
4. **yaś ca** Du w. *yat*. **gaṅgānadibālukopamāl** Chak w. *gaṅgānadīvālukosamāḥ*; Du w. *gaṅgānadīvālukopamān*. **saptaratnaprati-pūrṇān** Chak w. *-pūrṇān*.
5. **samyaksambuddhebhyo** Chak misprinted as *-sambuddhebyo*. **dadyād** Du w. *dadyāt*. **bahutaraṃ** Chak w. *-taram*. **puṇyaṃ** Cz has *puṇyaskandhaṃ*, without noting the reading of G.
6. **āha** Cz has *āyuṣmān subhūtir āha* for the first *āha* in G, but does not note G's lack of the first two words. **pa(r)igra[hītavyaḥ]** the last few syllables of the line have been obliterated, but the reconstruction given here in brackets is fairly certain.

Folio 11b

1. **vāgacchati** Du w. *vā āgacchati*. **me** Cz inserts *subhūte* after *me* but does not note that it occurs in neither G nor Par. **[hetoḥ]** the final syllables of the line have been obliterated but the reconstruction given here in brackets is fairly certain.
2. **samyaksambuddha** Chak w. *-sambuddhaḥ*. **subhūte** Chak is misprinted as *subhū te*. **yāvantaḥ** Du reads *yāvanti* and cites the MS reading w. as *yāvanta*. **trisāhasra[mahā-]** the final syllables of this line have also been obliterated, but again the bracketed reconstruction is fairly certain.
3. **tāvato** Chak w. *tavato*. **lokadhātūn** Chak w. *lokadhātūn*, which is cited by Cz. **paramāṇusaṃcayas** Chak w. *paramāṇusaṃcayaḥ*; Du w. *-sañcayaḥ*. In what follows here the MS always has *sañcaya*, but in every case but one Du w. prints *sañcaya*; this will not be noted hereafter. **bahu** Du w. *bahuḥ*. **paramāṇusaṃcayo** Chak w. *paramāṇusaṃśayo*.

4. **-vam** Du w. *āha / evam*; Cz has *subhūtir āha: evam*, without noting G or Par, neither of which has the *subhūtir*. **bhagavan** Chak w. *bhagavān*. **bahu** Du w. *bahuḥ*. **paramāṇusaṁcayo** Chak w. *paramānu-*. **bhagavan** Chak w. *bhagavān*. **'bhaviṣyan** Du w. *'bhaviṣyat*. **paramāṇusaṁcaya** Chak w. *paramānu-*.
5. **-ṇusaṁcayo** Chak w. *'sauparamānu-*. **asaṁcayaḥ** Chak w. *asaṁcaya*. **bhāṣitas** Du w. *bhāṣitaḥ*. **paramāṇusaṁcaya** Chak w. *paramānu-*. **yac ca** Chak, Du w. *yaś ca*. **bhāṣati** Du w. *bhāṣate*. **ṭṛsāhasramahāsāhasro** Chak, Du w. *tri-*.
6. **bhāṣitas** Du w. *bhāṣitaḥ*. **bhagavan** Chak w. *bhagavān* for the first *bhagavan* in the line. **abhaviṣyat** Chak w. *abhaviṣyat*. **bhagavan** Cz omits the second *bhagavan* without noting that it is found in G. **'bhaviṣyad** Du w. *'bhaviṣyat*. **tathāgatena** in Cz *tathāgatena* follows rather than precedes *piṇḍagrāhas*, but its placement in G is not noted in Cz; Par has the same word order as G.

Folio 12a

1. **-ṇagrāho** Chak w. *-graho*. **bhāṣitas** Du w. *bhāṣitaḥ*. **caivāvyavahāro** Cz has *caiva subhūte 'vyavahāro*, but the *subhūte* Cz places after *caiva* G has after *'nabhilāpyaḥ* and Par after *caivāvya-vahāro*. None of this is noted by Cz. **sa dharmāḥ** Cz has *na sa dharmo*, without noting that G omits the *na*.
2. **-thagjanair** Chak is misprinted as *bāla pṛthagjanair*. **vaded** Du w. *vadet*. **ātmaḍṛṣtis** Chak w. *-ḍṛṣtis*. **sa** Du w. puts *sa* in brackets; in Cz the order of *subhūte* and *sa* is inverted without a note. **samyag** Du w. *samyak*.
3. **āha** Cz has *subhūtir āha* without noting G. **no** Cz w. indicates that *no* is omitted in G. **bhagavaṁs** Du w. *bhagavan*. **bhagavann** Du w. *bhagavan*.
4. **adhimoktavyās** Du w. *adhimoktavyāḥ*.
5. **dharmasamjñeti** Du w. *dharmasamjñā iti*. **dharmasamjñeti** Du w. *dharmasamjñā iti*. **aprimeyāsaṁkhyeyāl** Chak w. *-āsaṁkhyeyā*; Du w. *-āsaṁkhyeyān*. **lokadhātūn** Chak w. *-dhatūn*.
6. **-ripūrṇān** Chak is misprinted as *-pūrṇān*. **dānan** Du w. *dānaṁ*. **dadyād** Du w. *dadyāt*. **prajñāpāramitāyā** Chak w. *prajñā-*.

catuṣpadikām Chak, Du w. *catuṣpādikām*. **dhārayed** Chak w. *vācayed*; Cz in his notation has been misled by Chak. **deśayet** Chak, Du w. *deśayed*. **paryavāpnuyād** Du w. *paryavāpnuyāt*.

Folio 12b

1. **tato** Cz inserts *nidānaṁ* after *tato* without noting that it is not found in G and Par. **prasavetāprameyam** Du w. *prasaveta prayeyam*. **asāṁkhyeyaṁ** Du w. *asāṁkhyeyam*. **saṁprakāśayet** Chak w. *samprakāśayet*. **saṁprakāśayet** Chak w. *samprakāśaye*; Du w. *saṁprakāśayed*.
2. **draṣṭavya** Du w. *draṣṭavyaṁ*. **saṁskṛtaṁ** Chak w. *saṁskṛtam*. **āttamanā** Du w. *āttamanāḥ*. **sthavira** Chak is misprinted as *sthavirasubhūti*, etc.; Du w. *sthaviraḥ*. **sadevamānuṣāsu-** Du w. *-manuṣyā-*.
3. **samāptāḥ** Both Chak and Du have *samāptā* and it is possible that here again : is a part of the final punctuation mark; i.e., :) ·)), instead of -ḥ)) ·)); cf. fo. 10b, line 6 and note.

TRANSLATION OF THE GILGIT TEXT

[5a] The Blessed One said: "The number, Subhūti, of particles of dust in a world system of three thousand great-thousand worlds¹—is that great?"

He said: "It is great, Blessed One. That particle of dust is said to be not a particle by the Tathāgata. In that sense 'a particle of dust' is used. Also, that which is a world system, that is said by the Tathāgata not to be a system. In that sense 'world system' is used."

The Blessed One said: "What do you think, Subhūti? Is a Tathāgata to be seen through the thirty-two characteristic marks of a great man?"

He said: "No, Blessed One. Why is that? Each of the thirty-two characteristic marks of a great man is said to be not a characteristic mark by the Tathāgata. In that sense 'the thirty-two characteristic marks of a great man' is used."

The Blessed One said: "But again, Subhūti, if a woman or a man were to give away their person as many times as there are sands in the river Ganges, and if someone else, after taking from this discourse on Doctrine a verse of even four lines, were to teach it to others, the latter alone would on that account produce great merit, immeasurable and incalculable."

Then, indeed, the Venerable Subhūti, through the shock of the Doctrine,² burst into tears. Wiping away his tears, he said this to the Blessed One: "It is astonishing, O Blessed One, it is truly astonishing, O Sugata, how this discourse on Doctrine³ was spoken by the Tathāgata, as a consequence of which knowledge has arisen for me! I have never heard this discourse on Doctrine before. They, Blessed One, who will produce a true conception when this sūtra is being taught here will be possessed by the greatest astonishment. And that, Blessed One, which is a true conception, that indeed is not a conception. On that account the Tathāgata says [5b] 'A true conception, a true conception'.

"Blessed One, it is not astonishing to me that I am prepared for the teaching of this discourse on Doctrine, since I have been intent upon it. Blessed One, those living beings who will take up this discourse on

Doctrine . . .⁴ and master it will be possessed by the greatest astonishment. But again, Blessed One, a conception of a self will not occur to them, nor a conception of a living being, nor a conception of a personal soul, nor a conception of a person. And why is that? Because the Buddhas, the Blessed Ones, have walked away from all conceptions.”

The Blessed One said: “That is so, Subhūti. Those who, after hearing this discourse on Doctrine, will not be terrified, will not tremble, will not be overcome by dread, they will be possessed by the greatest astonishment.⁵ And why is that? This, Subhūti, has been declared by the Tathāgata to be the greatest perfection. And that which the Tathāgata declares the greatest perfection is declared as well by immeasurable Buddhas and Blessed Ones. In that sense ‘greatest perfection’ is used.

“But again, Subhūti, that which is the perfection of patience of the Tathāgata, just that is not a perfection. And why is that? When, Subhūti, an evil king⁶ hacked the flesh from all my limbs, there was for me on that occasion no conception of a self, no conception of a living being, no conception of a personal soul, no conception of a person. Nor, moreover, could there have been a conception of injury for me at that time.⁷ Subhūti, I remember five hundred births in the past when I was a seer who taught patience. Then too there was for me no conception of a self, no conception of a living being, no conception of a personal soul, no conception of a person. Therefore, Subhūti, a bodhisattva, a mahāsattva, having abandoned all conception . . .” [folio 6 is missing].

[“Those who will take up this discourse on Doctrine, will preserve it, will declare it, will recite it, will master it . . .],⁸ [7a] all those living beings will carry my awakening on their shoulder.⁹ And why is that? It is not possible for this discourse on Doctrine to be heard by living beings who have but little resolve. Nor is it possible for it to be heard, taken up . . . or mastered, by those who have a view of a self, nor by those who have a view of a living being or a personal soul or a person. That situation simply does not occur.

“But again, Subhūti, on whatever piece of ground one will proclaim this sūtra, that piece of ground will become an object of worship. That piece of ground will become for the world together with its devas, men and asuras a true shrine to be revered and circumambulated.¹⁰ Subhūti, those sons and daughters of good family who will take up sūtras such as these . . . and master them, they will be ridiculed, severely ridiculed. But, through that ridicule, their demeritorious actions in former lives which should lead to rebirth in an unfortunate destiny will here and now come to be exhausted, and they will obtain the awakening of a Buddha.¹¹

“Subhūti, I remember that in the past, during incalculable and more than incalculable aeons—before the time of the Tathāgata, Arhat, Fully

and Completely Awakened One Dīpaṅkara—there were eighty-four hundreds of thousands of millions of billions of Buddhas who were attended to by me and, having been attended to, were not neglected. [7b] If, Subhūti, after having attended to them, all those Buddhas were not neglected by me; and if in the Final Period, when the last five hundred years have begun, someone will take up these sūtras . . . and master them, then, Subhūti, the quantity of merit resulting from the former does not approach even a hundredth part of the quantity of merit of the latter, nor a thousandth part, nor a hundred-thousandth. That quantity of merit is not open to enumeration, nor measure, nor calculation, nor comparison, nor likening. Subhūti, those living beings, those sons and daughters of good family will acquire then such a quantity of merit that if I were to declare the quantity of merit of those sons and daughters of good family, living beings (who heard that declaration) would go mad, they would be totally disoriented. But again, Subhūti, this discourse on Doctrine is unthinkable—unthinkable indeed is its effect.”¹²

He said: “How, Blessed One, should one who has set out on the way of a bodhisattva stand? How should he actually practice? How should he direct his thought?”

The Blessed One said: “Here, Subhūti, one who has set out on the way of a bodhisattva should produce a thought in this manner: ‘All living beings should be led by me to final nirvana in the realm of nirvana which leaves nothing behind. But after having led living beings thus to final nirvana, there is no living being whatsoever who has been led to final nirvana.’ And why is that? If, [8a] Subhūti, a conception of a living being were to occur to a bodhisattva, a conception of a personal soul, or a conception of a person, he is not to be called ‘a bodhisattva’. And why is that? Subhūti, that which is called ‘one who has set out on the way of a bodhisattva’, that is not a thing.”¹³

“What do you think, Subhūti? Is that some thing which was awakened to by the Tathāgata, in the presence of the Tathāgata Dīpaṅkara, as the utmost, full and perfect awakening?”

He said: “Blessed One, that which was awakened to by the Tathāgata, in the presence of the Tathāgata Dīpaṅkara, as the utmost, full and perfect awakening is not some thing.”

He said: “Because of that was I assured by the Tathāgata Dīpaṅkara: ‘You, young man, will be at a future time a Tathāgata, Arhat, Fully and Perfectly Awakened One named Śākyamuni.’ And why is that? ‘Tathāgata’, Subhūti, that is a designation for thusness. Subhūti, someone might speak thus, ‘The utmost, full and perfect awakening is fully and perfectly awakened to by the Tathāgata.’ But that which is the utmost, full and perfect awakening fully and perfectly awakened to by

the Tathāgata is not some thing. Subhūti, the thing which is fully and perfectly awakened to by the Tathāgata—in that there is neither truth nor falsehood. On that account the Tathāgata says ‘all characteristics are the characteristics of a Buddha.’ ‘All characteristics’, Subhūti, all those are not characteristics. In that sense ‘all characteristics’ is used. Suppose for example, Subhūti, there would be a man endowed with a body, a great body.”

Subhūti said: “That which [8b] the Tathāgata has called a man endowed with a body, a great body—he, Blessed One, is said to be without a body by the Tathāgata. In that sense ‘endowed with a body, a great body’ is used.”

The Blessed One said: “Just so, Subhūti, the bodhisattva who would speak thus: ‘I will lead beings to final nirvana’—he is not to be called a bodhisattva. And why is that? Is there, Subhūti, some thing which is named ‘bodhisattva’?”

He said: “No indeed, Blessed One.”

The Blessed One said: “On that account the Tathāgata says ‘all things are without living being, without personal soul, without person.’ Subhūti, a bodhisattva who would speak thus: ‘I will bring about wonderful arrangements in [my] sphere of activity’¹⁴—he too is not to be called a bodhisattva.¹⁵ And why is that? ‘Wonderful arrangements in [one’s] sphere of activity, wonderful arrangements in [one’s] sphere of activity’, Subhūti, those have been said by the Tathāgata not to be wonderful arrangements. In that sense ‘wonderful arrangements in [one’s] sphere of activity’ is used. Subhūti, that bodhisattva who is intent on saying ‘without a self are things, without a self are things’—he is declared ‘a bodhisattva, a bodhisattva’ by the Tathāgata, Arhat, Fully and Perfectly Awakened One.

“What do you think, Subhūti? Does the physical eye of the Tathāgata exist?”

He said: “So it is Blessed One. The physical eye of the Tathāgata exists.”

The Blessed One said: “What do you think, Subhūti? Does the divine eye of the Tathāgata exist, the eye of wisdom, the eye of Dharma, the awakened eye?”

He said: “So it is Blessed One. [9a] The divine eye of the Tathāgata, the eye of wisdom, the eye of Dharma, the awakened eye exists.”

The Blessed One said: “What do you think, Subhūti? There could be as many Ganges rivers as there are sands in the river Ganges, and there could be as many world systems as there are sands in that many rivers. Would those world systems then be many?”¹⁶

The Blessed One said: "Subhūti, I could know¹⁷ the various streams of thought of living beings as numerous as those in that many world systems. And why is that? 'Stream of thought, stream of thought', Subhūti, that has been said by the Tathāgata not to be a stream. In that sense 'stream of thought' is used. And why is that? Subhūti, a past thought is not apprehended. A future thought is not apprehended. A present (thought)¹⁸ is not apprehended.

"What do you think, Subhūti? He who, after having filled this three thousand great-thousand world system with the seven precious things, would give it as a gift—surely that son or daughter of good family would, as a result, produce much merit?"

He said: "Much, Blessed One, much, Sugata."

The Blessed One said: "So it is, Subhūti, so it is much. That son or daughter of good family would, as a result, produce much merit. If, Subhūti, there would have been a quantity of merit, the Tathāgata would not have said 'quantity of merit, quantity of merit'.

"What do you think, Subhūti? Should the Tathāgata be seen through the perfect development of his physical body?" [9b]

He said: "No Blessed One. It is not through the perfect development of his physical body that the Tathāgata is to be seen. And why is that? 'A perfect development of the physical body, a perfect development of the physical body', that is said to be not a perfect development by the Tathāgata. In that sense 'perfect development of the physical body' is used."

The Blessed One said: "What do you think, Subhūti? Should the Tathāgata be seen through the possession of characteristic marks?"

He said: "No Blessed One. It is not through the possession of characteristic marks that the Tathāgata is to be seen. And why is that? That which is the possession of characteristic marks is said to be not the possession of characteristic marks by the Tathāgata. In that sense 'possession of characteristic marks' is used."

The Blessed One said: "What do you think, Subhūti? Surely it occurs to the Tathāgata: 'Not by me has a Doctrine been taught.' He, Subhūti, who would speak thus: 'By the Tathāgata a Doctrine has been taught,' he, Subhūti, would falsely accuse me by taking something up from what is not there.¹⁹ Why is that? 'A teaching of Doctrine, a teaching of Doctrine', Subhūti, that is not some thing which receives the name 'a teaching of Doctrine.'"

He said: "Blessed One, will there be any living beings at a future time who, after hearing such Doctrines being taught, will believe?"

The Blessed One said: "They, Subhūti, are neither living beings nor nonliving beings. Why is that? 'All living beings', Subhūti, they are said

to be not living beings by the Tathāgata. In that sense [10a] 'all living beings' is used.

"What do you think, Subhūti? Surely that which was awakened to by the Tathāgata as the utmost, full and perfect awakening is some thing?"

He said: "Blessed One, that which was awakened to by the Tathāgata as the utmost, full and perfect awakening is not some thing."

The Blessed One said: "So it is, Subhūti, so it is. Not even the most minute thing exists or is found there. In that sense 'utmost, full and perfect awakening' is used. But again, Subhūti, that thing is the same; there is no difference. In that sense 'utmost, full and perfect awakening' is used. Through the fact of there being no personal soul, no living being, no person, that utmost, full and perfect awakening is fully and perfectly awakened to as identical with all meritorious things. 'Meritorious things, meritorious things', Subhūti—but just those are said by the Tathāgata not to be things. In that sense 'meritorious things' is used.

"But once again, Subhūti, if someone, after collecting piles of the seven precious things as large as the kings of mountains, the Sumerus, here in this three thousand great-thousand world system, were to give them as a gift; and someone else, after having taken from this Perfection of Wisdom a verse of even four lines, were to teach it to others—Subhūti, the quantity of merit from the former case does not approach a hundredth part of the quantity of merit of the latter . . . [10b] it is not open to comparison.

"What do you think, Subhūti? Surely it occurs to the Tathāgata: 'living beings are released by me.' Not, again, Subhūti, is it to be seen thus. Why is that? That which is released by the Tathāgata is not some living being. If again, Subhūti, there would have been some living being who was released by the Tathāgata, that indeed would have been for him the holding on to a self, the holding on to a living being, the holding on to a personal soul, the holding on to a personal entity. 'Holding on to a self', Subhūti, this is said by the Tathāgata to be not holding on, but it is held on to by simple ordinary people. 'Simple ordinary people', Subhūti, these are said by the Tathāgata not to be people. In that sense 'simple ordinary people' is used.

"What do you think, Subhūti, should the Tathāgata be seen through the possession of characteristic marks?"

He said: "That is so, Blessed One. The Tathāgata is to be seen through the possession of characteristic marks."

The Blessed One said: "But if, Subhūti, the Tathāgata were to be seen through the possession of characteristic marks, a wheel-turning king would also be a Tathāgata."

He said: "As I understand the meaning of what was said by the Blessed One, the Tathāgata is not to be seen through the possession of characteristic marks."

Then, again, on that occasion the Blessed One spoke these verses:

Those who saw me through form,
 Those who associated me with sound—[11a]
 They have engaged in a misguided effort.
 Those people will not see me.

The Awakened One is to be seen from the Doctrine;
 The Tathāgata is the body of Doctrine;
 But, indeed, the substance of the Doctrine is not
 to be understood,
 Nor is it possible for it to be understood.

"What do you think, Subhūti? Is the utmost, full and perfect awakening fully and perfectly awakened to by the Tathāgata through the possession of characteristic marks? Again, Subhūti, it is not to be seen thus. The utmost, full and perfect awakening, Subhūti, is not fully and perfectly awakened to by the Tathāgata through the possession of characteristic marks.

"If, again, Subhūti, it should occur thus: 'by someone set out on the way of a bodhisattva the destruction of some thing is taught, or its annihilation,' again, Subhūti, it is not to be seen thus. The destruction of some thing, or its annihilation, is not taught by someone who has set out on the way of a bodhisattva.

"If, again, Subhūti, a son or daughter of good family, after filling world systems similar in number to the sands of the Ganges with the seven precious things, were to give them as a gift to the Tathāgata, Arhat, Fully and Perfectly Awakened One; and if a bodhisattva were to achieve composure²⁰ in the midst of things that have no self—the latter would indeed produce much greater merit than the former. However, Subhūti, a quantity of merit is not to be acquired by a bodhisattva."

He said: "A quantity of merit, Blessed One, is to be acquired, surely?"

The Blessed One said: "'Is to be acquired', Subhūti, not 'is to be held on to'. In that sense 'is to be acquired' is used. [11b]

"But once again, Subhūti, if someone were to speak thus: 'The Tathāgata goes, or he comes, or he stands, or he sits, or he lays down'—he does not understand the meaning of what I said. Why is that? A 'Tathāgata', Subhūti, has not come from anywhere, has not gone

anywhere. In that sense 'Tathāgata, Arhat, Fully and Perfectly Awakened One' is used.

"And if again, Subhūti, a son or daughter of good family were to grind into powder as many world systems as there are particles of dust in this three thousand great-thousand world system so that there would be just a pile of the finest atoms—what do think, Subhūti? Would that pile of atoms be huge?"

He said: "That is so, Blessed One, that would be a huge pile of atoms. And why is that? If, Blessed One, there would have been a pile, the Blessed One would not have said 'a pile of atoms'. Why is that? That which is said to be a pile of atoms, that is said by the Blessed One not to be a pile. In that sense 'a pile of atoms' is used. That which the Tathāgata calls 'three thousand great-thousand world system', that is said by the Tathāgata not to be a system. In that sense 'three thousand great-thousand world system' is used. Why is that? If, Blessed One, there would have been a system, just that, Blessed One, would have been the holding on to a solid mass. And that which is said by the Tathāgata [12a] to be the holding on to a solid mass is said to be not holding on. In that sense 'holding on to a solid mass' is used."

The Blessed One said: "And holding on to a solid mass is itself, Subhūti, a thing not open to verbal expression; it cannot be put into words. It, however, has been held on to by simple ordinary people. Why is that? If, Subhūti, someone were to speak thus 'A view of a self was taught by the Tathāgata, a view of a living being, a view of a personal soul, a view of a person'—would he indeed, Subhūti, speak correctly?"

He said: "No, Blessed One. And why is that? Blessed One, that which is said by the Tathāgata to be a view of a self, that is said by the Tathāgata to be not a view. In that sense 'a view of a self' is used."

The Blessed One said: "In this way, Subhūti, one who has set out on the way of a bodhisattva should know all things, should be intent on them. And he should be intent on them in such a way that even the conception of a thing would not be present. Why is that? 'Conception of a thing, conception of a thing', Subhūti, that is said by the Tathāgata not to be a conception. In that sense 'conception of a thing' is used.

"And again, Subhūti, if a bodhisattva, mahāsattva, having filled immeasurable, incalculable world systems with the seven precious things, were to give them as a gift; and if a son or daughter of good family, having taken up from this Perfection of Wisdom a verse of even four lines, were to preserve it, were to teach it, were to master it [12b]—the latter certainly would produce immeasurable, incalculable merit, much greater than the first.

“And how would he fully cause it to appear? In such a way that he would not cause it to appear. In that sense ‘fully cause it to appear’ is used.”

A shooting star, a fault of vision, a lamp;
An illusion and dew and a bubble;
A dream, a flash of lightning, a thunder cloud—
In this way is the conditioned to be seen.

The Blessed One said this.

Delighted, the Elder Subhūti, and the monks and nuns, the lay men and women, and the world with its devas, men, asuras and gandharvas rejoiced in that spoken by the Blessed One.

The Vajracchedikā Prajñāparamitā is concluded.

NOTES

For complete citation information the reader is directed to the list of abbreviations and bibliography found at the beginning of Part II.

Notes to the Introduction

1. Chakravarti 1956: 177.
2. Conze 1974: 1.
3. Conze 1974: 6.
4. Conze 1974: 6, 48.
5. Yuyama 1967: 68.

Notes to the Translation

1. "Three thousand great-thousand worlds" is, of course, hardly acceptable English but, as Franklin Edgerton points out, "It is not clear what precise meaning, if any, attaches to mahāsāhasra." He also notes that "in Mahāvīyutpatti 7999 ff. and Mañjuśrīmūlakalpa 343.16 ff. mahā- compounded with other numbers means ten times the number," and the same may or may not be intended here (see BHSD 259). For at least one description of what a world system so described would include, see La Vallée Poussin 1923-31: II.170.
2. To appreciate the significance of the expression *dharmapravegena*, "through the shock of the Doctrine," and of this passage as a whole, see the short but important paper by Ananda Coomaraswamy 1977 and the passages from Pāli literature he cites there. Unless I am mistaken, this is an important passage in the *Vajracchedikā*. Its articulation of a particular kind of "emotively" charged experience (Subhūti "bursts into tears"), a kind of shock-induced realization as a reaction to a certain form of doctrinal expression (Subhūti says "through this discourse on Doctrine knowledge has arisen for me"), may in fact be a prototype and paradigm for at least certain strands of the later Buddhist tradition. In any case, this passage is the clearest indication we have of the kind of "religious" experience with which our text seems to have been concerned.
3. *Dharmaparyāya* is a deceptively difficult term to translate. Edward Conze, who I follow here, translates it "discourse on dharma" (Conze 1974: 76). Charles de Harlez translates it "cours de la loi" (de Harlez 1891: 471) and Max Walleser "Lehrbuch"

(Walleser 1914: 147). Edgerton says "lit. device, means of (teaching) the doctrine, and so, secondarily, religious discourse" (BHSD 279). In usage it seems to indicate first a talk or discussion or even "sermon" on the doctrine which draws out or elaborates on the meaning of the latter. Were it not for fear of possible misunderstandings, I would almost prefer to translate it as "development of the Doctrine"; that is, "development" in the sense of "to lay open by degrees or in detail, to disclose, reveal; to unfold more completely, to evolve the possibilities of" (as defined in *Webster's New Collegiate Dictionary*, s.v. develop). Secondarily, then, it comes to mean the record of that "talk" which "lays open by degrees"; that is to say, a "text" or even a "book" which contains it.

4. The marks of ellipsis in this type of sentence translate the Buddhist Sanskrit idiom *yāvat*, which stands for omitted elements of a standard list or formula. Here the whole phrase would be: "will take up this discourse on Doctrine, will preserve it, will declare it, will recite it, will master it"—editors.
5. This passage is one example of a very frequent, very important, and very little studied kind of passage found throughout the *Prajñāpāramitā* literature. Again and again the absence of fear, terror, dread and anxiety when confronted with the assertions made in these texts is defined as *the* Perfection of Wisdom, as the mark of one who actually practices the Perfection of Wisdom, or—as here—the "greatest perfection". Typical of these passages is the following from the *Aṣṭasāhasrikā*. Here, after the Buddha has exhorted Subhūti to teach the Perfection of Wisdom to bodhisattvas, Subhūti responds by saying: "Bodhisattva, bodhisattva', when this is said, to what thing does that designation 'bodhisattva' refer? I do not see a thing called 'bodhisattva'. Nor, moreover, do I see a thing named 'the Perfection of Wisdom'. I, not finding then, O Blessed One, a bodhisattva nor a thing called bodhisattva, not apprehending, not seeing it, and not finding a Perfection of Wisdom, not apprehending, not seeing it—what bodhisattva in what Perfection of Wisdom will I teach and instruct?" (*bodhisattvo bodhisattva iti yad idaṃ bhagavann ucyate, katamasyaitad bhagavan dharmasyādhivacanāṃ yad uta bodhisattva iti. nāhaṃ bhagavaṃs taṃ dharmāṃ samanupaśyāmi yad uta bodhisattva iti. taṃ apy ahaṃ bhagavan dharmāṃ na samanupaśyāmi yad uta prajñāpāramitā nāma. so 'haṃ bhagavan bodhisattvaṃ vā bodhisattvadharmāṃ vā avindan anupalabhamāno 'samanupaśyan prajñāpāramitāṃ apy avindan anupalabhamāno 'samanupaśyan katamāṃ bodhisattvaṃ katamasyāṃ prajñāpāramitāyāṃ avavadiśyāmi anuśāsiśyāmi*). After this passage, however, the text immediately adds: "But again, Blessed One, if when this is being said, taught and explained the mind of a bodhisattva is not depressed, not cowed, not dejected, does not fall into despair; if he is not discouraged, not crushed; if he is not terrified, frightened, does not tremble with fear—then just this bodhisattva, mahāsattva, is to be instructed in the Perfection of Wisdom. Just this is to be known as the Perfection of Wisdom of that bodhisattva. This is the instruction in the Perfection of Wisdom" (*api tu khalu punar bhagavan saced evaṃ bhāṣyamāṇe deśyamāṇe upadiśyamāṇe bodhisattvasya cittāṃ nāvālyate na saṃliyate na viśidati na viśadam āpadyate nāsyā viprṣṭhībhavati mānasam na bhagnaprṣṭhībhavati nottrasyati na saṃtrasyati na saṃtrāsam āpadyate, eṣa eva bodhisattvo mahāsattvaḥ prajñāpāramitāyāṃ anuśāsanīyaḥ, eṣai vāsyā bodhisattvasya mahāsattvasya prajñāpāramitā veditavyā, eṣo 'vavadaḥ prajñāpāramitāyāṃ*). The text is from Vaidya 1960: 3.5ff.

Similar passages, variations on this same theme, occur throughout the *Aṣṭasāhasrikā* (4.21, 5.24, 9.10, 11.2, 13.15, 15.28, etc.) but are by no means limited to this text. We find, for example, the following in the *Aṣṭādaśasāhasrikā*: "If again, Subhūti, the mind of a bodhisattva, mahāsattva, is not depressed when the fact of the isolation of all things is being talked about, is not cowed and does not tremble in fear, that bodhisattva, mahāsattva, moves in the Perfection of Wisdom" (Conze 1962: 61; see also 23.6, 60.21, etc.). In the *Saptaśatikā* we find: "Then Mañjuśrī, the heir apparent, said this to the Blessed One: 'Blessed One, just as Buddhas are those

bodhisattvas, mahāsattvas, to be seen who, after hearing this explanation of the Perfection of Wisdom, will be intent, will not be terrified, will not be frightened, will not tremble with fear" (Masuda 1930: 215.5; also 209.1, 211.4, 214.6, 214.11, 216.1, 6, 13; 217.4, 10, etc.). This repeated emphasis on fear, terror or dread in connection with hearing the Perfection of Wisdom being taught or explained would seem to indicate that the authors of our texts were clearly aware of the fact that what they were presenting was above all else potentially terrifying and awful, and that a predictable reaction to it was fear. And, although these passages need to be studied further, they already give us some valuable information on the nature of the experience with which this literature is dealing.

6. Conze does not question the reading *kaliṅga-rājā*, "the king of Kaliṅga," but the reading of the Gilgit text and the Khotanese (*Kalārri*) = *Kalirājah* would seem to further confirm Edgerton's suggestion that *kaliṅga-rājan* "is undoubtedly an error of the tradition for *kali-rājan*" (BHSD 172).
7. It is possible that we have here in the Gilgit text a scribal omission. Pargiter's text (paragraph 9a) has: *nāsi me tasmīn samaye [ātma]-(saṃjñā vā satva-jīva-pudgalasaṃ)jñā vā na me kāci saṃjñā nāsaṃjñā babhūva (ta)[t kasya hetoḥ sa] cen me subhūte tasmīn sa(maye) ā(tmasaṃ)jñābhaviṣyat vyāpādasamjñā me tasmīn samaye 'bhaviṣyat(t) [xxxxxx saṃ] jñā pudgalasaṃjñābhaviṣyat[t vyā]pādasamjñā me tasmīn samaye 'bhaviṣyat*. But all of that which appears in italics does not occur in the Gilgit text. This, of course, looks very much like a homoeoteleuton in which the scribe may have written the first *pudgalasaṃjñā*, then, through an eye skip, he may have written after the first *pudgalasaṃjñā* what should have come after the second *pudgalasaṃjñā*, thereby omitting everything that should have come between. This kind of homoeoteleuton is in fact frequently found in the Gilgit manuscripts. Against this, however, is the fact that if this was purely a "mechanical" omission we would have expected the Gilgit text to have *-pudgalasaṃjñā vā 'bhaviṣyat vyāpādasamjñā me tasmīn*, etc. But instead we find *pudgalasaṃjñā vā vyāpādasamjñā vāpi me tasmīn*, etc., and the *vāpi* is particularly hard to explain. I see no way of deciding the case. If, however, the Gilgit text is not to be explained as the result of a scribal omission, then it must at least be noted that the way in which it has constructed the conditional sentence is rather unusual (cf. Aalto 1968).
8. The passage enclosed in brackets is translated from Pargiter's edition.
9. The implied equation the *Vajracchedikā* makes here between preserving some form of the Doctrine and preserving the awakening (*bodhi*) of the Buddha is more explicitly stated elsewhere in the *Prajñāpāramitā* literature. In the Gilgit manuscript of the *Aṣṭāśasāhasrikā*, for example, the Buddha is made to say: "Ananda, whatsoever son or daughter of good family will take up this deep Perfection of Wisdom, will preserve it, recite and master it, by him the awakening of the past, present and future Buddhas, Blessed Ones, will be preserved" (*yo hi kaścid ānanda kulaputro vā kuladuhitā vā imām gambhīrām prajñāpāramitām udgrahīsyati dhārayīsyati vācayīsyati paryavāpsyaty atītānāgatapratyutpannānām buddhānām bhagavatām tena bodhir dhāritā bhaviṣyati*) (Conze 1962: 75.16). And the same thing, in slightly different words, is said a little later in the same text (84.14). There remains, however, the problem of whether we have here in the *Vajracchedikā* a figure of speech or a reference to an actual practice. Bearing in mind that the term *dharmaparyāya* can mean both "a discourse on the Doctrine" and the text that contains it, is our passage saying that "he who preserves this *dharmaparyāya* will carry the Awakening of the Buddha" (i.e., the text of the *dharmaparyāya*) on his shoulder in a literal sense, in the sense that he will carry an actual book containing the "awakening" on his shoulder? Or is it saying simply that he who preserves the *dharmaparyāya* will honor the "Awakening of the Buddha," the phrase "carry it on his shoulder" being used figuratively to indicate that he shows it respect? We have

in fact the same problem in a number of other passages in Mahāyāna sūtra literature.

In the *Saddharmapuṇḍarīka*, for example, we find the following verse (III.147): *tathāgataṣya yatha dhātu dhārayet tathaiva yo mārgati koci taṁ naraḥ / evam eva yo mārgati sūtram idṛśaṁ labhīva ca mūrdhani dhārayeta* (Kern and Nanjio 1908-12: 99.1-2). And, although the construction here is a little strange, the sense of this verse would seem to be: "As some man who searches for it would thus preserve a relic of the Tathāgata, just so, he who searches for such a sūtra, after having obtained it, would carry it on his head." "Would carry on his head" is, of course, the literal meaning of *mūrdhani dhārayeta*. The problem is that the dictionaries give the meaning of *mūrdhanā* or *mūrdhani*, *śirasā* or *śirasi dhārayati*, as "to bear on the head" and "honor highly"; that is to say that the phrase can have either a literal or a figurative meaning.

A similar problem arises in connection with a passage in the *Saptaśatikā*. Here we find: *avinivartanīyabhūmau tvam śāradvatīputra pratiṣṭhitāms tām kulaputrān kuladuhitṛīm jānīṣva ya imaṁ prajñāpāramitānirdeśaṁ śrutvādhimokṣyante not-trasiṣyanti na santrasiṣyanti na santrāsam āpatsyante mūrdhnā ca pratigrahiṣyanti* (Masuda 1930: 216.11), which Conze translates: "Śāradvatīputra . . . you should know that those sons and daughters of good family are established on the irreversible stage, if, on hearing this exposition of perfect wisdom, they believe, do not tremble, are not frightened or terrified, and if they accept it, placing it on their heads as a mark of respect" (Conze 1973: 86). What Conze rather ingeniously translates "and if they accept it, placing it on their heads as a mark of respect" is *mūrdhnā ca pratigrahiṣyanti* (the Tibetan here, as in the above passage from the *Saddharmapuṇḍarīka*, is *spyi bos len pa*), and this is only a variant of the expression *śirasā pratigrahiṣyati*, which the dictionaries give as "to receive, accept . . . 'with the head'; i.e., 'humbly, obediently.'" Again, the phrase is open to both a literal and a figurative interpretation. Conze, of course, gives a translation which tries to reflect both meanings and, although it is difficult, if not impossible, to decide here, there are passages where the figurative meaning seems to be more clearly excluded. One such passage is found in the *Saddharmapuṇḍarīka*: *tatas tathāgataṁ so 'msena pariharati ya imaṁ dharmaparyāyaṁ pustakagataṁ kṛtvāmsena pariharati* (338.4) ("Then, he carries the Tathāgata on his shoulder, who, after making this discourse on the Doctrine into a book, carries it on his shoulder.") Here, in light of the specific mention of an actual book, it is difficult to take this passage in a figurative sense. It in fact seems to be referring to an actual practice, and we may have another reference to this practice in the much later *Biography of Dharmasvāmin* in which we read: "When the Guru Dharmasvāmin visited the Vajrāsana-saṅghavihāra carrying an Indian manuscript of the *Ashtasāhasrikā-Prajñāpāramitā*, the keeper, a Śrāvaka, enquired, 'What book is it?' The Dharmasvāmin answered that it was the *Prajñāpāramitā*. The Śrāvaka said, 'You seem to be a good monk, but this carrying on your back of a Mahāyāna book is not good. Throw it into the river!'" (*rdo rje gdan dge 'dun gyi gtsug lag khang shes bya bar bla ma chos rjes bryad stong pa'i rgya dpe gcig khur nas byon pas dkon gnyer nyan thos shig na re chos ci yin zer / chos rjes prajñā pa ra mi ta ho shes rab kyi pha rol tu phyin pa yin gsung pas de na re khyod dge slong legs po cig 'dug pa la theg pa chen po'i chos rgyab tu khur ba de ma legs de bor la chu la gyur cig zer nas*) (Roerich 1959: 18-19 and 73-74). Note that in his translation after "an Indian manuscript" Roerich gives a note citing the Tibetan as *rgya-dpe-rgya-gar-gyi-dpe-cha*, but his edition has only *rgya dpe*.

The point of all this is that, although these and similar passages must be much more fully studied, our passage in the *Vajracchedikā*, when read in light of these other passages, appears to be potentially much more than a simple figure of speech. It may in fact refer to the actual practice of carrying sacred books on one's person.

10. On this passage and a number of parallel passages elsewhere see Schopen 1975. I would here like to make amends for having overlooked in my discussion some interesting remarks of the late Professor Conze in regard to this formula: "In this context the *Prajñāpāramitā* is then invested with a kind of magical power. It sanctifies the place where it is, makes it into a sacred, a holy place. "This perfection of wisdom makes a spot of earth into a holy place for beings, worthy of being worshipped and revered" [translating *Aṣṭa* iii 57]" (see Conze 1948: esp. 119).
11. I know of no exact parallels in Mahāyāna sūtra literature to this interesting passage, but the idea expressed here—that unmeritorious karma could be eliminated as a result of being abused by others for having adopted a particular practice or position—is remarkably close to a set of ideas and practices associated with the Pāśupatas. See Ingalls 1962 and Hara 1967–68. Professor Hara, for example, cites the following passage from the *Pāśupata-sūtra* attributed to Lakuliṣa: *avamataḥ sarvabhūteṣu paribhūyamānāś caret, apahata-pāpmā pareṣān parivādāt, pāpaṃ ca tebhyo dadāti sukrtaṃ ca teṣān ādatte* ("Dishonoured amongst all beings, ill-treated he should wander. [He thus becomes] freed of evil caused by the slander of others. He gives his bad karma to them. And he takes their good karma" [408]). Our passage in the *Vajracchedikā*, of course, does not specifically mention an actual transfer between the abused and the abuser; in fact it gives no indication of the mechanism or process by which the "bad karma" of the abused is actually eliminated. In spite of this, the basic idea here appears, as I have said, to be remarkably close to the basic idea found in the *Pāśupata-sūtra*. See also Hara 1970. For the history of the Pāśupatas see the summary in the last chapter of Lorenzen 1972: 173–92. It should perhaps be noted that Jean Filliozat has called into question Professor Hara's interpretation of the "Transfer of Merit" in Pāśupata sources (see Filliozat 1980: 111).
12. Conze in his edition cites a number of "parallels" for this passage: *Divyāvadāna* (Cowell and Neil ed.), 78, 469; *Mahāvamsa* (Geiger ed.): XVII, 56; XXXI, 125; and *Karmavibhaṅgopadeśa* (Lévi ed.), 153.14 and n. 4, etc. To these I would add only Waldschmidt 1967: 426–27. The interesting point here, however, is that our passage in the *Vajracchedikā* is not strictly speaking "parallel" with these other passages, all of which, first of all, are in verse. Typical of these verse passages is *Divyāvadāna* 79: *evam hy acintiyā buddhā buddhadharmā 'py acintiyā / acintiye prasannānām vipāko 'pi acintiyah //* ("Thus indeed the Buddhas are unthinkable, unthinkable too are the characteristics of a Buddha. Of those having faith in the unthinkable, surely then unthinkable is the effect.")
- Seen in light of these "parallel" passages it would seem that the author of the *Vajracchedikā* is playing on an old formula. He gives the old formula new meaning by introducing a significant substitution, while retaining the basic statement. He substitutes *dharmaparyāya*, "this Discourse on the Doctrine" or the "text" that contains it, for the "Buddha" of the old formula, and thereby establishes, for the "reader" familiar with the formula, the equation of the two.
13. The reader will have observed that I have so far not left the word *dharma* untranslated, and have, in fact, tried to translate it throughout. *Dharma* is, of course, a notoriously difficult term to translate, and this fact has been taken as the justification for not translating it at all. But I do not think this gets us very far. In our text the term has at least two basic meanings, and in light of this I have used two renderings. When the term is used to refer primarily to "teachings" or something taught, as in *dharmaparyāya*, I have consistently translated it by "Doctrine." When it is used in a more "philosophical" sense as an element in assertions regarding "reality," I have consistently translated it by "thing," an English term of equal richness, intending thereby the sense "whatever exists, or is conceived to exist, as a separate entity; any separable or distinguishable object of thought" (*Webster's New Collegiate Dictionary*, 883). On this aspect of the term see most recently Warder 1971. This, of course, does not differ radically from the way in which Max Müller

handled the term in the first English translation of the Sanskrit text of the *Vajracchedikā*. But, for example, where he would translate “nothing,” I would prefer “no thing,” the two having quite different senses in English. There is at least one place in our text, the compound *dharmacakṣu*, where I do not know exactly which of the two basic meanings of *dharma* is supposed to be in play. As a consequence, in this case I leave the term untranslated. There is also one place in our text where the term appears to be used in a third basic sense—*sarvadharmā buddhadharmā iti*, etc., at 8a6—and here I have translated it by “characteristics.”

14. “Wonderful arrangements’ in [my] sphere of activity” translates *kṣetravyūha*, which presumably stands for *buddhakṣetravyūha*. Here the text appears to be referring to the idea that the bodhisattva—as an integral part of his long career—should work towards effecting through his accumulation of merit the appearance of a “world,” a sphere, which is ideally suited to the pursuance of the religious goal by the individuals with whom he is concerned. This idea, and the whole complex of ideas connected with the “buddhafield,” has yet to be fully studied. Cf. Rowell 1934–37, Demiéville 1937 and Lamotte 1962: 395–404.
15. The text has here only *so ’pi tathaiva vaktavyaḥ* and Conze’s text has the same reading. But the various manuscript traditions show some uncertainty here and Müller reads *sa vitatham vadet*. Pargiter has read—and in part reconstructed—his Central Asian manuscript *vitatham evam kartavyaḥ*. The Khotanese translation has *ṣi na bayṣūṇa vūysai hvaṇai*, which Konow translates into Sanskrit as *saḥ na bodhisattvaḥ vaktavyaḥ*. The Tibetan translation in the Peking Kanjur has *de yang de bzhin du brjod par bya’o*, but the blockprint Conze cites has *de bzhin du brjod par bya’o*. The uncertainty here seems to result from the fact that the referent of *tathaiva* is not immediately clear; this is a consequence, it would seem, of the fact that it occurs somewhat earlier. First we have *evam etad subhūte yo bodhisattva evam vaded aham satvān parinirvāpayiṣyāmīti · na sa bodhisattva iti vaktavyaḥ*. This is followed by a passage giving the reason for this—a passage much longer in Conze’s and Müller’s text than it is in the Gilgit and Central Asian text. Then we have *yaḥ subhūte bodhisattva evam vaded aham kṣetravyūhān niṣpādayiṣyāmīti · so ’pi tathaiva vaktavyaḥ*. The two passages separated by the explanatory material are clearly parallel in structure, and seen in this light it appears that *so ’pi tathaiva vaktavyaḥ = na sa bodhisattva iti vaktavyaḥ*; I have translated accordingly. Conze, without noting it, has done exactly the same thing.
16. After *bahavas te lokadhātavo bhaveyuḥ* virtually all the other sources have the following passage: *subhūtir āha: evam etad bhagavann evam etad sugata bahavas te lokadhātavo bhaveyuḥ*. The absence of this passage in the Gilgit text is almost certainly to be explained as a scribal omission resulting from a typical homoeoteleuton, the skip being from the first *bahavas te lokadhātavo bhaveyuḥ* to what follows the second, omitted, *bahavas te lokadhātavo bhaveyuḥ*. Note too that the mechanical nature of the omission is indicated by the fact that, unless we assume the omitted passage was originally there, the construction of the Gilgit text does not make sense. As it now stands, what is clearly a question by the “Blessed One” to Subhūti receives no answer, and the second *bhagavān āha* is completely unnecessary.
17. This is one of the very few places where the manuscript is clearly wrong. It has a second-person-singular verbal form with a first-person pronoun.
18. Presumably here a *cittam* has been inadvertently omitted by the scribe.
19. The Gilgit text here is open to at least three interpretations: *asatād* may be intended as an ablative singular of a stem *asata*, an *-a* extension of a weak stem in *-t*. Such an ablative form is not, however, recorded by Edgerton. It may also be that we should read *asatā-d-udgrhītena*, taking *-d-* as an “inorganic” sandhi consonant or “hiatus-bridger” (cf. BHS 4.46). A third possibility is, of course, that the reading

of the Gilgit text is simply a mistake. To Conze's reference to *Dīgha-Nikāya* III.34, we might also add *Dīgha-Nikāya* III.115.

20. "Were to achieve composure" here translates *kṣāntīm pratilabheta*, and *kṣānti* is normally translated "patience." Conze in fact translates the phrase "would gain the patient acquiescence in." It is, however, possible that "patience" is not always the best translation for *kṣānti*, especially if "patience" is used with the implication of "to endure." As I understand the term, it more commonly means not "to endure" or "to accept" but to remain "unaffected by," and I think the present passage is a good example of this. Unless I am very much mistaken, the phrase *nirātmakeṣu dharmeṣu kṣāntīm pratilabheta*, which I translate as "to achieve composure in the midst of things that have no self," is intended above all else as a positive expression of the state of mind that is much more commonly expressed in negative terms, several examples of which are cited above in n. 5. That is to say, to obtain *kṣānti* is the positive expression for the same state which is negatively expressed by such formulae as "he is not depressed, not cowed, not dejected . . . he is not terrified, frightened and does not tremble with fear." But the opposite of dejection, terror and fear is not patience or endurance, it is rather something more like composure. Note too that in almost every case the absence of fear and dread and the obtainment of *kṣānti* are to take place in regard to the same basic fact, however expressed: the absence of a self. The proper reaction to this fact, and the full realization of its implications, may be expressed either positively by saying "he obtains composure in regard to it," or negatively by saying "he is not terrified, alarmed, frightened, etc." In the end they are very much the same.

INTRODUCTION: THE CENTRAL TENET OF THE YOGĀCĀRA-MĀDHYAMIKA SCHOOL*

1. Introductory Note: Śāntarakṣita and the Yogācāra-Mādhyamika School

1.1 *The Division and Synthesis of the Mādhyamika School*

The Mādhyamika school of Indian Buddhist philosophy advocates the doctrine of emptiness (*śūnyatā*), that is, the absence of intrinsic nature (*niḥsvabhāva*) in all dharmas. By asserting that dharmas have no intrinsic nature because they always co-arise dependently (*pratītya-samutpanna*), Mādhyamikas stress that no entity has an absolute reality. This theory leads to the avoidance of dogmatic extremes such as belief in production and nonproduction, existence and nonexistence, and eternalism and nihilism. Therefore, emptiness is called the Middle Path (*madhyamā pratipad*), from which the name of the school, Mādhyamika, is derived. The teaching of emptiness, which is found here and there even in the Pāli canon, was systematized by Nāgārjuna (ca. 150-250), who is considered to be the founder of the Mādhyamika school.

*It is difficult to express in words my gratitude to Professor Luis O. Gómez, who read this paper and my English translation of the MA, improving my presentation and style. Without his generous help, this work could not have been rendered in English. Professor Gómez also took the trouble to read the whole of the Tibetan text with me. Our discussions of the Madhyamaka philosophy expressed in the MA have greatly deepened my understanding of the text, and correspondingly improved the presentation of that understanding in this paper. I would like to express my sincere appreciation to Mr. Jonathan Silk, whose meticulous work as coeditor of this volume did so much to improve my contribution. I am also indebted to Professors Gregory Schopen and T. Griffith Foulk for their assistance in correcting the English text. Thanks to the published reviews of Ichigō 1985 by David Jackson 1986 and Shirō Matsumoto 1986 I was able to make several revisions, and for this I direct my appreciation to those authors.

While the tenet of emptiness remained at the core of Mādhyamika thought, over time two branches developed which differed in their understanding of the methods of establishing the reality of emptiness, that is, of proving the highest truth (*paramārtha-satya*). Later Tibetans called these two groups the Prāsaṅgika and the Svātantrika. The names of these schools appear apparently for the first time in Tibetan literature of the eleventh century, and not at all in Indian texts.¹ The leading representatives of the Prāsaṅgika were Buddhapālita and Candrakīrti, and of the Svātantrika, Bhāvaviveka. The Svātantrikas held that it was possible to prove emptiness by logic and independent inference (*svatantrānumāna*). The Prāsaṅgikas, in contrast, thought that logic and language were yet another kind of obstacle to the attainment of the experience of emptiness; their arguments point out the undesirable consequences (*prasaṅga*) of any view or set of views.

The divisions which arose with regard to the understanding of conventional truth (*saṃvṛti-satya*), on the other hand, were already established by the eighth century. The names of the schools thus distinguished are the Yogācāra-Mādhyamika and the Sautrāntika-Mādhyamika.² This division can be said to have resulted from the problem of whether or not the existence of an external object was to be affirmed from the viewpoint of conventional truth. Śāntarakṣita and the Yogācāra-Mādhyamikas held the view that conventional truth does not know an external object, while Bhāvaviveka and the Sautrāntika-Mādhyamikas held the opposite view. Both the Yogācāra-Mādhyamika and the Sautrāntika-Mādhyamika belong to the Svātantrika division of the Mādhyamika school. They are thus sometimes referred to as the Yogācāra-Svātantrika-Madhyamaka and the Sautrāntika-Svātantrika-Madhyamaka.

The name of the Yogācāra-Mādhyamika itself, which has yet to be discovered in Indian literature, suggests to us a process of assimilation and synthesis of the Yogācāra school with the Mādhyamika. Śāntarakṣita says:

93 Therefore, those who hold the reins of logic while riding the carriage of the two systems attain the stage of a true Mahāyānist.

Kamalaśīla comments that "the two systems" refers to the Mādhyamika and the Yogācāra.³

1.2 The Essence of the Thought of the Yogācāra-Mādhyamika School

The central tenet of the Yogācāra-Mādhyamika school is explained in the following two verses of Śāntarakṣita's MA:

- 91 That which is cause and effect is nothing but knowledge. It is established that knowledge is that which is self-validated.
- 92 Based on [the standpoint of] mind-only one must know the nonexistence of external entities. Based on this standpoint [of the lack of intrinsic nature of all dharmas] one must know that there is no self at all even in that (which is mind-only).

The purport of these two verses can be understood by reference to the following verses in the MA:

- 64 One should understand that conventional (truth) is in essence (1) that which is agreeable and tacitly accepted only as long as it is not investigated critically (*avicāryai-karamaṇīya*); (2) that which is characterized by arising and decay; and (3) whatever has causal efficiency.
- 65 Even that which is agreeable and tacitly accepted only as long as it is not investigated critically implies the production of similar successive effects conditioned by their own successive causes.
- 66 Therefore, it is also correct to say that it would be impossible for conventional truth to be causeless. But if (you claim that) its substratum (*upādāna*) is real, you have to explain what it is.

Although all entities have in reality no intrinsic nature, that is, they are empty, they are understood to be characterized by conventional truth. The three definitions of conventional truth given in verse 64, among which the first seems characteristic of the Yogācāra-Mādhyamika school, are captured in the expression "that which is cause and effect" in verse 91. It follows that, since Śāntarakṣita explains conventional truth as that which co-arises dependently, it is clear that it has a cause. The cause, as suggested in verse 65, is the individual series (*saṃtāna*) of

moments of consciousness arising from the beginningless past.⁴ This idea is expressed in verse 91 as “nothing but knowledge,” and in verse 92 as “based on [the standpoint of] mind-only one must know the nonexistence of external entities.” These verses thus attribute conventional truth to mind-only.

Furthermore, Śāntarakṣita proposes that even mind-only is without intrinsic nature or self. One should not cling to mind-only. This idea can be found in verses 66cd and 92cd in his MA.

66cd But if (you claim that) its substratum (*upādāna*) is real, you have to explain what it is.

92cd Based on this standpoint [of the lack of intrinsic nature of all dharmas] one must know that there is no self at all even in that (which is mind-only).

Adopting Buddhist Sanskrit philosophical terminology, the central tenet can be described by the following equation, in which the arrows indicate both conceptual equivalence and the direction of religious progress:

$$\begin{array}{l} \textit{tathya-saṃvṛti-satya} \longrightarrow \\ \textit{vijñaptimātra (svasaṃvedana)} \longrightarrow \\ \textit{anātman.} \end{array}$$

In other words, conventional truth (*saṃvṛti-satya*) is nothing but mind-only (*vijñaptimātra*) and has no intrinsic nature (*anātman*). This equation reflects Śāntarakṣita’s interpretation and evaluation of the four major philosophical schools of Buddhism. Śāntarakṣita shows a gradual philosophical development from belief in the existence of external objects, maintained by the Sarvāstivāda and the Sautrāntika, through the mind-only theory of the Yogācāra, to the Mādhyamika’s emptiness, which Śāntarakṣita considers to be the ultimate stage.

The Yogācāra-Mādhyamika school evolved out of philosophies influenced by Buddhist logic (developed by Dignāga and Dharmakīrti), which refuted the theories of the Sarvāstivāda and the Sautrāntika, and it adopted the mind-only theory as a means (*upāya*) to attain the ultimate truth. At the same time, the school consistently maintained and recognized as its fundamental position the Mādhyamika theory that all dharmas have no intrinsic nature.

1.3 Śāntarakṣita's Philosophical Position as Found in his Interpretation of the Concept of Nonproduction (an-utpāda)

Śāntarakṣita's philosophical position can be summarized in his interpretation of the concept of nonproduction (*an-utpāda*). He turns first to the *Laṅkāvatāra-sūtra* for the definition of nonproduction from the standpoint of the Yogācāra and the Mādhyamika, quoting the following two passages:

I maintain that nonproduction [in the theory of the Yogācāra school] means to establish mind-only [by] the exclusion [of the rest of the five kinds of] causal conditions (*hetupratyaya*) and [by] the denial of cause (*kāraṇa*).⁵

Entities do not exist as external realities, nor are they objects contained in the mind. The abandonment of all views is defined as nonproduction.⁶

As these verses demonstrate, from the point of view of the Yogācāra school, nonproduction is defined as the establishment of mind-only. In contrast, the Mādhyamika school defines it as the abandonment not only of the intrinsic nature of interior and external entities but also of all views of non-Buddhist and Buddhist schools. In this regard, we must take care to notice that the mind-only theory of the Yogācāra school is included in "all views."

Next, by quoting two stanzas attributed to Nāgārjuna's *Yuktiṣaṣṭikā*, Śāntarakṣita traces his idea back to the founder of the Mādhyamika:⁷

Here, nothing is produced; nothing is annihilated either. Appearance and disappearance take place only in our knowledge.⁸

The four material elements (*mahābhūta*), etc., taught (by the Blessed One) are in fact reduced to consciousness. (But) since that (consciousness) is also refuted by (true) wisdom, is this (reduction) not a false conception?⁹

These verses tell us that what appears and disappears is nothing but knowledge and that even the great elements taught by the Blessed One cannot be supposed to be distinct from knowledge. The words "consciousness" (*viññāna*) and "true wisdom" (*jñāna*) in the second verse can be interpreted as referring to the knowledge of the Yogācāra and the Mādhyamika, respectively. This interpretation can be supported by ref-

erence to the philosopher Ratnākaraśānti's PPU, in which he defines "true wisdom" as knowledge completely free from error. He regards this "true wisdom" as superior to "consciousness."¹⁰ Although, of course, the Yogācāra school had not yet been established at that time, the second of the two verses attributed to Nāgārjuna quoted above clearly criticizes the concept of mind-only. By quoting Nāgārjuna's verses, Śāntarakṣita summarizes his position. That is, Śāntarakṣita maintains that conventional truth is nothing but mind-only but, nevertheless, that mind-only has no intrinsic nature. He affirms the Yogācāra theory from the standpoint of conventional truth, but criticizes it from that of ultimate truth.

1.4 Śāntarakṣita's Position Supported by Quotations from the LA

Śāntarakṣita supports his position in the MAV by citing three famous verses from chapter ten of the LA. There are some textual problems in the published texts of the LA, and I translate the passage according to Kamalaśīla's MAP:

- 256 Based on [the standpoint of] mind-only, [the yogin] must not imagine external objects. Abiding in the object having suchness [as its characteristic], he must go beyond even mind-only, [since there is no subject when there is no object].
- 257 Having gone beyond mind-only, he, moreover, must go beyond [the attachment to knowledge of] non-manifestation (of the subject and the object). The yogin who abides in the stage of the nonmanifestation [of the knowledge of the previous nonmanifestation] realizes (the truth of) the Great Vehicle.
- 258 [At this stage the yogin, since there is no longer something to be sought], is calmed and purified by his vows [for the benefit of sentient beings]. Knowledge (in this stage) which is the best and has no self does not see [intrinsic nature anywhere, even] in [the latter stage of the knowledge of] nonmanifestation.¹¹

The quotation of these stanzas from the LA suggests the development, as shown in verse 92 of the MA, from belief in the existence of external objects, through the mind-only theory, to the stage that even mind-only

has no intrinsic nature. Furthermore, by analyzing the meaning of non-manifestation (*nirābhāsa*) into two stages, the Alikākāravāda of the Yogācāra school and the Mādhyamika, Professor Yūichi Kajiyama examined Kamalaśīla's interpretation of these verses as presented in his *Bhāvanākrama*. He concluded that Kamalaśīla viewed the development leading to the highest philosophical position, that of the Mādhyamika, as divided into the following five stages: (1) the Sarvaśtivāda; (2) the Sautrāntika; (3) the Satyākāravāda-Yogācāra, (4) the Alikākāravāda-Yogācāra; and (5) the Mādhyamika theory of emptiness.¹²

1.5 Similar Ideas Shared by Jñānagarbha, Kamalaśīla and Haribhadra

Jñānagarbha is a pivotal figure in the development of the Mādhyamika school. In an important work, the SDVV, he holds that the Mādhyamika stage of nonself is to be regarded as higher than that of the Yogācāra's mind-only:

32 [The Blessed One], whose self-nature is compassion, seeing [how people had been bound by] the fetters of imagination by means of various types of (teachings) such as mind-only, preached bondage and liberation.

The Blessed One understands action and its fruits and has compassion as the intrinsic nature of his body. He, indeed, having seen people bound by the fetters of imagination in the prison of the cycle of birth and death, became completely free from attachment to entities by means of the progressive teachings—(offered) according to the mentalities (of his listeners)—of the *skandhas*, *dhātus* and *āyatanas*, mind-only and the nonself in all dharmas, and preached to people about bondage and liberation.¹³

He goes on to add that,

In (pure) knowledge as such, the intrinsic nature of (any) entities, (be they) atoms, nonduality (or the like), does not appear. Conventions do not apply to anything which does not appear. Although there is something which appears, there is nothing which is the intrinsic nature of an entity, because neither the assemblage [of atoms] nor the two are the entity.¹⁴

Jñānagarbha's statements regarding the order of Buddhist teachings and the nonintrinsic nature of that which appears remind us of Śāntarakṣita's position presented above in MA 92. The following passages from Kamalaśīla's works could be added to bolster our interpretation:

The entrance to mind-only alone is not the entrance to the truth.¹⁵

Only the entrance to nondual knowledge is the entrance to the truth.¹⁶

One cannot understand all at once the lack of intrinsic nature of all dharmas. First, based on [the standpoint of] mind-only, one gradually understands the lack of intrinsic nature of external objects. Therefore, it is said (in the LA X.154ab):

Both the subject and the object are rejected by those who carry out a logical investigation.

Then, gradually, having examined the intrinsic nature of mind, they understand that even that [mind] is without self, and follow the most profound path.¹⁷

In the following passage we can see that Haribhadra builds his view on those of his predecessors.

Basing oneself on external objects by repudiating *ātman*, etc.; (1) afterwards depending on the understanding that the triple realm is mind-only because of the teaching of the imagined, dependent and consummate self-natures; (2) then [investigating] the two conventional truths by distinguishing between true and untrue, conforming and not conforming (respectively) to (their) real causal efficiency, and showing that what is agreeable and tacitly accepted only as long as it is not investigated critically depends on its own successive former causes; (3) based on true conventional truth (you) must practice giving and the rest according to (worldly) appearance as (if you were) a magically created person, (4) and (you) must (mentally) cultivate (the notion of) nonproduction from the point of view of ultimate truth. You must thus gradually penetrate the Perfection of Wisdom.¹⁸

This passage clearly reflects the ideas adopted by Jñānagarbha and Śāntarakṣita: "true and untrue, conforming and not conforming (respectively) to (their) real causal efficiency" corresponds to verse 12 of the

SDV and “what is agreeable and tacitly accepted only as long as it is not investigated critically depends on its own successive former causes” to verses 64 and 65 of the MA.

In Śāntarakṣita and Kamalaśīla, who are regarded as representatives of the Yogācāra-Mādhyamika school, we meet the culmination of the development of that school, after some six hundred years of evolution in Madhyamaka thought. The school grew from the pioneer Jñānagarbha, flourished in the time of Śāntarakṣita and Kamalaśīla, and was inherited by Haribhadra. As the preceding discussion shows, Śāntarakṣita’s philosophy can, in fact, be traced back to that of Jñānagarbha. Jñānagarbha, therefore, should be recognized as the one who took the lead in establishing the Yogācāra-Mādhyamika school. Jñānagarbha’s position has not been well defined or properly recognized in Tibetan *grub mtha’* texts, where he is variously identified as belonging to either the Yogācāra-Mādhyamika or the Sautrāntika-Mādhyamika, or sometimes even to the “Lokaprasiddhavargacārimādhyamika,” a line to which Candrakīrti is also sometimes assigned.¹⁹ The school in its mature and eclectic form gradually died out in India, but left a long-lasting mark on Tibetan Buddhism. Our understanding of the theory of the Yogācāra-Mādhyamika school will be explained in more detail below.

2. Conventional Truth Is Nothing but Mind-only

2.1 Śāntarakṣita’s View of Conventional Truth

Central to the synthesis achieved in Yogācāra-Mādhyamika thought are the views Śāntarakṣita proposed with regard to conventional truth. In the first sixty-two verses of MA and its auto-commentary MAV, Śāntarakṣita attempts to prove the absence of an intrinsic nature in all dharmas according to reason (*yukti*).²⁰ The main subject is explained in syllogistic form in the first kārikā of the treatise:

- 1 (P) Those entities postulated as real by Buddhist and non-Buddhist schools have in reality no intrinsic nature,
- (H) Because they possess neither a single nor a plural nature,
- (D) Like a reflection.²¹

Since the absence of an intrinsic nature in all dharmas tends to be understood by his opponents as nihilism, Śāntarakṣita counters this position by characterizing it as follows:

63ab Therefore, all entities are understood as being characterized only by conventional (truth).

This assertion raises the question of how conventional truth is to be understood. Śāntarakṣita summarizes it in three ways: (1) not nothingness; (2) produced by causation; and (3) having the nature of mind and mental states (*citta-caitta*).

Kamalaśīla further expands Śāntarakṣita's ideas by dividing conventional truth into: (a) mere verbal usage (*śabda-vyavahāra*) and (b) dependent origination or causal efficiency. Dependent origination or causal efficiency is well known even to a cowherd, and is that to which the word "convention" refers in common usage (*saṃketa*).²² Kamalaśīla calls the first of these "false conventional truth" (*mithyā-saṃvṛti*) and the second "true conventional truth" (*tathya-saṃvṛti*). The two are explained as follows:

The term "true conventional truth" is used because it designates accurately what is accepted (as real by the world). "False conventional truth" refers to conceptual constructs—such as God, etc.—which have nothing to do with what is accepted (as real by the world).²³

When Śāntarakṣita uses the term "conventional truth," he is referring only to true conventional truth. He defines it in the MA and MAV:

64 One should understand that conventional (truth) is in essence (1) that which is agreeable and tacitly accepted only as long as it is not investigated critically; (2) that which is characterized by arising and decay; and (3) whatever has causal efficiency.

This (type of) conventional truth is not mere verbal usage (*śabda-vyavahāra-mātrātma*). True conventional truth (refers) to the entities experienced and affirmed, to that which is co-arisen dependently, and (yet) is not able to withstand any investigation.²⁴

Śāntarakṣita then identifies this concept of conventional truth with the second clause in Nāgārjuna's stanza defining emptiness:

That which co-arises dependently we call emptiness. That (emptiness) is a dependent designation. Precisely that is the Middle Path.²⁵

Thus, Śāntarakṣita regards true conventional truth as a synonym for "a dependent designation" (*upādāya prajñapti*). But he anticipates a possible objection. An opponent could argue that Śāntarakṣita's interpretation contradicts the definition of the two-truth theory in the *Akṣayamati-nirdeśa-sūtra*, in which conventional truth is defined as that which is explained by words, language and signs. The sūtra says:

What, then, is conventional truth? It is (a) all the conventional designations of the world (*loka-vyavahāra*) and (b) (all) that is explained by words, language and signs. (On the other hand), what is the highest truth? It is the stage where there is no activity of mind, not to mention of words.²⁶

Śāntarakṣita connects his conception of true conventional truth with the first part of the sūtra's definition (clause "a"), but does not discuss the second part in the MAV. He interprets the first part as follows:

The "conventional designations of the world" (*loka-vyavahāra*) refer to the world of sentient and inanimate beings. They are concerned with the experiencer and the experienced, and they include the successful performance of human actions.²⁷

Therefore the absence of an intrinsic nature in all dharmas does not mean nothingness, since even this absence is characterized by true conventional truth, as defined above.

Kamalaśīla, on the other hand, considers mere verbal usage to be a form of false conventionality. This means that he would term class (b) of the sūtra's typology of conventional truth "false conventional truth." Why is this aspect of linguistic usage excluded from true conventional truth? Kamalaśīla explains:

(False conventional truth; *mithyā-saṃvṛti*) does not agree with direct perception (*pratyakṣa*), etc. Thus ordinary verbal usage (*śabda-vyavahāra*) does not have as its domain the definition of things which co-arise dependently, since it has only the universal

(*sāmānya*) as its domain. That universal, moreover, is nonexistent because its nature is imaginary (*parikalpita-svabhāva*). Therefore, to affirm its existence is to deny the well-established causal efficiency of entities, because the universal cannot possess causal efficiency (*arthakriyā-śakti*).²⁸

Up to this point, the Mādhyamika-Yogācāra theory of conventional truth can be understood as the logical development of Mādhyamika and Sautrāntika theories. When the question of the origin of the causal process arises, however, Śāntarakṣita and Kamalaśīla rely on Yogācāra doctrine. Since conventional truth is emphatically explained by Śāntarakṣita as that which co-arises dependently or as dependent designation, it is very clear that it has a cause. But what is the cause? If it has a cause only in the usual sense of the word, then it does not mean much to say that it has a cause. Śāntarakṣita therefore employs the Yogācāra concept of a beginningless cause or karmic substratum, as he suggests in the following stanzas from the MA:

- 65 Even that which is agreeable and tacitly accepted only as long as it is not investigated critically implies the production of similar successive effects conditioned by their own successive causes.
- 66 Therefore, it is also correct to say that it would be impossible for conventional truth to be causeless. But if (you claim that) its substratum (*upādāna*) is real, you have to explain what it is.

Kamalaśīla expands:

In this respect, if it were established that it (conventional truth) only has a cause in the usual sense (of the word), then it would be a case of (the fallacy of) proving what has already been proved (*siddha-sādhana*), for we claim that the cause of conventional reality is a beginningless (series of) successive causes.²⁹

Thus, the school identifies cause with the individual series (*saṃtāna*) of moments of consciousness, existing since a beginningless past. In an ultimate sense this cause is unreal. Furthermore, Śāntarakṣita proceeds to explain that conventional truth is nothing but mind-only. In the concluding portion of his MA and MAV Śāntarakṣita states:

91 That which is cause and effect is nothing but knowledge.
It is established that knowledge is that which is self-validated.

One cannot conceive of the nature of knowledge as something other than a self-established nature. Even this self-established nature is just like the form of a dream, an illusion, etc.³⁰

This or similar explanations may, in fact, be the basis for proposing the name Yogācāra-Mādhyamika.³¹ Indeed, Śāntarakṣita explains that the bifurcation of the Mādhyamika school into the Yogācāra-Mādhyamika and the Sautrāntika-Mādhyamika was a result of differing views concerning the characteristics of conventional truth.³² Bhāvaviveka, regarded as the founder of the Sautrāntika-Mādhyamika school, maintains that conventional truth has the nature of an external entity. He interprets that passage of scripture quoted above which asserts that the triple world is nothing but mind-only as merely a critique of the "self."³³ Śāntarakṣita's comments on Bhāvaviveka's views have been aptly summarized by Professor Kajiyama as follows:

The Buddhas have taught the theory of mind-only to repudiate the existence of a soul which is conjured up by non-Buddhist philosophers as the subject of actions (*kartr*) and the enjoyer of their fruits (*bhoktr*). This opinion of [the Sautrāntika-] Mādhyamikas is tantamount to saying that external things can be as real as the mind insofar as conventional truth is concerned, although the soul must be denied.³⁴

Śāntarakṣita himself, on the other hand, does not admit the existence of an object external to the mind. He maintains instead that conventional truth has only the nature of mind and mental states (*citta-caitta*).³⁵ In order to understand this position more completely, it is necessary to examine Śāntarakṣita's disagreements with Bhāvaviveka in more detail.

2.2 Bhāvaviveka's View of "True Conventional Truth" (*tathyasamvṛti*)

Another instance of the disagreement between Śāntarakṣita and Bhāvaviveka regarding the characteristics of conventional truth is found in their respective usage of the term *tathya-samvṛti-satya*. Emptiness or the absence of intrinsic nature of all dharmas can be understood from

the point of view of ultimate truth as an awareness which goes beyond verbal usage. But, if one must verbally express emptiness in order to lead sentient beings to this awareness, one can only refer to it as "nonproduction." Śāntarakṣita's MA says:

69 Therefore, there is no entity that can be established in reality. Therefore, the Tathāgatas preached the nonproduction (*anutpāda*) of all dharmas.

However, adopting the doctrine that the Blessed One had preached the absence of an intrinsic nature of all dharmas as nonproduction posed new problems to Buddhist exegesis. In other words, the attempt to explain or conceptualize the truth of emptiness, which Śāntarakṣita argues goes beyond all verbal usage, raises other questions: (1) If the statement of the Blessed One should be regarded as absolute truth, is the teaching of nonproduction itself the highest truth or not? (2) If the idea of nonproduction, which should imply the absence of an intrinsic nature in all dharmas, is understood as the negation of production, is that the highest truth or not?

Śāntarakṣita's solution clearly shows that both nonproduction as a teaching and as a negation is only conventional truth, not the highest truth. With regard to (1) Śāntarakṣita states:

Although nonproduction, etc., is also implied in true conventional truth (*tathya-samvṛti*),

70 Some say that this [nonproduction] is the highest truth, since it agrees with the highest truth. (But in my view) it [the highest truth] is that which is completely free from all accumulations of fictional human ideas (*prapañca*).

The highest truth is that which cuts off the net of all accumulations of fictional human ideas such as existence and nonexistence, production and nonproduction, emptiness and nonemptiness, etc.³⁶

Thus, when Śāntarakṣita uses the term "highest truth" he is referring only to that which is not susceptible to explanation; language, therefore, is completely excluded. So, even the teaching of nonproduction of the Blessed One is regarded as only true conventional truth.

Śāntarakṣita's reason for referring to this problem here in the MA seems to be that Bhāvaviveka classified the teaching of nonproduction

as the highest truth. As already shown by the studies of several scholars, Bhāvaviveka divides the highest truth into two types: *pāramārthya-satya* and *sāṃketika-pāramārthya-satya*, according to terminology used in Avalokitavrata's *Prajñāpradīpa-tīkā*.³⁷ In Bhāvaviveka's *Tarkajvālā*, the first of these two types of highest truth is called "that which is attained without conscious effort" (*mngon par 'du byed pa med par 'jug pa*), and the second "that which is attained by conscious effort" (*mngon par 'du byed pa dang bcas par 'jug pa*).³⁸ Bhāvaviveka furthermore identifies each type of highest truth with one stanza in Nāgārjuna's MK, the former referring to the content of MK XVIII.9 and the latter to MK XVIII.10. He divides the second type of highest truth into: (1) nonconceptual knowledge; (2) the teaching of nonproduction; and (3) wisdom by learning, investigation and meditation. Bhāvaviveka considers the second type of highest truth as an excellent means to attain the first type of highest truth.

But for the ladder of true conventional truth, the learned man would not be able to mount the top of the palace of (the highest) truth.³⁹

However, as long as the second highest truth depends on the twelve bases of cognition (*āyatana*s),⁴⁰ it cannot be denied that essentially it belongs to the category of conventional truth. Although Bhāvaviveka applies the term "true conventional truth" (*tathya-samvṛti*) to the second highest truth, he no doubt evaluates it highly since he considers it to be a means leading to the first type of highest truth. This implies that Bhāvaviveka considered the teaching of nonproduction, distinct from general verbal convention, to be something belonging to the highest truth. This position created the opportunity for Bhāvaviveka's successors to attack him. In establishing the first type of highest truth beyond the second type, Bhāvaviveka seemed to think that, even having affirmed "production" as worldly verbal convention, "nonproduction" could be established on the level of the highest truth. Jñānagarbha, Śāntarakṣita and others pointed out that this position is inconsistent with Nāgārjuna's idea that the highest truth cannot be taught without relying on verbal convention.⁴¹ In the SDV and its commentary the SDVV, Jñānagarbha says:

9ab Negation of production, etc., is also postulated [as the highest truth], since it agrees with reality.

The reason is that it negates that entity which is imagined as real production, etc. We postulate (this negation) as the highest truth, since the other (school, Yogācāra) understands (it) as nothing but reality. The word "also" has a cumulative (qualifying) meaning.

However, when it is investigated by reason (the negation of production is) nothing but conventional truth. If asked the reason why (we reply):

9cd Because of the nonexistence of the object to be negated, it is clear there is in reality no negation.

For negation does not take place if there is no object to be negated, and it is not reasonable to negate that which has no object.

If (someone objects that) the object to be negated is that which is imagined by (our) opponents to be real—such as the production of form and the rest—which are (merely ideas) caused by conceptualization, then:

10ab How could the negation of the imagined nature be the nonimagined (nature)?

Since the object to be negated is only the imagined (nature), the negation (of it) will also be the imagined nature, just like the negation of the darkness (of complexion) and so forth of the son of a barren woman. Even though there is no negation of real [production, etc.], there is no existence of production, etc., since nonproduction, etc., is not pervaded by the negation (of production, etc.), and there is no evidence to prove the existence of the latter (i.e., production, etc.).

10c Therefore, this is conventional (truth).

"This" refers to the absence of real production, etc.

10d (It is) not the highest truth and not real.⁴²

Production, etc., which are the objects of the negation are not real, since they are that which is imagined. Since there is no real object to be negated, it is logically unreasonable to negate it. The negation of the imagined entity is itself nothing but imagination. Therefore, it is correct to say that the negation of production, etc., belongs to conventional

truth, not to the highest truth. This view reminds us of that discussed by Śāntarakṣita in the MA:

71 Since there is no production and the like, [in reality] there can be no nonproduction and the like. Since (production), the substantial referent (of nonproduction), has been rejected, verbal expression with reference to the latter (i.e., nonproduction) is impossible.

72 When there is no object, you cannot rightly apply any negative (to it). If [nonproduction arose] depending on an idea (*vikalpa*), it would be conventional, not real.

If there is no production, etc., it is impossible to apply words to explain it. Therefore, because what is objectless is negated, there can be no nonproduction, etc., since there is not even production.⁴³

In other words, Śāntarakṣita asserts that because “production” has been repeatedly negated, there can be no “nonproduction.” Since “production” does not exist, it is not appropriate to construct a negative by applying the negation “non” to that which does not exist. If “nonproduction” arises depending on an idea (*vikalpa*), it is nothing but conventional truth.

Kamalaśīla comments on “nonproduction” as follows:

“Nonproduction, etc.,” means the conceptualization (*vikalpa*) of nonproduction, etc., or the determination of the nature of entities by conceptualization. The word “etc.” includes cessation, final peace and so on.⁴⁴

As these comments suggest, for Śāntarakṣita “nonproduction” is a conceptual construct. Similarly, nonproduction originally refers to the absence of intrinsic nature; therefore one cannot try to determine its intrinsic nature. Nonproduction does not satisfy the definition of the highest truth which is free from the net of fictional human ideas (*prapañca*). Since production and nonproduction and existence and nonexistence are nothing but fictions created by the human mind, they are relative concepts depending only on ideas. Śāntarakṣita’s observations on conventional truth seem to derive from the experience of meditation. He penetrates into the nature of our ordinary world on the basis of his profound religious insight. For Śāntarakṣita, in sum, our everyday world of conventional truth is that which is co-arisen dependently, that which

is agreeable and tacitly accepted only as long as it is not investigated critically, and that which has the nature of mind and mental states arising from the individual series of consciousnesses from the beginningless past.

2.3 Jñānagarbha's View of Conventional Truth

Since Śāntarakṣita's idea of conventional truth seems very much in accordance with that of Jñānagarbha, in what follows I translate with some comments of my own the key passages concerning conventional truth from Jñānagarbha's *Satyadvaya-vibhaṅga-kārikā* (SDV) and *Vṛtti* (SDVV).

First, Jñānagarbha defines the two truths as follows:

- 3 Between the two truths, conventional and ultimate, which are preached by the Sage, only that which is as it appears is convention; that which is otherwise is the other.⁴⁵

The commentary explains:

[The other] means the highest truth. The truth (of conventional truth) is ascertained conventionally according to the experience of (ordinary) people including a female cowherd, etc. But it is not (ascertained) in reality, because the meaning of an entity is defined (only) according to experience.⁴⁶

Subsequently he explains conventional truth as follows:

If asked what so-called conventional truth is, (we reply):

- 15ab It is maintained that conventional truth is what covers reality or that in which it is covered.

The concealment of the truth by or in one's mind, (and the affirmation of) what is thus generally accepted (to be real) by the world, is maintained to be conventional (truth). In a sūtra (LA X.429) it is said:

Entities arise from the point of view of conventional truth. From the point of view of ultimate reality, they have no intrinsic nature. Error with respect to the absence of an intrinsic nature is postulated as true convention.

15cd Therefore, [from the point of view of conventional truth] all these are true. From the point of view of ultimate reality they are not true.

All these things are true from the point of view of conventional (truth). This means that they are true (only) in the sense generally accepted by the world.⁴⁷

Moreover, Jñānagarbha explains:

21ab This (conventional truth) is not to be investigated critically because its nature (exists) as it appears.⁴⁸

We find this developed in Śāntarakṣita's sub-commentary on this half-verse, which states:

"Because its nature (exists) as it appears" means (it has a nature) which is agreeable and tacitly accepted only as long as it is not investigated critically. As for this conventional truth, it is not to be investigated, not to be examined.⁴⁹

Further on in the SDV Jñānagarbha adds:

28 The phenomenon which appears is never rejected. It is not reasonable to reject anything which is experienced.⁵⁰

As the preceding passages suggest, Śāntarakṣita owes one of his definitions of conventional truth (i.e., *avicāraikaramaṇīya*, in MA 64) to Jñānagarbha's basic idea of conventional truth "as it appears."

This being the nature of conventional reality, should we then also regard as conventional truth the double moon that appears to those who have defective vision? Partly in response to this issue, Jñānagarbha distinguishes two types of conventional truth, namely true and false conventional truth. These correspond to the classification of Kamalaśīla discussed above. The criteria for Jñānagarbha's classification are two: (1) whether or not it is of the nature of imagination (*parikalpita-svabhāva*); and (2) whether or not it has causal efficiency (*arthakriyā*). Thus, true conventional truth is defined as that which is not of the nature of imagination and which has causal efficiency. This definition furthermore corresponds to Śāntarakṣita's own in MA 64.

Jñānagarbha refines his position as follows:

Conventional truth is divided into two kinds by the fact that it is true or false.

8 A bare entity devoid of the imagined object and co-arising dependently is known as true conventional (truth). False (conventional truth) is the imagined (object).

“The imagined object” implies “production [and duration] etc.,” “the appearance of (ideas in) knowledge” and “the transformation (*pariṇāma*) of the predominant cause (*pradhāna*) and the gross elements (*bhūta*)” (which are postulated as) real (by Buddhist and non-Buddhist schools) and so forth. (True conventional truth is) that which is devoid of these. Something is a bare entity because its causal efficiency is as it appears. (An entity which) arises conditioned by causes and conditions is to be known as true conventional truth. Indeed, all entities which appear from a cause, in the knowledge of unwise men as well as (that of wise men), are understood as true conventional truth, for they are entities determined in conformity with that which appears in knowledge. (Such notions as) “production,” etc., have no counterpart in reality, but are things merely imagined, and are dependent on an established theory. Otherwise, the dispute (on the subject of production, etc.) would not occur. As for the thing which appears in the knowledge of both the opponent and the proponent, no dispute will occur. If it does occur, it is contradicted by direct perception, etc. Production, etc., postulated as real, are (known as) false conventional truth, since they are constructed by conceptualization.⁵¹

The twelfth *kārikā* of SDV and its commentary qualify the above:

12 Although [all knowledge is] the same as regards (the nature of) appearance, conventional (truth) is divided into true and false (conventional truth), depending on whether or not it has causal efficiency.

Although knowledge is the same in regard to having an appearance of a clear image, ordinary people understand water, etc., to be true and mirages, etc., to be false by determining whether or not their appearance misrepresents their causal efficiency. The nature of these two (conventional truths) is strictly speaking the same, in the sense that (they both) are devoid of intrinsic nature. They are distinguished by determining whether or not they are

as they appear. Whether (their appearance) misrepresents causal efficiency or not is (determined by the) way it is known (in the world), since even [causal efficiency] has no (intrinsic) nature.⁵²

Jñānagarbha's view of conventional truth can be summarized as follows: true conventional truth is that which is not of the nature of imagination, co-arises dependently, has causal efficiency, and appears in the knowledge of men, whether they be wise or not. On the other hand, false conventional truth has been explained as that which is of the nature of imagination and which possesses no causal efficiency. Thus, we can easily understand that Jñānagarbha's view is reflected in the definition of conventional truth adopted by Śāntarakṣita and Kamalaśīla.

2.4 Śāntarakṣita's Epistemology: Self-cognition (*svasamvedana*)

Jñānagarbha's SDVV and Śāntarakṣita's commentary to the same (SDVP) provide more arguments in support of Śāntarakṣita's statement in MA 91 that conventional truth is nothing but mind-only. As discussed above, Jñānagarbha defines conventional truth as that which is exactly as it appears. Commenting on this view, Śāntarakṣita says:

The statement "conventional truth is that which is exactly as it appears" refers to direct perception (*pratyakṣa*).⁵³

Now, Jñānagarbha, explaining stanza 30 of his SDV, says:

This body of color-form, etc., undefiled by the evils of conceptualization, is by nature dependent on others, and is only an appearance of knowledge. (Nevertheless) it cannot be rejected, and if one were to reject it, one would certainly undermine (the validity of) direct perception, etc.⁵⁴

Śāntarakṣita comments on this passage as follows:

[Question:] And what is ("the body of color-form, etc.")?

[Answer:] It's "nature is to be dependent on others," since it arises conditioned by causes and conditions.

[Question:] Why is the body not defiled by the evils of conceptualization?

[Answer:] Because "it is only an appearance of knowledge." This means the appearance of knowledge detached from concepts. The word "only" implies that it rejects the accompanying concept. Since such things as color-form, etc., are self-cognized, (the phrase) "it cannot be rejected" is connected to "and if one were to reject it one would certainly undermine."

[Question:] Undermine what?

[Answer:] "Direct perception, etc." The word "etc." implies inference, etc.⁵⁵

In the *Madhyamakāloka* of Kamalāśīla, we find the following related passage:

Among [the three natures (*trisvabhāva*)], the dependent nature (*paratantra-svabhāva*) is the one which is acceptable only as long as it is not investigated critically, the one which is exactly as it appears, and the one which co-arises dependently.⁵⁶

Combining the points raised in the preceding discussion, we find the following terms used as synonyms of *tathya-saṃvṛti*:

tathya-saṃvṛti = *ji ltar snang ba* (*yathādarśanam* = *yathāprati-*
bhāsanam or *yathānirbhāsanam*) = **pratyakṣa** = *pratītya-*
samutpāda = *paratantrasvabhāva* = *vijñaptimātra* = **svasañ-**
vedana = **avicāraikaramaṇīya**.⁵⁷

Therefore, these passages corroborate the Tibetan sources, which describe the Yogācāra-Mādhyamikas as those who admit only self-cognizing consciousness and reject external objects.⁵⁸ Moreover, this list of synonyms enables one to appreciate the manner in which the Yogācāra-Mādhyamika school integrates its epistemology with the theory of the two truths.

What, then, is Śāntarākṣita's idea of the self-cognition of knowledge? He expounds the theory of the self-cognition of knowledge in his *Tattvasaṃgraha* (TS) as follows:

1998 Knowledge, whether it has an image or not, or an image different (from the external object), can never cognize any external object.⁵⁹

Kamalaśīla comments on this verse as follows:

Knowledge, either with no image, or with an image, or with an image which is different from the image of the object, cannot grasp any external (object). There is not any other kind (of knowledge). Therefore, even when there is an external individual series, mind-only is established, since knowledge always cognizes only itself.⁶⁰

Let us examine the characteristics of self-cognition (*svasaṃvedana*) in greater detail. First, the nature of *svasaṃvedana* is illumination (*prakāśa*). It is considered to be nondual because it lacks the dichotomy of the grasping and the grasped. This can be inferred from the following verses in Śāntarakṣita's TS:

2078 (P) Therefore, that which is the subject of the dispute (*svasaṃvedana*) is considered to be nondual, since it is devoid of object and subject (*vedyakarṭṛtvavīyogāt*),
 (H) Because it is of the nature of knowledge (*vijñānatva*),
 (D) Like a reflection.⁶¹

2081 The nature of knowledge is its capacity to illuminate, so that it does not have a place in the grasped (object). Since (knowledge endowed) with no image, etc., is not reasonable, the pervasion (*vyāpti*) (of knowledge by nonduality) is established.⁶²

On the "illuminating" nature of knowledge, Kamalaśīla says the following:

By self-cognition we do not mean the nature of a subject ("the perceiver"; *grāhaka*). Then what is it? It has as its nature illumination by itself, intrinsically; it is just like the glow in the sky.⁶³

Second, since the epistemological process is only knowledge cognizing itself, knowledge is always endowed with an image. The image (*ākāra*) is nothing but knowledge. Image and knowledge are identical.

Third, "self-cognition" can be used to describe not only the knowledge of ordinary people, but also that of the Buddha. Thus Kamalaśīla states:

Since the self-cognition of knowledge is established even for (the cognition of) cowherds, it is not reasonable to criticize it (from any point of view).⁶⁴

With regard to the Buddha's cognition, Śāntarakṣita says in the TS:

2046 Whether endowed with an image or not, it is not reasonable (to assume that) one cognizes anything else (but knowledge). Therefore, concerning even the Buddha's knowledge, no critical examination is applicable.⁶⁵

And, in another context, Kamalaśīla comments:

The knowledge of the Blessed One is not postulated as cognizing (the object), so no critical examination is applicable.⁶⁶

The difference between the knowledge of ordinary people and that of the Buddha lies in whether it is false (*alīka*) or true (*satya*), and whether or not it has error (*bhrānti*). The nature of Buddha knowledge is explained as follows in Śāntarakṣita's TS:

2048 The sage, just like the Kalpa-tree, is not shaken by all the winds of imagination. And yet he brings about the welfare of the world.

2049 Therefore, in spite of seeing nothing, they call him the Omniscient, the Jina among all, because he can perform all the activities of an all-knower without effort.⁶⁷

On the other hand, Kamalaśīla explains the nature of the knowledge of ordinary people as follows:

The mere mistaken knowledge, which illuminates an unreal image in spite of the absence of an object, is due to nescience.⁶⁸

The knowledge of ordinary people is considered to be false. But their knowledge is not always false, since it has the potentiality of being developed through meditational practice to the point of becoming Buddha knowledge.⁶⁹ Kamalaśīla terms the Buddha knowledge which the yogins aim to attain "the knowledge of nonmanifestation of even nondual knowledge" (*advaya-jñānanirābhāsajñāna*).⁷⁰

Śāntarākṣita seems to have advanced the idea of the self-cognition of knowledge as a refinement of Dharmakīrti's ideas. Dharmakīrti says the following:

[Excepting knowledge itself], there is nothing to be experienced by knowledge, and [likewise] it has no experience other [than self-experience]; since knowledge is deprived of cognitum and cognizer, it is illuminated by itself.⁷¹

Being based on Dharmakīrti's position, the theory of self-cognition can be established from the Sautrāntika point of view as well as from the Yogācāra standpoint. According to the Sautrāntika, knowledge cognizes in knowledge the image which has been imparted by the external object. Since the image has similarity to the external object, it can be said that knowledge cognizes the external object. But, since the image appears in knowledge, knowledge cognizes nothing but itself.

The theory of self-cognition presupposes the following conception of the nature of perception. The external object is the cause of knowledge since it imparts an image to knowledge and is the object of knowledge. On the other hand, not only is knowledge an effect but, since it is the subject of perception, its nature is also imparted to the object.⁷² Here, then, is the causal relation between the external object and knowledge. Now, the effect, knowledge, can be logically analyzed into the means of perception and its result. The means of perception here is nothing but the image in knowledge which is put forth by the external object. Self-cognition is established on the grounds that knowledge, which is the knower and the effect, cognizes the image which is the means of perception. However, if the object is conceived of as a cause and as an external entity producing an image which is perceived as similar to the external object, no one could deny the fact that perception is based on a dichotomy between two distinct things, namely, the internal and the external. Therefore, the theory of self-cognition could be maintained only in the context of the mind-only theory. This point is made by

Śāntarakṣita in the following verses from the TS (repeated in the MA), in which he points out the shortcomings of the Sautrāntika theory which holds that the existence of the external objects is real.

1999 Knowledge is intrinsically opposed to insentient matter, and its immateriality is nothing but the self-cognition of knowledge.

2000 The self-cognition (of knowledge) is not to be analyzed into action and its agent, since (knowledge), being a single unity without components, cannot be divided into the (usual) three parts [i.e., the knower, the known and the act of knowing].⁷³

Why does knowledge cognize itself but not the external object? Śāntarakṣita strictly defines the nature of knowledge as sentient, and rejects the extension of the function of knowledge from itself to external objects. The similarity of the image in knowledge to the external object is also denied since knowledge and the external object are defined as qualitatively different. Knowledge, since it is immaterial, cannot grasp the insentient and material object which is distinct from knowledge.

On the basis of what relationship, then, is the self-cognition of knowledge possible? Śāntarakṣita and Kamalaśīla examine the relation between knowledge and the image which is supposed to be imparted by the external object as follows: when knowledge cognizes the image, is the image (a) that which has not yet been put in knowledge, or is it (b) that which has already been known? If (a), the image is nonexistent, since it exists neither in knowledge nor as knowledge. That which is nonexistent cannot be the means of perception, because it is devoid of causal efficiency. But, if (b), knowledge is like a means of perception. It is an effect, because the image is being cognized, and it is absurd to think that an effect brings about an effect.⁷⁴

Therefore, the process of knowledge cognizing itself can never be understood by means of the relation between either the agent and its action or the knower and the known. The connection cannot be established between two things that are different in quality, despite their apparent relationship. Knowledge and its image are merely a conceptual distinction superimposed on self-cognition.

The theory of self-cognition is really not possible to maintain in terms of the Sautrāntika tenet, which holds that knowledge is endowed with an image imparted by external objects. Nor is it possible in the theory of the Vaibhāṣika, which maintains that knowledge is endowed

with no image. It is only tenable in terms of the mind-only theory of the Yogācāra school. Śāntarakṣita concludes his presentation of the theory of self-cognition as follows:

Therefore, (knowledge) can cognize itself insofar as it has the intrinsic nature of consciousness. But how can it cognize the intrinsic nature of the object, from which it is distinct?⁷⁵

The preceding discussion of Śāntarakṣita's epistemology is summarized in the accompanying chart, which outlines his discussions in the MA with both Yogācāra schools and illustrates some of the points of disagreement between Śāntarakṣita and the Sākāravādins.

According to Tibetan tradition,⁷⁶ Śāntarakṣita is classified as a scholar whose position is similar to that of the Sākāravāda of the Yogācāra school, a position which holds that images are real. We cannot, however, follow this tradition. If Śāntarakṣita is so classified because he maintains that self-cognition is always endowed with an image, whether it is the knowledge of the Buddha or of ordinary people, then this is, indeed, an accurate classification. However, if he is so classified because his position is otherwise similar to that of the Sākāravāda, it is incorrect. Śāntarakṣita criticizes the reality of the image of knowledge by the original method of applying the criticism of atoms to knowledge.⁷⁷ He claims that by assuming that the image is real, the Sākāravādins cannot solve the problem of the incompatibility between unitary knowledge and plural image.

In fact, if one takes into account only his views on the nature of knowledge as illumination (*prakāśa*), Śāntarakṣita's position is similar to that of the Alīkākāravāda of the Yogācāra school. Ratnākaraśānti, regarded as a later representative of that school, maintains the same idea:

[Question:] In what way do you prove the theory that all entities have the intrinsic nature of mind-only?

[Answer:] Entities are established by the fact that they are experienced according to their own appearance. This appearance is called "illuminating," "luminous" and "shining." Furthermore, this (appearance) is not material, so that it is not objective, but rather pure appearance. If it is postulated that this idea is not acceptable, one is led to the absurd implication that no entity could be established, since nothing would appear. On the other hand, if it is acceptable, all dharmas would be established

**Graphic Representation of Śāntarakṣita's Differences with the
Alīkākāra-vijñānavāda and the Satyākāra-vijñānavāda Schools**

Level of Knowledge	Characteristics of Knowledge and Its Images				
	Śāntarakṣita's Position		Alīkākāra-vijñānavāda		Satyākāra-vijñānavāda
	Knowledge = Image	Knowledge	Image	Knowledge	Image
Buddha	knowledge of the nonmanifestation of even nondual knowledge (<i>advayajñāna-nirābhāsajñāna</i>)	knowledge without duality (<i>advayajñāna</i>)		mind-only (<i>citta-mātra</i>)	
<i>Paramārtha-satya</i>	true (<i>satya</i>), nonerror (<i>abhīrānta</i>); images co-arise dependently	true and real	false and unreal (<i>avicāraikaramāṇya</i>)	true and real	true and real (<i>tāttvika</i>)
Ordinary people	false (<i>alīka</i>), error (<i>bhīrānta</i>); images co-arise dependently	true and real	false and unreal; the represented nature (<i>parikalpita</i>)	true and real	true and real
<i>Saṃvṛti-satya</i>	production by nescience	production by nescience	production by error	production by error	production by error
	endowed with an image	without image		endowed with an image	

as having knowledge as their intrinsic nature, since that (which is appearance) is nothing but knowledge.⁷⁸

Accordingly, we can call Śāntarakṣita a Sākāravādin only in the sense that he holds that knowledge is endowed with an image which is not real. However, it would be more prudent to classify him only as a member of the Yogācāra-Mādhyamika school.

2.5 Jñānagarbha's Position on Self-cognition

At first reading of Jñānagarbha's SDVV, his position on the nature of the self-cognition of knowledge seems obscure. But it is clear that he refutes the theories of both the Anākārajñānavādins and the Sākārajñānavādins with verses that are brief and to the point. First he offers his own kārikā:

Knowledge which is not endowed with an image cannot grasp the object. The other [i.e., knowledge endowed with an image] cannot (grasp the object either), since the image is neither the valid means of cognition nor (an entity that can be) reasonably (demonstrated).⁷⁹

Then he quotes from Dharmakīrti:

Otherwise, how is it possible for a single entity (i.e., knowledge) to have in reality the images which have manifold appearances? (It is impossible), since its unity would be abandoned.⁸⁰

Jñānagarbha agrees that the everyday world of conventional truth is the dependent nature and nothing but mind-only, stating that the body of color-form, etc., has the intrinsic nature of the dependent nature and is a mere appearance of knowledge. So, although we cannot find a passage to tell us precisely that mind-only is the self-cognition of knowledge, it is not unreasonable to suppose that Jñānagarbha maintained that the everyday world is nothing but mind-only.

In the SDVV, however, we come across a passage that would seem to contradict the hypothesis above:

6c (Self-cognition is impossible), because self-cognition is not reasonable.⁸¹

The commentary SDVV states in syllogistic form:

- (P) Knowledge does not cognize itself by itself,
 (H) Because (it is) devoid of a representation of itself,
 (D) Just like other acts of cognition.⁸²

On the evidence of passages such as this, some Tibetan works seem to argue that Jñānagarbha does not admit the theory of self-cognition. They also seem to hold that his philosophical position is linked to that of Bhāvaviveka rather than to that of Śāntarakṣita.⁸³ Such interpretations, however, are based on a misunderstanding of the context of Jñānagarbha's discussion of *svasaṃvedana*. The passage in question is Jñānagarbha's critique of the theory that describes the process of knowing ultimate truth as an object.

Jñānagarbha states in the fifth kārikā of SDV that, strictly speaking, the "ineffable highest truth" (*aparyāya-paramārtha-satya*) never appears in knowledge, even in the knowledge of an Omniscient Buddha.

- 5 (*Aparyāya-paramārtha-satya*) cannot be determined as an entity corresponding to its appearance. It never appears in any form whatsoever as any object of knowledge.⁸⁴

Jñānagarbha then turns to the authority of scripture, quoting a sūtra passage to support his statement. This passage states that "not to see anything at all is to see the truth."⁸⁵ Jñānagarbha's own statement that *aparyāya-paramārtha-satya* never appears in any knowledge seems to be in agreement with the sense of this scriptural passage. Since *aparyāya-paramārtha-satya* never appears, the highest truth is not seen. Therefore, the path to this truth is not to see anything at all.

Nevertheless, the opponent interprets the expression "not to see anything at all" as "not to see anything of the imagined nature (*parikalpita-svabhāva*)." The opponent therefore understands the passage of the sūtra to mean that not to see anything of the *parikalpita-svabhāva* is to see the highest truth. In other words, he comes to the conclusion that to see the truth means to see the absence of *parikalpita-svabhāva*, which is nonduality, the consummate nature (*pariniṣpanna-svabhāva*) and the highest truth.

Śāntarakṣita explains the type of knowledge that will reach this truth as "knowledge with which one cognizes by oneself the way (to salvation) (*pratyātmagati-jñāna*; so sor rang gis rig pa'i shes pa)."⁸⁶ It seems that the opponent imagines that the subject of the *pratyātmagati-jñāna* cognizes as object the absence of the *parikalpita-svabhāva*. But

Jñānagarbha (and with him Śāntarakṣita) is actually proposing that knowledge itself knows the highest truth, not as an object, and not as the mere absence of *parikalpita-svabhāva*.

It is, in fact, likely that Jñānagarbha made the statement quoted above in response to his critics. The phrase "because self-cognition is not reasonable" refers only to the implications of the opponent's notion that the *pratyātmagati-jñāna* cognizes the absence of the *parikalpita-svabhāva*. Here Jñānagarbha points out that the self-cognition of the *pratyātmagati-jñāna* cannot be established to be a process of perception such that the *pratyātmagati-jñāna* cognizes the highest truth, since they are different entities.

Jñānagarbha himself seems never to reject the theory of the self-cognition of knowledge. Rather, he argues that "self-cognition" cannot be established by the opponent's idea of the self-cognition of the *pratyātmagati-jñāna*. He proves that *aparyāya-paramārtha-satya*, which he compares to the famous silence of Vimalakīrti, never appears in any knowledge. Otherwise, Jñānagarbha's position would lack consistency since, on the one hand, he would affirm that the world of conventional truth is nothing but mind-only (by refuting both the theories of *anākārajñānavāda* and *sākārajñānavāda*) while, on the other hand, he would reject the self-cognition of knowledge.

3. That Which Is Mind-only Is Without Intrinsic Nature

As we have already shown, verses 66cd and 92cd of the MA attempt to show that the theory of mind-only should be based on the standpoint of nonself. This means that in reality mind-only possesses neither a single nor a plural intrinsic nature and that we should not cling even to mind-only. Śāntarakṣita thought highly of the mind-only theory, but primarily as a means to attain the ultimate goal, which he considered to be the Mādhyamika stage. In the process of proving emptiness, he rejected those theories which maintained the existence of external objects, including Bhāvaviveka's theory of the Mādhyamika, while he likewise criticized the theories of the Yogācāravādins.

3.1 Śāntarākṣita's Criticism of the Sākāravāda and the Alikākāravāda of the Yogācāra School

Let us take a brief look at the criticism of the Yogācāra theories discussed in the MA and the MAV.

44 [The Yogācārin holds that] even though images appear as phantoms, produced by the ripening of latent impressions (*vāsanā*) which belong to the (same) individual series (*saṃtāna*) from the beginningless past, still, because they are the result of error, their intrinsic natures are as those of illusions.

45 Even though we appreciate this (doctrine), let us consider whether (in the theory proposed) the essence of the (images should be taken to be) real or something agreeable and tacitly accepted only as long as it is not investigated critically (*avicāryaikaramaṇīya*).

Śāntarākṣita's criticism is directed at both the Sākāravāda and the Alikākāravāda branches of the Yogācāra school. Both maintain that the image (*ākāra*), that is, the object of knowledge, is the result of an error produced through the ripening of latent impressions from the beginningless past. But the basic difference between the two Yogācāra theories lies in whether they consider the image to be real or whether they think it to be something agreeable and tacitly accepted only as long as it is not investigated critically. The former view is held by the Sākāravāda, the latter by the Alikākāravāda. The image here refers to the image of blue, etc., as Kamalaśīla points out in his commentary MAP.⁸⁷ Śāntarākṣita's criticism of the theory proposed by the Sākāravādins is focused on the incompatibility of unitary knowledge with the plurality of real image. As long as the Sākāravādins hold to the reality of the image, that reality inevitably implies an extension in space (*deśavitānāvasthita*) or non-dimensional contiguity in space (*deśanairantaryāvasthāna*).

To counter this position, Śāntarākṣita employed a critique based on the criticism of the theory of atoms.⁸⁸ He seems to be the only philosopher to have proposed such an approach.

49 If you admit that knowledge (consists of as many parts) as the number of (its manifold) forms, then it would be difficult (for you) to avoid the same kind of criticism which is made regarding (the reality of) atoms.

The Sākāravāda can neither solve the contradiction nor reasonably explain the process of perception, and Śāntarakṣita attacks that philosophical position on these points.

Śāntarakṣita then turns to the theory proposed by the Alīkākāravādins:

- 52 (The Alīkākāravāda-Yogācārin holds that knowledge) does not intrinsically possess these images, but by the force of an error they appear in knowledge, although in reality the latter is endowed with no images.

Alīkākāra or *nirākāra* means that knowledge is not endowed with images. The Alīkākāravādins maintain that knowledge without images perceives unreal images which are both produced by error and considered to be imagined nature. But it is a contradiction to hold that the image is cognized but that knowledge is not endowed with images. So, Śāntarakṣita criticizes the idea of the Alīkākāravādins that knowledge is something clearly different from the image.

- 54 Indeed, when there is not B (the image “blue”) in A (the knowledge “blue”), B is not perceived in A. Just as we neither (feel) pleasure when we are suffering, nor (see) white in black.
- 59 If it (the image) were unreal, its knowledge would [always] appear as knowledge without an image. (But) knowledge, like a pure crystal, would not perceive (any object).

3.2 Śāntarakṣita’s Defense of His View by Reference to Scripture

Śāntarakṣita supports his conclusion in the MAV by citing sūtras such as the *Lokottaraparivarta* and the *Dharmasaṃgīti*, in addition to the *Laṅkāvatāra* sūtra which we quoted above. Śāntarakṣita first quotes the *Lokottaraparivarta* as follows:

O, Sons of the Conqueror. Furthermore, it is understood that the triple realm is mind-only. Even the three times (past, present and future) are understood to be similar to mind. That mind also is understood to be without extremes and middle.⁸⁹

He then quotes the *Dharmasaṅgīti*:

Blessed One! All dharmas have as their essence the imagined nature. They are established as mind-only, without substance, like illusion, without roots.⁹⁰

4. Conclusion

Śāntarakṣita's philosophical position can be said to have aimed at the revival of Nāgārjuna's fundamental thesis of the absence of intrinsic nature in all dharmas. He sought to prove the truth of the absence of intrinsic nature in all dharmas, or of nonself both in objects (*dharma*) and in the person (*pudgala*), by riding, to use his metaphor, the carriage pulled by the two horses of the Yogācāra and the Mādhyamika. Also greatly influenced by the logic of Dharmakīrti, Śāntarakṣita aspired to enhance Nāgārjuna's philosophy through a synthesis of the theories of the Yogācāra and the Mādhyamika. The direction of the philosophy of the Yogācāra-Mādhyamika school, in which Śāntarakṣita played a central part, may be defined as a "Nāgārjuna Renaissance." Śāntarakṣita explicitly recognized the eclectic nature of his philosophy when he composed the following stanza:

93 Therefore, those who hold the reins of logic while riding the carriage of the two systems [Mādhyamika and Yogācāra] attain the stage of a true Mahāyānist.

ŚĀNTARAKṢITA'S MADHYAMAKĀLĀMĪKĀRA

Contents of the *Madhyamakālamkāra*

Śāntarakṣita's Salutation to the Blessed One

Purpose for Which the Treatise Was Written

I. Main Subject of the Treatise: All Dharmas Have Neither a Single nor a Plural Nature	1
II. Investigation According to Reasoning (<i>yukti</i>)	2-62
A. Reply to the Objection that the Author's Thesis Is Based on the Fallacy of an Illegitimate Logical Mark (<i>asiddha</i>)	2-60
1. Reply to the Objection that the Author's Thesis Is Based on the Fallacy of a Logical Mark Whose Locus Is Unreal (<i>āśrayāsiddha</i>) and Which Is not Admitted Either by the Opponent or the Proponent (<i>anyatarāsiddha</i>)	2-60
a. Examination of external objects (<i>rūpaskandha-parīkṣā</i>)	2-15
(1) Refutation of the possibility of there being real entities in time	2-8
(a) Their singular and permanent nature is inadmissible —against the Vaiśeṣika	2
(b) Refutation of the unconditioned (<i>asamskrta</i>) —against the Vaiśeṣika	3-7
(c) Only entities with causal efficiency (<i>arthakriyā</i>) are worthy of examination	8
(2) Refutation of the concept of person (<i>pudgala</i>) —against the Vātsīputriya	9
(3) Refutation of the possibility of there being real entities in space	10-15
(a) Refutation of the pervader (<i>vyāpin</i>): ether (<i>ākāśa</i>)	10a-b

(b) Refutation of the nonpervader (<i>avyāpin</i>):	
1. gross entities (<i>sthūla</i>)	
—against the Vaiśeṣika	10c-d
2. atoms (<i>paramānu</i>)	
—against the Vaiśeṣika, Vaibhāṣika and Sautrāntika	11-13
(c) Real entities postulated by Buddhist and non-Buddhist schools have no intrinsic nature	
—against the Vaibhāṣika and Vaiśeṣika	14-15
b. Examination of mind (<i>viññānaskandhaparīkṣā</i>)	16-60
(1) Self-cognition (<i>svasāmvedana</i>): Śāntarakṣita's fundamental standpoint	16-18
(2) An outline of the refutation of the theory that knowledge is not endowed with an image (<i>anākārajñānavāda</i>) —against Śubhagupta, the Mīmāṃsaka	19-20
(3) An outline of the refutation of the theory that knowledge is endowed with an image (<i>sākārajñānavāda</i>)	22-23
(4) Detailed presentation of the refutation of both the above theories: the problem of the incompatibility of unitary knowledge and plural image	24-42
(a) The refutation of opponents who hold that knowledge has a plural intrinsic nature	24-33
1. The theory that knowledge is not endowed with an image and its refutation —against the Vaibhāṣika	24-26
2. Śāntarakṣita's own position	27-30
3. The theory that knowledge is endowed with an image and that it assumes the form of the external objects and its refutation —against the Sautrāntika	31-33
4. [Dharmakīrti's solution and Śāntarakṣita's position]	
(b) The refutation of the views of opponents who hold that knowledge has a single intrinsic nature	34-60
1. The Sautrāntika theory and its refutation	34
2. The Vaiśeṣika theory and its refutation	35
3. The Jaina and the Mīmāṃsaka theories and their refutation	36
4. The Lokāyata theory and its refutation	37
5. The Sāṃkhya theory and its refutation	38-39
6. The Vedānta theory and its refutation	40
7. The Sautrāntika theory and its refutation	41-42
8. Śāntarakṣita's conclusion: the rejection of unitary knowledge	43
(5) Examination of the Yogācāra doctrine	44-60
(a) Presentation of the Yogācāra doctrine	44
(b) The necessity of examining the Yogācāra doctrine	45
(c) The refutation of the Yogācāra school which asserts images to be real (<i>satyākāravāda</i> or <i>sākāravāda</i>)	46-51*
1. The problem of the incompatibility of unitary knowledge and plural image	46-48
2. The refutation of the theory that knowledge has a plural intrinsic nature: —[Not supported by scripture] —The critique of atoms applied to knowledge	49
3. The problem of the incompatibility of unitary knowledge and plural image	50-51

(d) The refutation of the Yogācāra school which asserts images to be unreal (<i>alīkākaravāda</i> or <i>anākaravāda</i>)	52–60
1. The Alikākāravāda-Yogācārin's theory	52
2. Reasons for the absurdity of the claim that one perceives unreal images	53–60
—Why are they clearly perceived even by ordinary people? What is it that is perceived?	53
—Unreal images are not perceived	54–56
—There can be no relation between unreal images and knowledge	57–58
—Knowledge which is like a pure crystal results in nonperception: the difference between Śāntarakṣita and the Alikākāravāda-Yogācārin	59
—The relation between unreal images and error: the dependent nature of images	60
—[Criticism of Dharmakīrti]	
—[Criticism of Śubhagupta]	
2. [Reply to the Objection that the Author's Thesis Is Based on the Fallacy of a Doubtful Logical Mark (<i>sāṃdighāsiddha</i>): The Buddha Cognizes Images]	
3. Śāntarakṣita's Conclusion: There Is Neither a Single nor a Plural Intrinsic Nature	61
B. [Acknowledgment of the Presence of the Logical Mark in the Quality to Be Inferred (<i>anvaya</i>)]	
C. Acknowledgment of the Absence of the Logical Mark in any Member of the Class Incompatible with the Quality to Be Inferred (<i>vyatireka</i>)	62
III. Investigation According to Scripture (<i>āgama</i>)	63–90
A. Examination of Conventional Truth (<i>samvrtisatya</i>)	63–66
1. All Dharmas Have the Aspect of Conventional Truth	63
2. Definition of Conventional Truth	64–66
a. It does not mean nonexistence	64
b. It has a cause	65–66
B. Examination of the Highest Truth (<i>paramārthasatya</i>): The Significance of the Absence of Intrinsic Nature in All Dharmas	67–82
1. The Refutation of the Concept of Intrinsic Nature Postulated by Other Schools	67–68
2. On Nonproduction (<i>anutpāda</i>)	69–72
a. Definition of nonproduction	69
b. Nonproduction and the highest truth	70–72
3. By Whom and How Is the Absence of Intrinsic Nature in All Dharmas Understood?	73–75

a. Emptiness (<i>śūnyatā</i>) and unwise people	73-74
b. Emptiness and yogins	75
4. The Proof of the Absence of Intrinsic Nature in all Dharmas	76-78
5. The Difference between the Mādhyamika and the Nihilist	79-82
a. Wrong conception and its cause	79-81
b. The refutation of eternalism and nihilism	82
C. Examination of Liberation	83-90
1. The Cause of Affliction (<i>kleśa</i>) and the Way to Liberation (<i>mokṣa</i>)	83
2. The Affirmation of Causal Relation in the Sense of Conventional Truth ...	84
3. Practice Undertaken for Liberation	85-90
a. A gift which is pure with respect to the three points (<i>trikoṭīpariśuddhi</i>)	85-87
b. Nonclinging	88-90
IV. Conclusion	91-97
A. Śāntarakṣita's Philosophical and Religious Standpoint	91-93
1. The Everyday World of Conventional Truth Is Nothing but Mind-only ...	91
2. But that Which Is Mind-only Is Without Intrinsic Nature	92
3. The Development from the Yogācāra Doctrine to the Mādhyamika Doctrine on the Basis of the Interpretation of Nonproduction	93
B. The Ambrosia of the Tathāgata's Teaching	94-97
1. [The Mahāyāna Doctrine as Presented by Other Buddhist and Non-Buddhist Schools]	
2. [The Theory of Emptiness Is Unparalleled]

THE MADHYAMAKĀLAMKĀRA-KĀRIKĀ:

Text and Translation

Tibetan Texts

Cone: Dbu-ma, Sa, 52b7-56b3.

Derge: Dbu-ma, Sa, 53a1-56b3 (Tōh 3884).

Narthang: Dbu-ma, Sa, 44a5-48a2.

Peking: Dbu-ma, Sa, 48b7-52b1 (P 5284; 101: 1.1.7-2.4.1).

K: *Kārika* = MA; K alone indicates the reading of all editions.

V: *Vṛtti* = MAV; V alone indicates the reading of all editions.

Pañ: *Pañjikā* = MAP; Pañ alone indicates the reading of all editions.

A combination of C, D, N or P with K, V or Pañ indicates the respective edition's reading of MA, MAV or MAP, respectively. Thus, for example, PañD indicates the reading of the *Pañjikā* in the Derge edition.

Text

1. (P) Those entities postulated as real by Buddhist and non-Buddhist schools have in reality no intrinsic nature,
(H) Because they possess neither a single nor a plural nature,
(D) Like a reflection.

Cited in BCAP 173.17-18; Mimaki 1982: 553:

*niḥsvabhāvā amī bhāvās tattvataḥ svaparoditāḥ /
ekānekasvabhāvena vīyogāt pratibimbavat //*

2. Since effects are produced in succession, a permanent entity could not have a single intrinsic nature. If (its) effects exist at different points in time, the permanence of the [cause] is contradicted.
3. Even according to the (Vaibhāṣika) view that the unconditioned (*asaṃskṛta*) are the objects of wisdom acquired through meditative practice, the [unconditioned] are not single realities, since they are related to successively arising (moments of) wisdom.
4. If the intrinsic nature of the (unconditioned) object, known by a former (intuitive) cognition, continues to exist, the former cognition would still exist even when another one occurs. In that case the latter would occur at the same time as the former.

5. sngon dang phyi ma'i gnas rnam su //

11. 'byar ba dang ni bskor ba'am //
 bar med rnam par gnas kyang rung //
 dbus gnas rdul phran rdul gcig¹ la //
 bltas pa'i rang bzhin gang yin pa //
¹N, P *cig*.

5. (If it does not continue to exist), the unconditioned should be regarded as momentary, like cognition, since neither does the object itself (of the latter cognition) exist at the time of the former, (nor does) the object itself (of the former) exist at the time of the latter.
 6. (P) They [the unconditioned] are not (literally) unconditioned,
(H) For they occur by the force of successive (preceding) moments,
(D) Like mind (*citta*) and mental states (*caitta*).
 7. If those momentary entities are postulated to have taken place independently, they would permanently remain existent or non-existent, since they do not depend on others.
 8. In what way is it profitable for those who seek for (causal efficiency; *arthakriyā-samartha*) to investigate entities having no causal efficiency? In what way is it meaningful for lustful [women] to ask whether a eunuch is handsome or not?
- PV III:211. Cited in TSP 191.12-13:
- arthakriyā 'samarthyasya vicāraiḥ kiṃ tadarthinām /*
9. It is clearly understood that the person (*pudgala*) is possessed of neither a single nor a plural intrinsic nature, since it can be explained as neither momentary nor nonmomentary.
 10. Given its relation to entities with various directional aspects, how can the all-pervading (*vyāpin*) [ether] be a single reality? Neither is a gross entity (*a-vyāpin*) a single reality, since some of its parts are visible while others are not.
 11. (It is claimed that) the atom in the center is in contact with (the other atoms forming one particle), or that it is surrounded (by them with intervals remaining in between), or that it is in non-dimensional contiguity (with them, there being neither contact nor intervals between them).

TS 1989:

¹VN, VP, PañNP *bem*.

²VN, VP *bem*.

³VN, VP *rigs*.

12. (However), if, some say, (the atom in the center) entirely faces one atom in the front and also entirely faces another atom, then how can there be a gross thing such as a mountain?

TS 1990:

*anvantarābhīmukhyena tad eva yadi kalpyate /
pracayo bhūdarādīnām evaṃ sati na yujyate //*

13. But if one maintains that the side which faces another atom is different, then how is the atom a single entity without parts?

TS 1991:

*anvantarābhīmukhyena rūpaṃ ced anyad iṣyate /
katham nāma bhaved ekaḥ paramānus tathā sati //*

14. (Thus), it has been proven that atoms have no intrinsic nature. Therefore, it is (also) evident that (entities such as) the visual organ (*cakṣurindriya*), substance (*dravya*), and the like, postulated as real by many Buddhist and non-Buddhist schools, have no intrinsic nature.

Cited in Mimaki 1982: 275.

15. These (entities) have [atoms] as their own being, and are composed of [atoms]. Moreover, the (atoms) are supposedly inherent in the qualities (*guṇa*) of these (entities), and in the nature of their activity (*karma*), in their universality (*sāmānya*) and in their particularity (*viśeṣa*). (Therefore, it is also proven that these entities have no intrinsic nature.)

16. Knowledge is intrinsically opposed to insentient matter, and its immateriality is nothing but the self-cognition of knowledge.

TS 1999. Cited in BCAP 190.11; TBh 16.15-17:

*viññānaṃ jaḍarūpebhyo vyāvṛttam upajāyate /
iyam evātmasaṃvittir asya yā jaḍarūpatā //*

²N, P *par*.

17. The self-cognition (of knowledge) is not to be analyzed into action and its agent, since (knowledge), being a single unity without components, cannot be divided into the (usual) three parts [the knower, the known and the knowing].

TS 2000. Cited in BCAP 190.13; TBh 16.17–18:

*kriyākārahābhāvena na svasamvittir asya tu /
ekasyānaṁśarūpasya trairūpyānupapattitaḥ //*

For 16cd and 17ab, see the antaraśloka at JNA 471.7–8:

*iyam evātmāsamvittir asya yājadarūrātā /
kriyākārahābhāvena na svasamvittir asya tu //*

18. Therefore, (knowledge) can cognize itself insofar as it has the intrinsic nature of consciousness. But how can it cognize the intrinsic nature of the object, from which it is distinct?

TS 2001:

*tad asya bodharūpatvād yuktam tāvat svavedanam /
parasya tv artharūpasya tena samvedanam katham //*

19. The very nature (of the knowledge) that cognizes (the object at the same) time as it cognizes itself cannot be found in either (knowledge or its object) when they are separate, yet some (the Anākārajñānavādins) maintain that knowledge is distinct from its object.

TS 2002ab: *na hi tadrūpaṁ anyasya yena tadvedane param / samvedyate . . .*

20. On the other hand, there is an essential difference between the two (knowledge and its object, even) according to the theory that knowledge is endowed with the image of its object (*sākārajñānavāda*). Yet (this theory maintains that), although the cognition (of an external object) is merely a designation, (knowledge) is still possible, because the image (in knowledge) has the same form as its (external object).

TS 2004. Cited in Mimaki 1979: 19:

*nirbhāsijñānapakṣe tu tayor bhede 'pi tattvataḥ /
pratibimbasya tādrūpyād bhāktam syād api vedanam //*

21. On the other hand, for those [the Anākārajñānavāda] who do not hold that knowledge reflects the image of the object, neither can there be such cognitive image of an external object.

TS 2005. Cited in Mimaki 1979: 20:

22. Images (in knowledge) should not be multifarious, because (the image) is not different from knowledge. In that case the (image) could not give us the cognition of an external object.

TS 2036:

*jñānād avyatiriktatvān nākārabahutā bhavet /
tataś ca tadbaleṅāsti nārthasaṃvedanasthitiḥ //*

23. Knowledge should not be unitary, since it is related to plural images. Otherwise how can the identity of the two be explained?

Cf. TS 2037:

*ākāravyatiriktatvāt jñāne vā 'nekatā bhavet /
anyathā katham ekatvam anayoḥ parikalpyate //*

24. The ordinary man takes it for granted that knowledge cognizes (such plural images as) “white” and the like instantaneously, because of the rapidity of (separate moments of) cognition, even though knowledge actually cognizes successively.

Cf. PV II:133; cited in Mimaki 1979: 28:

*manasor yugapad vṛtteḥ savikalpāvikalpayoḥ /
vimūḍho laghvṛtter vā tayoḥ aikyaṃ vyavasyati //*

Cf. TS 1246:

*krameṇaivopajāyante vijñānānānti cen matam /
sakṛd bhāvābhimānas tu śighravṛtter alātavat //*

25. But when you hear the words “latā” and [“tālaḥ” and] the like pronounced very quickly, why are they not heard instantaneously?

Cf. TS 1250:

*latātālādibuddhīnām atyarthaṃ laghu varttanam /
sakṛd bhāvābhimāno 'taḥ kim atrāpi na varttate //*

26. Taking only conceptual cognitions into consideration, (they) do not cognize [the images] successively. Since (they) do not last long, the rapidity of cognition can be said to be the same for all cognitions.

Cf. PV II:138:

*pratibhāsāvīśeṣaś ca sāntarānantare katham /
śuddhe manovikalpe ca na kramagrahanaṃ bhavet //*

Cf. TS 1251:

*śuddhe ca mānase kalpe vyavasīyeta na kramaḥ /
tulyā ca sarvabuddhīnām āśvṛttiś cīrāsthiteḥ //*

27. Therefore, all objects are not apprehended successively, but are seen as apprehended instantaneously, just as manifold images (are instantaneously, not successively, cognized).

Cf. TS 1252:

*ataḥ sarvatra viṣaye na kramagrahaṇaṁ bhavet /
sākṛdgrahaṇabhāsa tu bhavec chabdādibodhavat //*

See also Matsumoto 1986: 187.

28. [The opponent maintains that] even in the example of a whirled torch, the torch gives rise to an erroneous cognition of a circle of fire (produced by memory perceiving) instantaneously (discrete perceptions of the torch). (But, the circle of fire is) not created by (memory) joining together (individual) cognitions (of the torch), for (the circle) is perceived very clearly (as a complete circle).

Cf. PV II:140:

*śīghravṛtter alātāder anvayapratighātinī /
cakrabhrāntiṁ dṛśā dhatte na dṛśāṁ ghaṭanena sā //*

Cf. TS 1253:

*alāte 'pi sakṛd bhrāntiś cakrābhāsā pravarttate //
na dṛśāṁ pratisandhānād viśpaṣṭaṁ pratibhāsanāt //*

29. ("Clear perception" contradicts "joining together") because the joining together is produced by memory, not by perception, for the past object is not perceived (in the present).

TS 1254:

*tathā hi pratisandhānaṁ smṛtyaiva kriyate na tu /
darśanena vyatītasya viśayasyānavagrahāt //*

30. The object of memory is not seen clearly, since it has passed away. Therefore, [if] the circle [of fire] appearing [when one turns a firebrand were created by memory], it would not be seen clearly.

TS 1255:

*yaś cāsyā viśayo nāsau vinaṣṭatvāt parisphuṭaḥ /
tataḥ parisphuṭo nāyaṁ cakrābhāsaḥ prasajyate //*

31. If (the author) agreed (with the opponent, i.e., the Sautrāntika who holds) that (many of the same kinds of perceptions) occur at the same time, then when you look at a multicolored carpet, (there would) occur at the same time as many perceptions (as there are colors in the colored carpet).

32. If so, then even the perception (of a single cognitive image), such as white, would be a manifold cognition, since it (this perception) perceives (different) parts (of the white object) such as up, middle or edge.

Cited in SMVBh (D 59b2-3; P 347a8-b1); Shirasaki 1985: 126, n. 56.

33. (But) I have not (ever) known to appear in any cognition white, etc., which has an atomic nature and which is single and impartite.

34. It is established [by the Sautrāntika themselves] that the five kinds of sense cognition have aggregates (of atoms) as their object, while the sixth [mental cognition] has cognition and mental states (*cittacaitta*) as its objects.

For 34ab see Hattori 1968: n. I.38: *saṃcītāmbanāḥ pañca vijñānakāyāḥ*. Hattori quotes other instances of the phrase, including Trīṃśikabhāṣya (Lévi): 16.20-21 and AKB 34.1-2: *saṃcītāśrayāmbanatvāt pañcānām vijñānakāyānām*.

35. Even according to the established theory of the other school [the Vaiśeṣika], it is not reasonable (to maintain) that knowledge appears as a unity, since (it) cognizes (objects) such as substance (*dravya*) having qualities (*guṇa*) and the like.

36. (If one were to accept) the view [of the Jainas and the Mīmāṃsakas] that all entities (have a self-nature) exactly like agate, then neither could the mind that grasps them appear as a single entity.

37. Even according to the theory [of the Lokāyatas], which holds that the object and the sense organs consist of the assemblage of (the four elements), earth (*pṛthivī*) and the like, [knowledge] still does not occur as a single entity.

38. Even according to the theory [of the Sāṃkhya], which holds that sounds (*śabda*) and the like are in their essence [nothing but the three *guṇas*] *sattva*, etc., it is not reasonable (to maintain) that knowledge illuminates only a single object, for the objects appear as being in their essence the three [*guṇas*].

39. How can you [the Sāṃkhya] argue that knowledge actually apprehends the object, since knowledge, which has a single nature, would appear without corresponding to its object, whose essence would be the three *guṇas*?

Cf. TS 39:

*tryākāraṃ vastuno rūpam ekākārās ca tadvidāḥ /
tāḥ kathāṃ tatra yujyante bhāvīnyas tadvilakṣaṇāḥ //*

40. [The Vedāntin argues:] Why is it so difficult to maintain [the unity of a] permanent consciousness, whether it occurs simultaneously or successively with various appearances (of the image), even if there are no external objects?

41. It is evident that in the cognition of “ether” (*ākāśa*) and the like (the three unconditioneds; *asaṃskṛta*), there appear various (images), since even a single name is made up of several letters.

42. (Some) would postulate that knowledge exists as one, appearing without multiplicity. However, it is impossible to establish (its existence) from the point of view of the highest truth, because it has been proved that any (entity which) has the characteristic (of existence, i.e., causal efficiency; *arthakriyā*) is refuted (from the point of view of the highest truth).

43. Therefore, it is established from every point of view that knowledge occurs with appearances of various (images). It cannot have a unitary intrinsic nature, as there are various images.

44. [The Yogācārin holds that] even though images appear as phantoms, produced by the ripening of latent impressions (*vāsanā*) which belong to the (same) individual series (*saṃtāna*) from the beginningless past, still, because they are the result of error, their intrinsic natures are as those of illusions.

45. Even though we appreciate this (doctrine), let us consider whether (in the theory proposed) the essence of the (images should be taken to be) real or something agreeable and tacitly accepted only as long as it is not investigated critically (*avicāryai-karamaṇīya*).
46. If (the images were) real, knowledge would be either plural or unitary. Both [knowledge and its images] would certainly be distinct things, since they have opposite [natures].
47. If the image is not manifold it is impossible to dispose of absurd (implications). For instance, with respect to [our images] of movement and rest, movement in one part (of our sphere of cognition) would cause the whole (world) to move.
48. Even in the theory of those who maintain the real existence of the external object, the same applies. If (knowledge and its image) are inseparable, one cannot escape the fact that everything would be reduced to a single dharma.
49. If you admit that knowledge (consists of as many parts) as the number of (its manifold) forms, then it would be difficult (for you) to avoid the same kind of criticism which is made regarding (the reality of) atoms.
50. If you regard a plural (entity) as a unity,¹ is your theory any different from that of the Digambara? Plurality cannot have a single intrinsic nature, in the same way that various jewels (cannot be one single jewel).²

¹PV II:200c; JNA 420.4: *citraṃ tad ekam iti ced*.

²TS 1733cd: *yac citraṃ na tad ekam hi nānājātīyaraṇavat*.

51. If plurality had a single intrinsic nature, how could it be manifested as plural and, moreover, how could there be a difference between (those parts of the object that are) visible and (those that) are not (*āvṛtānāvṛta*)?
52. (The Alikākāravāda-Yogācārin holds that knowledge) does not intrinsically possess these images, but by the force of an error they appear in knowledge, although in reality the latter is endowed with no images.
53. If (the images) are unreal, how can they be perceived clearly like this [even by an ordinary man]? Such [nondual] knowledge is not distinct from that entity [i.e., the images].

Matsumoto 1986: 190.

54. Indeed, when there is not B (the image “blue”) in A (the knowledge “blue”), B is not perceived in A. Just as we neither (feel) pleasure when we are suffering, nor (see) white in black.

Cf. AAA 629.21–22:

*yad yatrasaividyamāna-rūpaṃ na tat tatra saivedyate yathā
duḥkhe sukhādi-rūpaṃ.*

55. (P) The term “knowledge” is not in reality appropriate to [perception of an unreal] image,
(H) Because (such perception) is contrary to the very nature of knowledge,
(D) Like (the vision of) a flower in the sky.
56. (P) Nor can (perception) of the unreal (image) be called “knowledge” in a figurative sense,
(H) Because (the unreal image) does not have causal efficiency,
(D) Like (the vision of) the horns of a horse.
(An unreal image) cannot produce knowledge of its own appearance (*bdag snang; ātmābhāsa*) (in the mind), so it can have no causal efficiency.

57. Is there any relation between knowledge and (the unreal image) on account of which (the image is) definitely perceived? The unreal (image) is neither the self-nature of it (knowledge), nor what has been produced from it.
58. If (an image) has no cause, why should it occur (only) at specific times? If (it) has a cause, how is it possible to avoid the fact that it has a dependent nature (*paratantra-svabhāva*)?
59. If it (the image) were unreal, its knowledge would [always] appear as knowledge without an image. (But) knowledge, like a pure crystal, would not perceive (any object).
60. If you postulate that it (the image) is perceived as the result of an error (in spite of its unreality), is it any different from that which depends on an error? If (it) is produced by the force of that (error), it is, after all, of a dependent nature.
61. When any entity is scrutinized, no unity is found in it. Where there is no unity, you cannot find plurality either.

Cf. TS 1995:

*tad evaṃ sarvapakṣeṣu naivaikātmā sa yujyate /
ekāniṣpattito 'nekasvabhāvo 'pi na sambhavī //*

62. There is no entity which has a classification other than singularity or plurality, since these [classifications] are mutually exclusive.

Jackson 1986: 7.

63. Therefore, all entities are understood as being characterized only by conventional (truth). If this much is accepted [by our opponents], then why should there be any disagreement between us?
64. One should understand that conventional (truth) is in essence (1) that which is agreeable and tacitly accepted only as long as it is not investigated critically (*avicāryaikaramaṇīya*); (2) that which is characterized by arising and decay; and (3) whatever has causal efficiency.
65. Even that which is agreeable and tacitly accepted only as long as it is not investigated critically implies the production of similar successive effects conditioned by their own successive causes.
66. Therefore, it is also correct to say that it would be impossible for conventional truth to be causeless. But if (you claim that) its substratum (*upādāna*) is real, you have to explain what it is.
67. (We) reject the intrinsic nature of all entities postulated by those among our opponents who follow the way of logic. Therefore, there is nothing to be refuted (in our system).
68. Even with the greatest effort, it is not possible to criticize in any way one who admits neither existence, nor nonexistence, nor both existence and nonexistence.

Cited in JSSN, Mimaki 1976: 206, but cited differently in Mimaki 1982: 192 and n. 515. Cf. Mimaki 1976: 311 and n. 444; *Catuhṣataka* 400 (XVI.25), cited in Pras 16.4-5:

*sad asat sadasac ceti yasya pakṣo na vidyate /

69. Therefore, there is no entity that can be established in reality. Therefore, the Tathāgatas preached the nonproduction (*anutpāda*) of all dharmas.
70. Some say that this [nonproduction] is the highest truth, since it agrees with the highest truth. (But in my view) it [the highest truth] is that which is completely free from all accumulations of fictional human ideas (*prapañca*).
71. Since there is no production and the like, [in reality] there can be no nonproduction and the like. Since (production), the substantial referent (of nonproduction), has been rejected, verbal expression with reference to the latter (i.e., nonproduction) is impossible.
71ab cited in Mimaki 1982: 228.
72. When there is no object, you cannot rightly apply any negative (to it). If [nonproduction arose] depending on an idea (*vikalpa*), it would be conventional, not real.
Cited in AAA 45.7-8, 838.17-18. 72ab cited in Mimaki 1982: 228. Cf. also Ruegg 1981: 92, n. 297:
*na ca nirviṣayaḥ sādhu prayogo vidyate nañāḥ /
vikalpāśrayatve vā sāmvrtaḥ syān na tāttvikaḥ //*
73. Now, if the intrinsic nature of (all) entities (i.e., emptiness) can be realized intuitively by understanding it (intrinsic nature), why is it that unwise people do not understand in this way the nature of entities?
74. (In fact) they do not. They cannot realize it intuitively, because every sentient being is subject to (the habit of) imagining things as real which, from the beginningless past, grow in each burdensome individual series (*samtāna*).

75. Those who infer by means of probative reason—(reason) which removes false imputations regarding that (emptiness)—can understand. Those Lords of Yogins understand it directly.

Jackson 1986: 7.

76. Everyone admits the reality of the relation of the probandum (*sādhya*) and the probans (*sādhana*) in entities known not only to wise men but also to women and children, outside the particular locus (*dharmin*) proposed by their preferred theories.

Cited in Mimaki 1982: 539.

77. Otherwise, we would be [guilty of the fallacies of] the logical mark whose locus is unreal (*āśrayāsiddha*) and the like, as (the opponents have) claimed.

Cited in Mimaki 1982: 539.

78. I have not rejected entities insofar as they are of the nature of appearance. Therefore, (in our theory) there is no confusion regarding the established (relation of) the probandum and the probans.

Cited in Mimaki 1982: 528.

79. Therefore, (having established the nonsubstantiality of all things), one must infer that people who imagine existence, non-existence and the like have the same kinds of seeds in their individual series, which exist from the beginningless past.

80. This (idea of existence or nonexistence) does not arise by the force of [external] entities, since the latter do not exist, the self-nature of such entities having been refuted in detail.

81. Because of their successive occurrence, (ideas) do not arise either without cause, or from an eternal (cause), nor are they themselves eternal. Therefore,
 (P) The (notions of production and nonproduction, which we have discussed) previously, arise from their own species,
 (H) Because they are indeed [ideas of existence and nonexistence],
 (D) As (when one gradually) becomes skilled.
82. Therefore, both eternalism and nihilism are completely rejected in our system. (The fact) that [all entities] continue to decay and to arise (successively) is like (the genetic relationship of) a seed, a sprout and a branch.
83. Those who have realized that there is no self in dharmas easily avoid affliction arising from mistaken concepts, because they have internalized (the idea of) the absence of intrinsic nature (in all dharmas).
84. Since causal relation is not denied in conventional truth, there is no confusion as to the established relationship between defilement (*saṃkleśa*) and purification (*vyavadāna*).
 Cited in SMVBh (D62b1; P351a5); Shirasaki 1985: 131, n. 67.
85. Indeed, since the law of causal relation has been established, it is also possible in our system (to gather) the pure equipment (of merit and of wisdom; *puṇya-jñāna-sambhāra*).
86. A pure effect results from a pure cause. It is like the (eight) pure elements of moral conduct, etc., which result from right view.

87. Likewise, an impure effect results from an impure (cause). It is like adultery, etc., which result from false views.

88. (P) Objectifying an entity is understood to be a mistaken concept (*viparyāsa*),

(H) Because it goes against the valid knowledge (that those entities possess neither a single nor a plural intrinsic nature).

(D) It is like our cognition of a mirage.

Cited in SMVBh (D65b1; P 355a5); Shirasaki 1985: 139, n. 94.

89. Therefore, if the practice of (six) *pāramitās* arises through the force of this (objectifying), it will be weak, just like the practice that results from the false views of “me” and “mine” (*ātma-ātmīya*).

Cited in SMVBh (D65b1-2; P 355a6-7); Shirasaki 1985: 139, n. 94.

90. (P) The fruit resulting from not objectifying an entity is great,

(H) Since it results from the powerful cause of [the practice of the One who has the ten powers (*daśabala*)].

(D) It is like the sprout (arising) from a fruitful seed.

Cited in SMVBh (D65b2; P 355a6-7); Shirasaki 1985: 139, n. 94.

91. That which is cause and effect is nothing but knowledge. It is established that knowledge is that which is self-validated.

Cited in Mimaki 1982: 166, n. 455.

92. Based on [the standpoint of] mind-only one must know the non-existence of external entities. Based on this standpoint [of the lack of intrinsic nature of all dharmas] one must know that there is no self at all even in that (which is mind-only).

93. Therefore, those who hold the reins of logic while riding the carriage of the two systems [Mādhyamika and Yogācāra] attain the stage of a true Mahāyānist.
94. The pure and true ambrosia, the taste of which is known neither by Viṣṇu nor by Ívara nor other [mundane deities], and which is the cause that establishes immeasurable [ordinary verbal usage (*vyavahāra*)],
95. and whose taste is not known even by those [i.e., śrāvakas, prāyebuddhas, etc.] who have become leaders of the world, is not enjoyed by anyone except the Tathāgata, who is motivated by pure compassion.
96. Therefore, the compassion of the intelligent who follow the [Tathāgata's] teaching is directed towards those who, in spite of their intelligence, give credit to established doctrines which express mistaken (views).
97. Those who possess the treasure of intelligence find no real substance (*sāra*) in their opponents' theory and, instead, they pay their respects to the Protector (the Buddha).

The *Madhyamakālamkāra-kārikās* were composed by Master Śāntarakṣita, who has reached the other side of the ocean of the theories established by his own and other schools and has placed on his head the pure lotus petals of the feet of the Lord of Speech (Vāgīśvara).

(These *kārikās* were) translated, collated, and arranged by the Indian abbot Śīlendrabodhi and the great revisor Ye shes sde.

NOTES TO THE INTRODUCTION

For complete citation information the reader is directed to the list of abbreviations and bibliography found at the beginning of Part III.

1. See Mimaki 1982: 45; but Ogawa 1976: 319 suggests the possibility that the names were used even in India.
2. Kamalaśīla calls the Yogācāra-Mādhyamika and the Sautrāntika-Mādhyamika schools "the two paths of the Mādhyamika." See Ichigo 1985: 291.6; Ruegg 1981: 59.3; Kajiyama 1982: 30. But, concerning the meaning of the names of these schools, see Matsumoto 1981: 98-108 and Mimaki 1982: 41, n. 87.
3. MAP (D 129b6; P 138b7) in Ichigo 1985: 303.17: *tshul gnyis shes bya ba ni dbu ma dang rnal 'byor spyod pa zhes bya'o //*.
4. MAP (D 116b4-5; P 122b8-123a1) in Ichigō 1985: 211.8-9: *kun rdzob pa'i rgyu snga ma snga ma thog ma med par 'dod pa'i phyir ro //*.
5. Comments in brackets in this and the following verse are based on MAP (D 129a6-b1; P 138a6-b1) ad MAV (D 79b4-5; P 79b4-5), cy. on MA vs. 93. Edited in Ichigō 1985: 301.11-21. LA X.592:

*hetupratyayavyāvṛttim kāraṇasya niṣedhanam /
cittamātravyavasthānam anutpādaṁ vadāmy aham //*

6. LA X.595:

*na bāhyabhāvaṁ bhāvānāṁ na ca cittaparigraham /
sarvadvṛṣṭiprahāṇaṁ yat tad anutpādalakṣaṇam //*

7. Editors' note: The attribution of the two verses quoted here is a matter of controversy. According to our understanding, Śāntarakṣita seems to attribute both of these verses to the LA. Preceding these verses he quotes LA X.256-58 with the words *Lang kar gshegs pa las*, then with the word *yang* he quotes LA X.592 and 595. It is at this point that, with the words *'dir yang gsungs pa*, he quotes these two verses. The verses introduced by Śāntarakṣita with *yang* are identified in Kamalaśīla's MAP as follows: *yang zhes bya ba ni 'phags pa lang kar gshegs pa'i mdo de nyid las so*, that is, without question they are attributed to LA. The introduction *'dir yang gsungs pa* is commented upon by Kamalaśīla as follows: *'dir yang gsungs pa zhes bya ba ni sems tsam kun rdzob tu smra ba'o // 'phags pa lang kar gshegs pa las gsungs pa'i khungs . . .* (the *la* after *'phags pa* in Ichigō 1985: 303.2 is a misprint and should be deleted), thus attributing the verse to LA. The second of the two verses, however, Kamalaśīla attributes to Nāgārjuna: *'phags pa klu sgrub kyi zhal snga nas gsungs pa'i tshigs su bcad pa gnyis pa . . .*, specifically the *Yuktiṣaṣṭikā*: *'di ni rigs pa drug cu pa las gsungs pa yin no*. The first verse seems to match almost exactly LA II.138 = X.85. The verse reads:

*na hy atropadyate kimcit pratyayair na nirudhyate /
utpadyante nirudhyante pratyayā eva kalpitāḥ //*

The second verse cannot be located in LA, but matches perfectly *Yuktiṣaṣṭikā* 34, as Professor Ichigō quotes below. Mimaki 1982: n. 458 contains a lengthy discussion of the problem of the correct attribution of the first verse, and also of the problems of the reading of its pada d. According to Mimaki, Ratnākaraśānti (in his PPU and other texts) and Bhāvaviveka (in the MRP, therefore likely a later author of the same name) attribute the questionable verse to Nāgārjuna, not to LA. Mimaki says, however, that "la tendance à attribuer à Nāgārjuna semble être assez tardive." The question of authorship is also taken up by Tsong kha pa in his *Legs bshad snying po*, in which he accepts the attribution of the first verse to LA.

However the issue is resolved, it is clear that for Śāntarakaṣita quoting these two verses is a way of providing authority for his position. From this point of view, whether the verses contain the words of the Buddha from the LA or of "the second Buddha," Nāgārjuna, from the *Yuktiṣaṣṭikā*, they are verified by the sacred tradition, and are therefore authoritative.

8. *Yuktiṣaṣṭikā* 21, quoted in MAV (D 79b6; P 79b5-6). See also Ichigō 1985: 302; JNA 488, 22-23; 545, 3-5. The translation is from Kajiyama 1978: 132.

*dharma notpadyate kaścīn nāpi kaścīn nirudhyate /
utpadyante nirudhyante pratyayā eva kevalāḥ //*

9. *Yuktiṣaṣṭikā* 34, quoted in MAV (D 79b6; P 79b6-7). See also Ichigō 1985: 302; JNA 405, 1-2; 545, 7-8:

*mahābhūtādi vijñāne proktaṃ samavarudhyate /
taj jñāne vigaṃaṃ yāti nanu mithyā vikalpitam //*

(a) After *-dvaya* a word equivalent to Tib. *rnam par dpyod do* should be supplied. Cf. P, vol. 90, 171, 1, 1. (b) Wogihara's ed. has *-ramya-pūrvā-*, but his MS C reads *-ramyam*. Tib. has *ma brtags na nyams dga' ba tsam du*.

The word "[investigating]" is added on the basis of the Tibetan *rnam par dpyod do*.

19. Cf. Mimaki 1982: 28, n. 52. The restoration into Sanskrit of *'Jig rten grags sde spyod pa'i dbu ma pa* is that of Obermiller, but it is not certain.

20. Kajiyama 1978: 117-29.

21. Technical terms of Buddhist logic and their abbreviations follow those of Kajiyama 1966.

ni / gang yang snang bar mi 'gyur bas / thams cad ma grub par thal bar 'gyur ro //
grub na ni de nyid shes pa yin pas chos thams cad shes pa'i rang bzhin du grub
par 'gyur ro //*

79. SDVV 7a2-3; ed. and trans. in Eckel 1987: 164.20-23 and 79:

rnam pa med pa'i shes pa ni //
yul la 'dzin par mi rigs so //
rnam pa tshad ma mīn phyir dang //
mī rigs phyir na cig shos mīn //

This is an antaraśloka, on which see Mimaki 1980b.

80. PV III:358; PV in I:49; SDVV 7a3; ed. and trans. in Eckel 1987: 164.24–27 and 80:

*gang phyir sna tshogs ngo bu ru //
snang ba can gyi dngos gcig la //
rnam pa rnam bden ji ltar 'gyur //
de yi gcig nyid nyams phyir ro //*

This antaraśloka follows that quoted in n. 79. PV III:358 reads:

*anyathāikasya bhāvasya nānārūpārabhāsinaḥ /
satyaṁ kathaṁ syur ākārās tad ekatvasya hānitaḥ //*

Pada a is quoted in JNA 446.19.

81. SDVV 4b3; ed. and trans. in Eckel 1987: 157.25 and 72: *rang rig rigs pa ma yin phyir //*.
82. SDVV 4b3; ed. and trans. in Eckel 1987: 157.28–29 and 73:

*shes pa ni bdag gis bdag shes pa ma yin te / rang snang bas stong pa'i phyir shes
pa gzhan bzhin no //*

83. See, e.g., Gelek 1973: vol. 14, fo. 851.4. The work therein is the well known *Grub mtha' chen mo* (*Grub mtha' rnam bshad rang gzhan grub mtha' kun dang zab don mchog tu gsal ba kun bzang zhing gi nyi ma lung rigs rgya mtsho skye dgu'i re ba kun skongs*). See the concordance in Mimaki 1982: 257–67.

84. SDVV 4a7; ed. and trans. Eckel 1987: 157.10–13 and 72:

*ji ltar snang ba'i dngos por ni //
rnam par gnas par mi rung ste //
shes pa'i dngos po thams cad la //
ji lta bur yang snang mi 'gyur //*

85. The same idea can be found in the *Dharmasāṅgīti: adarśanaṁ bhagavan sarva-dharmānāṁ darśanaṁ samyagdarśanam*. Cited in MAV (D 78a7; P 78a2); Ichigō 1985: 286; Śikṣ 264.1–2; Mimaki 1982: 246, n. 602. Cf. T 761 (XVII) 637b21. Note the quotation in IBhK 212.2–3, quoting “a sūtra”: *kataman paramārthadarśanam / sarvadharmāṅgāṁ adarśanam //*.

86. SDVP (D 18b7–19a1; P 6b2).

87. Ichigō 1985: 125.1–2.

88. The theory of atoms is refuted in verses 11–13 of the MA.

89. Ichigō 1985: 296.2–5; IBhK 217.9–11; MĀ 172 b3–4; trans. in Lopez 1987: 346:

*kye rgyal ba'i sras dag gzhan yang khams gsum pa ni sems tsam du rtogs te / dus
gsum yang sems dang mtshungs par rtogs so // sems de yang mtha' dang dbus
med par khong du chud do //*

Skt. quoted in IBhK 217.9–11:

*punar aparam bho jinaputra cittamātraṁ traidhātukam avatarati tac ca cittam
anantamadhyatayāavatarati /*

Cf. T 279 (X) 288c5–6.

90. Ichigō 1985: 296.10–12; trans. in Lopez 1987: 346:

*bcom ldan 'das chos thams cad ni kun brtags pa'i snying po ste / sems tsam du bas
pa rdzas ma mchis par sgyu ma ltar rtsa ba ma mchis pa'o //*

Cf. T 761 (XVII) 641c20–21.

APPENDIX

Sūtra Quotations in the MAV and MAP

The following is a list of the sūtra quotations in the commentaries to Śāntarakṣita's MA, that is, in Śāntarakṣita's own MAV and in Kamalaśīla's MAP. For each sūtra quotation reference is made to the quoted passage in the Chinese (Taishō edition) and Tibetan (Peking reprint edition) Canons, or to the Sanskrit, when available. The location of the quotation in MAV or MAP is given by reference to the MA verse being commented upon, followed by reference to the edition of MAV and MAP in Ichigō 1985. MAV and MAP also quote quite extensively from śāstra literature, especially from the *Abhisamayālaṅkāra* and *Tattvasaṅgraha*. These śāstric quotations can be located in the index to Ichigō 1985: 341-47.

References to the Taishō edition give: T + text number + (volume number) + page + column + line. References to Peking give: P + text number + (volume number: page, folio, line).

Studies in the Literature of the Great Vehicle Three Mahāyāna Buddhist Texts

Edited by Luis O. Gómez & Jonathan A. Silk

The King of Samādhis Sūtra: Chapters I-IV
The Gilgit Manuscript of the *Vajracchedikā* Sūtra
Śāntarakṣita's *Madhyamakālamkāra*

Indian Buddhist literature falls roughly into two classes: the religious or scriptural (*sūtra*) and the philosophical (*śāstra*). The three parts of this volume contain studies and translations of two *sūtras* and one *śāstra*. Taken together, they permit the reader to confront the vast breadth and depth of Indian Mahāyāna Buddhist literature.

The English translation of the first four chapters of the King of Samādhis Sūtra (*Samādhirāja*), accompanied by a detailed introduction, is the first western language translation of the introductory chapters of the scripture, which was a central source for the philosophy of Mādhyamika Buddhism. This team translation, based on the Sanskrit text of the *sūtra*, was conceived with a popular audience in mind.

Part II is Gregory Schopen's edition and translation of the so-called Diamond Sūtra (*Vajracchedikā*), a famous scripture of the Perfection of Wisdom tradition. The Gilgit text presented here is one of the oldest available Sanskrit Buddhist manuscripts and as such directly reveals one aspect of sixth-century Indian Buddhism. Textual notes accompanying the edition highlight the difficulties that face the student who would study such a text.

Masamichi Ichigō's study, edition, and translation of the *Madhyamakālamkāra* of Śāntarakṣita makes available one of the fundamental works of Indian Buddhist philosophy. A detailed introduction situates the thought of Śāntarakṣita in the Mādhyamika philosophical system and emphasizes his contribution not only to Indian Buddhist thought but to the Tibetan Buddhist tradition as well.

Through the texts included here and the different methods used in their study, this volume seeks to present an overview of modern research on Indian Mahāyāna Buddhist literature. It is the first volume in the series Michigan Studies in Buddhist Literature.
